

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

P R E F A C E .

THE design of this book is to afford a thorough preparation for the reading of Caesar's Commentaries on the Gallic War. It is a very common experience on the part of teachers to find, after several months or a year have been spent in the study of the elements of Latin, that, on beginning to read some Latin author, certain difficulties present themselves at the very outset and increase with every onward step. Some of the sources of these difficulties are :—

1. In nine cases out of ten, the pupil begins the study of Latin with no definite knowledge of his own language, even in the simplest points of sentence structure. As has been said, "he does not appreciate the relations of things."

2. The beginner has been taught to translate isolated sentences, which are never combined into connected narrative. Fragments of sentences, phrases, oblique cases of nouns and pronouns, all absolutely meaningless in themselves, have constituted a large portion of his fundamental work.

3. His elementary book has lacked logical method. Many peculiarities of the Latin language, which, in their proper place, would be shorn of all difficulty, and would appear as reasonable constructions, are presented to the beginner too early in his Latin study. These not only demand a needless amount of time and labor, but also tend to discourage the young student.

A teacher of experience has said : "By a strange inversion we supply an advanced student with all the light he can have, but give a beginner, at best, a meagre abridgment of the same information." In this manual an attempt has been made to present solutions of some of the difficulties which beset the young student of Latin, and to prepare him for an intelligent study of Caesar.

The general plan of the book is as follows :—

1. It opens with a short and simply worded **review of English Etymology and Analysis**. This may be taken at the outset as a preparation for the Latin Lessons, or left for consultation and comparison as constructions are presented in Latin which have parallels in English. At the end of this review are placed such English idioms and peculiarities in the use of Cases as have similar or analogous uses in Latin.

2. **Elementary principles and definitions** of Latin Etymology form the next chapter. These cover all essential points from the Alphabet to the First Declension of Nouns. They are briefly and clearly stated, with an explanation of every topic (such as Quantity) which might present a difficulty to the beginner. All statements are excluded which do not have a direct bearing upon the end in view, — the mastery of the essentials.

3. **The Latin Lessons**, beginning with the First Declension, follow. These contain references to Grammars, notes (explained below), test-questions, and a double exercise, — first, of translation from Latin into English ; and secondly, from English into Latin. There is no vocabulary printed on the same page as the Lesson, thus removing from the pupil the temptation to make in the recitation-room the preparation that should have been made beforehand. To avoid, however, any possible difficulty or confusion arising from the necessity of consulting a general vocabulary at the outset, a special vocabulary for each of the first twenty-nine Lessons is placed at the end of the book.

The Simple Sentence is introduced as early as possible, the Present Indicative of a few simple verbs being employed. A special attempt has been made to present the various uses of the Cases, Verb, etc., in the order in which their force and peculiarities will be best appreciated by the young student.

The uses of the Subjunctive have been presented in a simple and natural order of development. Particular attention has been bestowed on the constructions of **Indirect Discourse**, and carefully graded material has been given for translation and drill.

The final Lessons contain a variety of selections for translation into Latin, including a large number of sentences of different degrees of difficulty, English translations from Caesar, etc.

4. Several pages of **Latin Narrative** for translation, taken from the Commentaries on the Gallic War, are then given. These are accompanied by notes and explanations.

5. The **Notes** follow. These have been prepared with great care, and give a compact and complete outline of all essential principles of Latin Etymology and Syntax, with explanation of difficult constructions, useful hints on translation, and illustrative examples when necessary. References are made to these Notes in every Lesson; and as they are arranged in the usual grammatical order, they will form a convenient outline for frequent review.

6. An **Appendix**, containing all the **essential forms of Inflection**, is added, that the book may serve as a complete manual for the beginner; if, however, the instructor prefer that these forms should be learned from a Grammar, the references to the Latin Grammars of Allen and Greenough and Harkness, given in connection with the Lessons, will furnish the same information.

7. At the end of the book are given **Special Vocabularies and Examples** for the first twenty-nine Lessons (already re-

ferred to) and a complete **General Vocabulary**, Latin-English and English-Latin.

In the preparation of this manual, the author has been greatly aided by the advice and suggestions of many friends, whose experience in the same and kindred departments of instruction has made them welcome counsellors; to all such he desires to return sincere thanks.

REVIEW OF ENGLISH GRAMMAR.

THE NUMBERS IN PARENTHESES REFER TO SECTIONS OF THIS REVIEW.

ETYMOLOGY.

1. **Etymology** treats of the Parts of Speech and their changes of form and meaning.

2. There are eight Parts of Speech : **Noun** (or **Substantive**), **Adjective**, **Pronoun**, **Verb**, **Adverb**, **Preposition**, **Conjunction**, **Interjection**.

3. A **Noun** (Latin **nomen**, *name*), or **Substantive**, is the name of a person or object.

a. A **Common Noun** is the name of any person or object of a general class ; as, *city*, *man*.

b. A **Proper Noun** is the name of a particular person or object ; as, *Rome*, *Caesar*.

c. A **Verbal Noun** has the general use of a noun, but a verbal form and force ; as, *Seeing is believing* ; *To be* is better than *to seem* ; He gained his promotion by *doing* his duty faithfully.

d. A **Collective Noun**, though singular in form, denotes a *group* of persons or objects ; as, *crowd*, *army*, *society*, *legion*.

4. To nouns belong **Gender**, **Person**, **Number**, **Case**.

5. **Gender** distinguishes sex. Names of males are **Masculine** ; of females, **Feminine** ; of objects neither male nor female, **Neuter**.

Some nouns may denote either sex ; as, *pupil*, *child*. These are said to be of the **Common Gender**.

6. Nouns have three **Persons**. The First Person denotes the speaker ; as, *I*, your *general*, command you. The Second Person denotes the person or thing addressed ; as, *Boys*, be attentive. The Third Person denotes the person or thing spoken of ; as, *Haste* makes *waste*.

7. **Number** shows how many are meant. The Singular Number denotes but one ; the Plural, more than one.

8. **Case** shows the *relation* of a Noun or Pronoun to other words. A change of relation requires a change of case. There are four cases, — the **Nominative**, the **Possessive**, the **Objective**, and the **Independent**.

a. The **Nominative Case** denotes the relation of a Subject to its Verb, and answers the question *Who?* or *What?*

b. The **Possessive Case** denotes the relation of possession, and answers the question *Whose?*

c. The **Objective Case*** denotes the relation of a Direct Object (39, a) to the Transitive Verb which governs it, and answers the question *Whom?* or *What?* It is also used with a Preposition to form a Phrase (43); as, Men gain *wealth by industry*.

d. The **Independent Case**, or, as it is sometimes called, the **Case Absolute**, has no dependence on any other word. Its most common uses are: (1) as the Case of Address; † as, *Soldiers, we have conquered*; (2) with Participles, forming a contracted clause; as, *The guard having been killed, the prisoner escaped* (that is, *since, or when he had been killed*).

9. An **Adjective** limits or describes a Noun or the equivalent of a Noun; as, *Honest men prosper*; To err (error) is *human*, to forgive (forgiveness) is *divine*; That he should come was *strange*.

a. Adjectives are sometimes used as Nouns, the words with which they agree being understood. When thus used, they are called **Pronominal Adjectives**, that is, used *for a Noun* (11); as, *The wise grow in wisdom*; *The first is my friend, but the second I never saw before*.

b. Adjectives denoting number are called **Numeral Adjectives**. They are either **Cardinal**, telling *how many* (as, *one, twenty*), or **Ordinal**, telling *which one in order* (as, *sixth, third*).

10. **Comparison** of Adjectives is a change in form by which they express different degrees of quality.

There are three degrees of comparison: the **Positive**, denoting a quality in its simple state; as, *wise, good*; the **Comparative**, denoting a higher or lower degree than the Positive; as, *wiser, better, less*; the **Superlative**, denoting the highest or lowest degree of the quality; as, *wisest, best, least*.

Adjectives are compared in three ways: (1) Regularly, by adding *r* or *er* to the Positive for the Comparative, and *st* or *est* for the

* The peculiar uses of the Objective Case are given in section 54.

† In Latin, the Vocative Case (from *voco*, I call).

Superlative, as, *tall, taller, tallest*; (2) Irregularly, as, *good, better, best*; (3) By using the Adverbs *more* and *most*, or *less* and *least*, with the Positive.

11. A Pronoun (Latin *pro*, *for*, and *nomen*, *name*) is a word used *for a noun*, and, like a noun, has **Gender, Person, Number, Case**. Pronouns are either *Personal, Relative, or Interrogative*.

a. A Personal Pronoun indicates, by its form, the person speaking, the person addressed, and the person spoken of. The Personal Pronouns are *I, you* (sometimes *thou*), *he, she, it*, and their plural forms, *we, you* (sometimes *ye*), *they*.

b. A Relative Pronoun refers to a preceding substantive (or its equivalent), called the **Antecedent**, and connects clauses. The Antecedent may be a Noun, or any word, or collection of words, used as a Noun; as, *The man who* (Pronoun and connective) *came to see me was my friend*; *We climbed the mountain, which* was a dangerous feat. In the last example, *We climbed the mountain* is the antecedent of *which*, the Relative Pronoun. The Relative Pronouns are *who, which, what, that*. After *such* and *same*, *as* is often used as a Relative Pronoun.

c. An Interrogative Pronoun asks a question; as, *What* did you say? The list is *who, which, what*.

12. A Verb expresses *being, action, or state*; as, *am, run, sleep*. A Verb is either *Transitive*, acting on a Direct Object (39, *a*); as, *Brutus killed* his friend; or *Intransitive*, not acting on a Direct Object. The word **transitive** means *passing over*; that is, the action *passes over* from the actor to the object receiving the action.

13. To verbs belong **Voice, Mode, Tense, Number, Person**.

14. There are two **Voices**, *Active* and *Passive*. The *Active* represents some person or thing as existing or acting; as, *He is praising*. The *Passive* represents some person or thing as acted upon; as, *We are praised*; *They are loved*; *He is conquered*.

15. Mode (Latin *modus*, *manner*) shows *how* a person regards an action, etc., and therefore *how* he states it.

"The *Mode* of a verb shows the *mood* of the speaker."

a. The Indicative Mode states a *fact*, or asks a *question*; as, *He comes*; *Has he come*?

b. The Potential Mode expresses *liberty, ability, or necessity*. It employs, as Auxiliary verbs (25), *may, can, must, might, could, would, should*; as, *I may go*; *We must obey*.

- c. The **Subjunctive Mode** states something as *possible* (or *uncertain*) or *impossible*; as, If I *were* general; If he *should come*. More will be said of this mode when the subject of **Tense** is reached (19).
- d. The **Imperative Mode** *commands, exhorts, or entreats*; as, Soldiers, *advance*; Friend, *renounce* your evil habits; *Help* me.
- e. The **Infinitive Mode** is not limited, as the other modes are, in respect to person or number; hence its name (*infinte, unlimited*). The other modes are called *finite* (i. e. *limited* in person and number). The Infinitive Mode does not state anything. It is often used as a Verbal Noun; as, *To be* is better than *to seem*.

16. **Tense** is a distinction of *time*.

Time is *present, past, or future*.

An act may be thought of, in *any* time, as

- I. Indefinite; as, I *wrote* (whenever I wished).
- II. Imperfect; as, I *was writing* (action not completed).
- III. Completed; as, I *have written* (the writing is *now* finished).

17. The Indicative Mode is the only one in which the tenses denote proper distinctions of *time*. In the other modes, the same *names* are applied to the tenses, but, in most instances, these names give no idea of the real time thought of. That this fact may be more clearly understood, the tenses of each mode will be described separately.

- a. The following table shows for the **Indicative Mode**, (1) The divisions of time; (2) How the action may be stated in connection with each; (3) Examples; (4) Names which we usually give to the tenses:—

TIME.	ACTION STATED AS	EXAMPLES.	COMMON NAMES.
<i>Present.</i>	Indefinite,	I give (whenever I please).	{ Present.
	Imperfect,	I am giving (action <i>not completed</i>).	
	Completed,	I have given (action <i>now completed</i>).	
<i>Past.</i>	Indefinite,	I gave (whenever I pleased).	{ Past.
	Imperfect,	I was giving (action <i>not completed</i>).	
	Completed,	I had given (action <i>completed in past time</i>).	
<i>Future.</i>	Indefinite,	I shall give (at any time).	{ Future.
	Imperfect,	I shall be giving (action <i>not completed</i>).	
	Completed,	I shall have given (action <i>completed in the future</i>).	

- b. The Imperfect forms (present, past, and future) are often called *progressive*, because they denote the act or state as *going on*. The Indefinite forms (present and past) are often expressed in *statements*, with *do* and *did*, and these are called *emphatic*, because they state more positively than do the ordinary forms. In *questions*, these words do not give this force; as, *Did* you not visit the sick man? Yes, I *did* visit him.

NOTE. We often use forms which might be misleading if not studied in connection with another thought. In the sentence, "When he *comes*, I shall welcome him," *comes* represents *future time*. Also, in the sentence, "If I do not *find* my trunk before Tuesday, I shall go without it," *do find* is equivalent to *shall have found*. The knowledge of this fact is of great value in expressing many English sentences in Latin, since in that language the distinctions of tense are more carefully observed.

18. The tenses of the *Potential Mode* are four, — the *Present*, *Past*, *Present Perfect*, *Past Perfect*.

These *names*, however, are of little value in indicating distinction of *time*, which, in very many cases, can be decided only by the *sense*. Some of these peculiar uses arise from the lack of a *Future* and *Future Perfect*. The *Past Perfect* is more accurate in its use than any of the others.

These tenses employ the following Auxiliary Verbs (25) : —

- a. *May, can, must*, to form the Present.
- b. *Might, could, would, should*, to form the Past.
- c. *May (can, must) have*, to form the Present Perfect.
- d. *Might (could, would, should) have*, to form the Past Perfect.

The following examples show what has already been stated, — that the *sense*, and not the *name* of the tense, must often decide the time denoted by the tenses of the Potential Mode : —

He *may be* here (*now*, or *to-morrow*); I *must go* (next year); We *can do* that (*to-day*, or *next week*); The general said that the town *must be taken* (at that time); He *may have been* here yesterday; The soldiers *may have taken* the town before we *can reach* it.

REMARK. The above examples show that the Potential Mode has, in *sense* if not in *form*, six tenses; the *Present* being used when a *Future* is required, and the *Present Perfect* when a *Future Perfect* is needed.

19. The *Subjunctive Mode** has only one form, in common use, that is unlike the tense-forms of the Indicative and Potential. That form is *were*, in the First and Third Persons Singular, where the Indicative has *was*; as, If I *were* you; If he *were* industrious. It borrows its other tense-forms from the Indicative and Potential.

In the Subjunctive, as in the Potential, the *sense*, and not the *name* of the tense, must often decide the time (18).

According to the definition given in section 15, *c*, the Subjunctive states something as *possible* (or *doubtful*) or *impossible*.

Four Subjunctive tense-forms will be described, a thorough knowledge of which will be of very great value to the student when he shall translate Latin sentences containing the same thoughts. These forms denote action as: (1) Future; (2) Future Perfect; (3) Present; (4) Past. These are chosen, not because they are the *only* tenses of the Subjunctive, but because they best illustrate the *mode*, or *way*, of expressing a thought in the Subjunctive Mode. The following will make this clear:—

- a. Future Possibility* (or *Doubt*). 1. If he *should come* to-morrow, I *would be* glad. 2. If he *should (have) come* before next Thursday, he *could and would save* the prisoner's life.
- b. Impossibility.* { Present. 1. If I *were* richer, I *should be* contented.
2. If you *loved* your country, you *would be* fighting for it. 3. If he *saw* the snake, he *would be* afraid.
Past. If he *had been* general, he *would have managed* affairs more wisely.

REMARK. The student will notice that (under *b*) a tense *past* in form is used to state something as impossible in *present* time.

In the following sentences, tell,—(1) What *time* is thought of; (2) What

* TO TEACHERS. No attempt has here been made to follow the system ordinarily adopted in school grammars. An excellent authority remarks, "The Subjunctive is evidently passing out of use" (i. e. as a *form* of the language), and it is important that a student should be so trained in the use of language that he may be able to recognize in the Subjunctive a medium of *thought*; and this is the only purpose that the author has in presenting this view of the mode. The teacher may prefer to omit this section until the Latin Subjunctive is studied. It will aid the student greatly to study the illustrative sentences given here; and the teacher should emphasize the fact that correct speech in English requires certain forms to express certain thoughts.

each sentence *means* (that is, whether something is stated as *possible* or *impossible*). Some of these sentences may require to be changed in form before the thought can be clearly seen : —

1. Were he to confess his fault, he would be forgiven. 2. Were he here, he would be among friends. 3. If thy brother trespass against thee, rebuke him ; and if he repent, forgive him. 4. If we should not find the house, I'd be in despair. 5. If the doctor had come yesterday, the sick man would be better to-day. 6. If thou hadst been here, my brother had not died. 7. Were he more diligent, he would be more successful.

20. The *Imperative Mode* has but one tense-form (the Present), and one person (the Second). This tense denotes the time of *giving* a command ; the time of *obeying* is future ; as, Soldiers, when you attack (shall attack) the enemy to-morrow, *advance* fearlessly. A *direct* command can be expressed in the Second Person only. Such forms as "Let me go," "Let him beware," express an *entreaty*, *exhortation*, *warning*, etc. Really, *let* is in the Imperative, and *go* in the Infinitive (56, REMARK) ; but, by constant use, *let* has become a mere sign of an *exhortation*, *warning*, etc.

21. The *Infinitive Mode* has two tenses, the *Present* and the *Perfect* ; as, *to see*, *to have seen*, *to be struck*, *to have been struck*.

Notice that the *time* of these tenses depends on the *time of the principal verb*. The Present represents an event as *taking place* at the time of the principal verb ; as, I wish (shall wish, had wished) *to go*. The Perfect represents an event as *completed* at, or before, the time of the principal verb ; as, He is said (was said, will have been said) *to have heard*.

22. The *Number* and *Person* of a Verb are the same as those of its Subject.

23. A *Participle* is a *Verbal Adjective* ; that is, it has the general meaning of a Verb, but, like an Adjective, it modifies a Noun or a Pronoun. Participles are used in both voices, and in three tenses.

Active Participles : —

- a. The Present Participle ends in *ing* ; as, The boy, *seeing* the danger, flees ; He, *hearing* the sound, arose.
- b. The Past Participle differs from the others in that it has no strictly adjective use, but is only used in forming compound tenses in the Active ; as, I have *seen* ; He had *heard*.
- c. The Perfect Participle ; as, *Having seen* his friends, he returned ; *Having learned* the lesson, he will recite.

Passive Participles : —

- d. The Present Participle, ending in **d** or **ed**, unless the verb is *irregular* (24). Sometimes, however, it is preceded by **being**; as, The soldier falls (or fell). (*being*) severely *wounded*.
- e. The Past Participle, used in the Passive as the same participle is employed in the Active, but with more *adjective* force; as, He has been *injured*.
- f. The Perfect Participle; as, *Having been wounded*, he must be (will be, was) carried home.

REMARK. Notice that, as in the Infinitive Mode, the *time* of a participle depends on the time of some other verb. This will be seen from the preceding examples. The Present Participle, therefore, represents an action as *going on* (Active) or *received* (Passive) at the time expressed by the principal verb.* Also, notice that the Perfect Participle represents an action as *completed* at the time of the principal verb.

24. Verbs are called **regular**, when they form their *past tense* and *past participle* by the addition of **d** or **ed** to the simple form; as, *help*, *helped*. Verbs are called **irregular**, when they do not follow this law; as, *am*, *was*, *been*.

25. An **Auxiliary Verb** (Latin *auxilium*, *aid*) is one used to *aid* in the conjugation of other verbs; as, He *does* not think that you *will* tell me what he *has* done and *can* do, if the opportunity is offered.

26. Some Verbs are found only in the Third Person Singular. They never have a *personal* subject (**I, you, he**), and hence are called **Impersonal Verbs**. They are also called **Unpersonal** (one person), because used only in the Third Person.

This subject (**it**) is very indefinite in its meaning, and if, when we say, "*It rains*," "*It snows*," some one were to ask, "*What rains* (or *snows*)?" the question would not be easy to answer.

It stands for the *thought*, or general *idea*, of the verb; or, as we should say in Latin, for the *stem* of the verb. "*It rains*," "*It snows*," mean "*Rain is falling*," "*Snow is falling*," etc.

27. A **Defective Verb** lacks some of its modes or tenses; as, *may*, *can*, *ought*, *quo'h*, *shall*.

* Therefore some grammarians call this tense of the Participle, in both voices, the Imperfect Participle, because its action is represented as *not completed*. The Present Infinitive is often called the Imperfect Infinitive, for a like reason.

28. An Adverb is used to modify a Verb, Adjective, or another Adverb.

An adverb may express : —

Time ; as, *lately* ; **Place** ; as, *here* ; **Cause** ; as, *why* ; **Degree** ; as, *very, wholly* ; **Manner** ; as, *well, earnestly* ; **Affirmation** ; as, *yes, certainly* ; **Negation** ; as, *no, not*.

29. A Preposition (meaning *placed before*) connects a Noun or Pronoun with some other word ; as, He lived *in* Rome. This Noun or Pronoun must be in the Objective Case (8, c).

REMARK. When the Noun or Pronoun is omitted, the Preposition becomes an Adverb ; * as, He ran *down* the hill (Preposition) ; He ran *down* (Adverb).

30. A Conjunction (Latin *con, together*, and *junco, join*) is a word used to connect words, phrases (43), and clauses (41).

Conjunctions are : —

a. *Co-ordinate*, when they connect elements of equal importance ; as, *and, but*.

b. *Subordinate*, when they connect elements of unequal importance ; as, *if, because*.

Adverbs used as Subordinate Conjunctions are called *Conjunctive Adverbs* ; as, *when, while, before*.

31. An Interjection (meaning *thrown in, or between*) is a word *thrown into* a sentence, not dependent on any other word, and not affecting the construction of the sentence. It expresses some strong or sudden emotion ; as, *alas ! ah !* Many other parts of speech are sometimes used as Interjections ; as, *What ! don't you remember me ? Nonsense !*

SYNTAX.

32. Syntax treats of the construction of sentences, and the relation of their different parts to each other.

33. A Sentence is a collection of words expressing a complete thought ; as, The brave soldier received a reward from his general.

34. Analysis is the separation of a sentence into the elements, or parts, that compose it, in order to discover their relation to each other.

* Really, Prepositions are Adverbs used as *connectives*.

35. Every complete sentence must contain : —

- a. A **Subject**, telling the person or thing that *is*, or *acts*, or *is acted upon*. It answers the question *Who?* or *What?*
- b. A **Predicate**, telling what is said of the Subject. In the sentence, "Brave soldiers fight with no thought of fear," *soldiers* is the Subject, and *fight with no thought of fear* is the Predicate.

36. The Subject must be a **Noun**, or the equivalent of a Noun.

In place of a Noun, as Subject, may be used : —

- a. A **Pronoun**; as, The man said that *he* would come.
- b. An **Adjective**; as, The *good* are happy.
- c. An **Infinitive** (3,c); as, *To err* is human.
- d. A **Clause** (41); as, *That he is my friend* is true; *Why he killed his friend* will always be a problem.
- e. **Any word or collection of words**, not a Noun, but of which something can be stated; as, *A* is a letter; *To* is a preposition; *+* is the sign of addition.

REMARK. Of course the *gender* of such subjects as those mentioned in c, d, e, must be *neuter*.

37. The Predicate must contain a **Verb**, since this is the only part of speech that can make a *statement*. The Imperative Mode may form a complete sentence, the Subject being understood. Verbs in other modes may form complete Predicates; as, *Dogs bark*; *Birds fly*; *It rains*.

- a. The verb *to be*, however, cannot (in its ordinary use) form a complete Predicate, as it does not *state* anything. *Snow is*, *Cesar was*, *The boy will be*, are not sentences, since each requires some word to complete its meaning. Such a word is called a **Complement**. A Complement of the first example would be the word *white*; of the second, *general* or *victorious*; of the third, *studious*. The forms *is*, *was*, *will be*, simply *connect* the subjects and the words which describe them. *To be* is therefore called a **Copula** (meaning *link*, *coupler*).
- b. Other verbs, besides *to be*, are used as Copulative Verbs. *To become*, *to appear*, *to seem*, are the most common of these; as, *He became* a hero; *The boy appeared (seemed)* honest.
- c. The Passive Voice of the verbs *to make*, *to choose*, *to call*, *to think*, and others of like meaning, has the same use (as Copulative Verbs); as, *I have been made (chosen, called, considered)* leader.

REMARK. An Adjective used after one of the verbs mentioned in *a, b, c*, modifies the Subject; and as the Copulative Verb has no more effect on the case after it than the sign =, a Noun following such a verb, defining or describing the subject, will be in the Nominative. As both the Adjective and Noun help to form the Predicate, they are called the **Predicate Adjective** and **Predicate Noun** (or **Nominative**).

d. The principles stated above will apply to any Noun or Adjective standing after an Intransitive Verb, but describing the Subject; as, He returned a *friend*, who came a *foe* (*friend* and *foe* being in the Nominative Case).

38. The principal elements (the Subject and Predicate) may be modified:—

a. By an **Adjective element**; that is, a word, phrase (43), or clause (41), which performs the office of an Adjective; as, A *wise* man (man *of wisdom*, man *who is wise*) will care for his health.

Under this head should be included any word, or collection of words, which may modify a Substantive; for example:—

A *Possessive Case*; as, The *boy's* book has been found.

An *Appositive* (46); as, We, the *people* of these United States, are free; The saying, "*Honesty is the best policy*," is an old proverb.

A *Predicate Noun* or *Adjective* (37, **REMARK**).

b. By an **Objective element**; that is, a word, phrase, or clause, used as an Object; as, He wishes *food* (or *to eat*); He says *that he must go*; They asked *what I had said*.

c. By an **Adverbial element**; that is, a word, phrase, or clause, that performs the duty of an Adverb; as, He runs *swiftly* (or *at full speed*); He will come *when he can* (or *to-morrow*).

39. An **Object** may be:—

a. *Direct*; that is, receiving the full effect of the action expressed by a Transitive Verb; as, He struck *me*.

b. *Indirect*; that is, showing the person or thing *to* (or *for*) *whom* (or *which*) anything is done, or happens; as, They told *him* (*to him*, Indirect Object) the *story* (Direct Object); Give *me* (*to me*) the *book*.

40. Sentences are divided, with respect to their *form*, into three classes: **Simple**, **Compound**, and **Complex**.

- a. A **Simple Sentence** expresses a single complete thought; that is, it contains but one Subject and one Predicate; as, Caesar wrote a history of his campaigns in Gaul.
- b. A **Compound Sentence** contains two or more Simple Sentences, each expressing an independent thought; as, Put not your trust in money, but put your money in trust; He exercises, therefore he is well.
- c. A **Complex Sentence** contains one Simple Sentence and one or more thoughts that are dependent upon it; as, Milton, who wrote "Paradise Lost," said that he did not educate his daughters in the languages, because one tongue was enough for a woman.

41. In Compound and Complex Sentences, each separate thought is called a **Clause**. A Compound Sentence, therefore, consists of two *Independent*, or *Principal*, Clauses; and a Complex Sentence contains one *Principal*, and one or more *Dependent* (or *Subordinate*) Clauses.

42. Dependent Clauses are either **Substantive**, **Adjective**, or **Adverbial**.

- a. A **Substantive Clause** is one that takes the place of a Substantive; that is, of a Noun or Pronoun. The use of such a clause, as *Direct Object*, is seen in the example (40, c), where *that he did not educate his daughters in the languages*, etc., is the Direct Object of *said*.
- b. An **Adjective Clause** performs the office of an Adjective. In 40, c, *who wrote "Paradise Lost,"* describes *Milton*, and is an Adjective Clause.
- c. An **Adverbial Clause** takes the place of an Adverb. The clause, *because one tongue*, etc. (40, c), is an Adverbial Clause expressing *cause*, and answering the question *Why?*

43. A **Phrase** is a collection of words, without Subject or Predicate, which may be used as an Adjective or Adverb; as, She had a voice of wonderful *power*, and sang *with great expression*. Phrases are of several forms; that most common is called a *Prepositional Phrase*, and consists of a Noun or Pronoun and a Preposition, which connects it with the word which is modified by the phrase; as, in the example under this section, in which *of power* is an Adjective Phrase (= *powerful*) modifying *voice*, and *with expression* (= *expressively*) is an Adverbial Phrase, modifying *sang*.

44. A Sentence, according to its *meaning*, may be :—

- a. Declaratory*, when it makes a *statement* ; as, It rains.
- b. Interrogative*, when it asks a *question* ; as, Does it rain ?
- c. Imperative*, when it expresses a *command* ; as, Let it rain ; Go.
- d. Exclamatory*, when it has the form of an *exclamation* ; as, How it rains !

SOME ELEMENTARY RULES OF SYNTAX.

Nominative as Subject.

45. A Noun or Pronoun, used as the Subject of a Finite Verb, must be in the Nominative Case.

Apposition.

46. A Noun or Pronoun, used to explain another Noun or Pronoun, and meaning *the same* person or thing, is put in the same case. This is called *Apposition* (meaning *near position*) ; as, Caesar, the *general*, addressed his soldiers, *men* tried in many conflicts.

Predicate Nominative and Adjective.

- a.* A Noun or Pronoun, used as the Complement of *to be* or any other Copulative Verb (37, *a, b, c*), describes the subject and must be in the Nominative Case. This principle is the same as Apposition, except that the descriptive Noun or Pronoun requires a Copulative Verb to connect it with the word which it modifies.
- b.* An Adjective, used as the Complement of *to be* or any other Copulative Verb, modifies the Subject.

REMARK. In general, it may be stated that —

c. An Intransitive Verb or a Passive form takes the same case after as before it.

Adjectives and Participles.

47. An Adjective or Participle (Verbal Adjective) must describe or limit some Noun or Pronoun.

Possession.

48. Possession must be expressed by the Possessive Case or by the Preposition *of* with a Substantive.

Direct Object.

49. The Direct Object of a Transitive Verb must be in the Objective Case; as, He obeyed the *law*.

This rule applies to Participles and Verbal Nouns (from Transitive Verbs), as well as to all ordinary forms of the verb; as, The man, seeing his *friend*, ran after him, shouting his *name*; Obeying the *law* is a citizen's duty; To preach *honesty* is one thing; to practise *it* is another.

Relative Pronouns.

50. A Relative Pronoun agrees with its Antecedent in Gender, Number, and Person; but its Case depends upon the form of its own clause; as, You have injured me, *who am* your friend.

Verb.

51. A Finite Verb agrees with its subject in Person and Number.

a. If there are several subjects, of different persons, the verb will be in the First Person, rather than the Second or Third, and the Second, rather than the Third; as, John, you, and I (that is, *we*) have finished *our* lessons; This gentleman and yourself (that is, *you*) have cast *your* votes.

b. A Collective Noun may take a verb in the Singular, when the body (or group) *as a whole* is spoken of; but when the *separate individuals* (or *objects*) are thought of, the verb must be Plural; as, A regiment of nine hundred men *was ordered* to charge; The council (that is, the members of it) *were* in doubt.

c. When a verb has two or more subjects in the Singular number, it will be: —

(1) Plural, if it agrees with them taken *together*; as, The master and his servant *have come*.

(2) Singular, if it agrees with them *separately*; as, Neither (either) the man nor (or) his servant *has come*.

The Independent Case.

52. The Independent Case has no grammatical dependence upon any word in the sentence; as, *Citizens*, behold your king; The *time* having arrived, we started.

The Infinitive as a Verbal Noun.

53. The Infinitive is often used as a Verbal Noun in the Nominative or Objective Case ; as, *To die* for one's country is noble ; He wishes *to see* you.

Some Peculiar Uses of the Objective Case.*

54. The Objective Case is used to express : —

1. The object *directly* affected by an action (39, *a*).
2. The object *indirectly* affected by an action (39, *b*).
3. The *space over which* the action, etc., extends ; as, He drove the horse *twenty miles* ; The house is *fifty feet* high.
4. The *time during which* the action or state continues ; as, He lived *fifty years* ; She was *nineteen years* old.
5. The *time when* (or *at which*) an event takes place ; as, He arrived (on) *the next day*.
6. The *amount* (or *degree*) *to which* the action or state is exerted ; as, He was injured *a great deal*.
7. The *amount* (or *degree*) *of difference* between two objects or actions ; as, He is *five years* older than I (that is, older *by* that difference) ; He is *a head* taller than John ; He ran *a great deal* faster than his brother ; He is not *one cent* richer.
8. The *place toward which* motion is directed ; as, I went *home* ; They desire to go *West*.
9. *Price* ; as, The book cost *two dollars*.

REMARK. The Objective Case, in Examples 3, 4, 5, 6, 7, has the force of an Adverb of Degree or Time, answering the question *How ? How much ? When ? How long ?* it is, therefore, often called, in such uses, the *Adverbial Objective*.

"It" and "There" as Introductory Subjects.

55. *It* and *There* are often used as *introductory subjects* (the real subjects following the verb) to give variety to the form of the sentence ; as, *It* is a law of war that might makes right (= *that might makes right* is a law of war).

The sentence, "*There* are five men there," means "*Five men* are there," and the first *there* has no particular value as a part of the sen-

tence. As they help to fill out the sentence, they are called *Expletives* (from a Latin word meaning *to fill out*). As they stand in the place of Substantives, they might be called *Expletive Pronouns*.

The Objective Case as Subject of the Infinitive.

56. The Infinitive Mode is often used to denote an *act*, and the Objective Case to denote the *actor*; as, He ordered *me to go*. Therefore the laws regulating the relations of Subject and Verb are these: —

- a.* The Subject of a Finite Verb (15, *e*) must be in the Nominative Case.
- b.* The Subject of an Infinitive must be in the Objective Case; as, I knew *him to be* a thief. Let *him (to) come*. Whom (predicate Pronoun) do you suppose *him to be*? I wish *him to go*. I heard the *bell (to) ring*.

REMARK. After *bid, dare, feel, see, let, make, need, hear*, the sign *to* is generally omitted with the Infinitive; as in the examples above.

INTRODUCTION

TO THE

LATIN LESSONS.

1. "THE Latin Language was the language of *Latium* (a district in Italy), of which Rome was the chief city. The conquests of the Romans caused it to spread over the rest of Italy, and over the greater part of France and Spain. The Latin Language is no longer spoken; but the French, Italian, Spanish, and Portuguese languages are mainly derived from it."

Alphabet.

2. The Latin Alphabet is the same as the English, except that it has no **w**. **K** occurs only in a very few words. **Q**, as in English, is always followed by **u**.

3. The letters are divided into Vowels (**a, e, i, o, u, y**) and Consonants. **J** and **v** are consonant forms of **i** and **u**.

4. There are several classes of Consonants, of which these are the most important:—

a. Liquids (**l, m, n, r**). They are called *Liquids* because they unite easily in sound with a preceding consonant, or *flow* smoothly after it. This is especially true of **l** and **r**, and these letters are therefore frequently called *semi-vowels*. The English words *able, betray, snow, small*, are examples of Liquids pronounced with other consonants.

b. H is not a consonant, but an *Aspirate* (that is, a *rough breathing* of the vowel following it).

c. Double Consonants (**x, z**). **X** = **cs, gs**; **z** = **ds**.

d. Mutes; so called because they are uttered without opening the vocal passage, therefore they are *voiceless*.

REMARK.* Mutes may be divided, (1) according to the organ by which their pronunciation is effected; (2) according to the degree of breathing employed; that is, they may have a *light* (or *sharp*) sound, an *intermediate* sound, or a *rough* sound.

According to the first division, they are called *Labials* (or *lip-letters*), *Palatals* (or *palate-letters*), and *Linguals* (or *tongue-letters*). According to the second division, they are called *Smooth*, *Middle*, and *Rough*. The table here given shows these two divisions:—

	LABIALS.	PALATALS.	LINGUALS.
Smooth Mutes,	p,	c (k, qu),	t
Middle Mutes,	b,	g,	d
Rough Mutes,	f (ph), v,	ch,	th.

5. A **Diphthong** (meaning "double sound") is the union of two vowel sounds in one syllable; as, *cau-sae* (Eng. *causes*). The most common Diphthongs in Latin are *ae*, *oe*, *au*; the least common are *eu*, *ei*, *ui*.

6. There are as many Syllables in a Latin word as there are single vowels or diphthongs. The English words *separate*, *accurate*; *miles*, *crates*, *more*, *persuade*, would be pronounced, as Latin words, *se-pa-ra'-te*, *ac-cu-ra'-te*, *mi'-les*, *cra'-tes*, *mo'-re*, *per-sua'-de*.

Pronunciation.

7. The Pronunciation of Latin differs in different countries. The two methods which are most commonly employed in American schools are the Roman and the English. These are presented in the next two sections.

Roman Method.

8. By the Roman Method, the letters have the following sounds:—

	LONG.	SHORT.
VOWELS.	ā as in <i>father</i> .	ă as in <i>idea</i> .
	ē as <i>ey</i> in <i>they</i> .	ĕ as in <i>net</i> .
	ī as in <i>machine</i> .	ĭ as in <i>verily</i> .
	ō as in <i>old</i> .	ĕ as in <i>obey</i> .
	ū as <i>oo</i> in <i>moon</i> .	ŭ as in <i>full</i> .
	Y has a sound between that of <i>i</i> and <i>u</i> .	

* The Teacher may omit this for the present, employing the statements here made concerning the Mutes for reference in the future. The Table will be very

REMARK. A short vowel made long *by position* (11, c) is pronounced short; but, before **nf** and **ns**, a short vowel becomes *long*, and must be pronounced as a long vowel.

DIPHTHONGS: **ae** like English *ay* (*yes*). **ei** as in *eight*.
oe like *oi* in *coin*. **eu** as *ew* in *few*.
au like *ow* in *how*. **ui** like English *we*.

CONSONANTS: **c, g**, always hard, as in *car, gun*.
j like *y* in *yet*; **s** sharp, as in *sale*.
t as in *tent*; **v** like *w* in *went*; **qu** as in *quart*.
bs, bt, like *ps, pt*; **ch** as *k*; **ph** as *f*.

English Method.

9. The letters have their ordinary English sounds. Notice, however, these Special Rules:—

1. Final **a**, in words of more than one syllable, sounds like final *a* in *America*; but in monosyllables (as **ā, dā, quā**) the long sound is usually given.

2. In **tibi** and **sibi**, the **i** in both syllables sounds like *i* and *y* in *fitly*.

3. **Es** final sounds like *ease*.

4. **Os** final (in the *plural*) sounds like *ose* in *dose*.

REMARK. In **post** and its compounds, **os** sounds like *ose*; but in *derivatives*, **o** is sounded *short*; as, **pos'te-rus**.

5. **Ae** and **oe** have the same sound as **e**; **au** is like *aw* in *saw*; in **huic** and **cui**, **ui** = *i* (as though these words were spelled *hike, ki*).

6. In such words as **Cāius, Pompēius, Aquilēia**, **i** sounds like *y*; as, *Pom-pē-yus, A-qui-lē-ya*.

7. **C** has the sound of *s*, and **g** the sound of *j*, before **e, i, y, ae, oe, eu**.

8. **Ch** is always hard (like *k*); as, **mach'-i-na**.

9. **T** and **c** (before **i**) often have, as in English, the sound of *sh*; as, **ra'-ti-o** (= *ra'-shĭ-o*). The hard sound is retained after **s, t**, and **x**; as, **jus-ti-or, Met'-ti-us**.

useful to the student in his study of the Verb, as showing that most of the consonant changes made result from interchange between mutes of the *same family*; as, **scriptus** (from *scribo*), **rectus** (from *rego*), etc.

Quantity.

10. In pronouncing the English word *quantity*, the second and third syllables are more hastily pronounced than the first; in other words, it takes more *time* to pronounce the first. This difference in the length or *quantity* of time required to pronounce different syllables was far more carefully observed by the Romans than it is by us.

In Latin, syllables are *long* (—) or *short* (∪). A long syllable requires twice as much *time* for pronunciation as a short one.

A syllable is called *long* or *short* as its vowel is long or short.

Rules of Quantity.

11. In many Latin words, vowels are long or short *by nature* (i. e. because the Romans made them so), and their quantity can be learned only by observation and practice. The following Rules of Quantity, however, decide the length of most syllables not long or short *by nature*:

a. Diphthongs are *long*; as, **Cāesar**, **āurum**.

b. A single vowel before another vowel is *short*. This is because, in Latin as in English, one vowel naturally “runs into” another, and loses its value as a separate letter; as, **impīus** (Eng. *impious*), **victōria** (Eng. *victorious*).

REMARK. This same law applies to a vowel before **h**, which was only a *breathing* (4, *h*); as, **prōhibēō** (so also, Eng. *prō(h)ibition*), **vēhō** (Eng. *vē(h)icle*), **nīhil** (Eng. *n(h)ilist*).

c. A vowel before two consonants (but see *d*) or a double consonant (**x**, **z**) is made *long*; as, **quāntus** (Eng. *quāntity*), **rēximus**, **gāza**. The same is true of a vowel before **j**; as, **ējus**.

This is owing to the distinct pronunciation of *both* consonants. A careless talker might pronounce the English word given above *quān'tity*, and thus shorten the time of the first syllable by not sounding both consonants.

REMARK. If, however, the second consonant is **h**, the vowel is *not* made long. For example, the quantity of the vowel in the negative particle **in** (Eng. *un*) remains short before **h** in the compound **inhonestus** (Eng. *dis(h)onorable*).

d. A vowel (naturally short) remains short,* when it is followed by a mute (4, *d*) with **l** or **r** (i. e. the mute must stand *before l* or

* TO TEACHERS. The author is convinced that the term *Common*, as usually applied to the quantity of a vowel thus placed, conveys little if any meaning

r); as, **āgrī** (from **āger**), **pātris** (from **pāter**), but **ācris** (from **ācer**), **mātris** (from **māter**). This is because l and r blend so easily with the preceding mute that the short vowel is really followed by one consonant *and a half*, i. e. a *semi-vowel* (4, *a*), and not by two full consonants.

REMARK. If, however, l or r is preceded by another l or r, the vowel is made *long*; as, **cārrus**.

e. A syllable formed by contraction is *long* (that is, it is *condensed*, and the two short syllables make a long one); as, **nīl** (for **nīhl**), **currūs** (for **currūs**).

12. Therefore a vowel may be:—

a. Short *by nature*; as, **mōneōr**, **pāter**.

b. Short *by position*; as, **monēor**, **trāho**.

c. Long *by nature*; as, **fēlix**, **māter**.

d. Long *by position*; as, **indēx**, **tēmpēstas**, **gāza**.

REMARK. Syllables whose quantity is decided by the rules given in section 11 will not be marked in this book. *All other syllables are to be considered short, unless they are marked long.*

Accent.

13. Accent is the special emphasis which a particular syllable of a word receives in pronunciation; as in the English *hap'py*, *secure'*, *qual'ity*. English accent is largely a matter of memory; for example, the following words of two syllables are derived from the same Latin Verb (**ferō**, *I bear*), yet some are accented on the first syllable, and some on the second: *suf'fer*, *in'fer*, *dif'fer*, *de'fer*. In Latin, Accent is determined by these simple laws: *—

a. In words of two syllables, always accent the *first*; as, **stel'la**, **de'us**.

b. In words of more than two syllables, always accent the *last but one*, if it is *long*; if *short*, accent the *last but two*; as, **am'icus**, **prōprāe'tor**, **dīlēx'it**, **tur'rībus**, **Jū'piter**, **ingē'nium**.

to the mind of a beginner; it should not be used in connection with his study of prose, but left for his consideration when he shall take up Latin poetry. The same remark will apply to final o, which will be marked *long*, except in the few instances where it is short.

* The accent as affected by an Enclitic is explained later; also that of Vocatives like **Mercuri**.

REMARKS. 1. The last syllable of a word is called the *ultima* (Eng. *ultimate* = *final*).

2. The last syllable but one is called the *penult* (meaning "almost the last." Compare Eng. *peninsula*, "almost an island").

3. The syllable before the *penult* is called the *antepenult* (i. e. *before the penult*).

Parts of Speech.

14. The Parts of Speech are the same in Latin as in English (2, page 1).

Inflection.

15. Inflection is a change made in the form of a word to show its different relations to other words.

a. In English, Nouns and Pronouns are inflected to show relations of *possession*, etc. This is called *Declension*. English Verbs are inflected to show different relations of *voice*, *mode*, *person*, etc. This is called *Conjugation*. English Nouns and Pronouns have very few changes of form. The Possessive Case is the only one that *always* has a special form. For instance, the words *fish*, *sheep*, may be Nominative or Objective, Singular or Plural. In the sentence "The king the slave in silence viewed," we cannot tell whether the king viewed the slave, or the slave viewed the king.

b. In Latin, there are *six* cases. Each has its own uses and meanings; so that, while the case of an English Noun or Pronoun can very often be decided only by the *sense* of the sentence, the case of these same parts of speech in Latin is almost always shown by its *ending*. Adjectives are inflected (that is, *declined*) in Latin, as well as Nouns and Pronouns. Latin Verbs are *conjugated*; their *endings* indicate *voice*, *person*, *number*, etc.

Stem.

16. The Stem of a word is that part from which its different cases, modes, tenses, persons, etc., are formed by inflection. It is the *trunk*, and the various forms are the *branches*.

Properties of Nouns.

17. In Latin, as in English, Nouns have Gender, Person, Number, and Case; but the laws of Gender and the number of Cases are somewhat different.

Gender.

18. The Gender of English nouns is decided by their meaning. So it is in Latin nouns, in the case of human beings and animals; that is, names of males are Masculine, and names of females, Feminine.

In many respects, however, the rules for the gender of Latin nouns denoting *things without life* are very different from the English rule.

The Gender of Latin nouns is decided in two ways, — by their *meaning* and by their *endings*.

The Rules that decide Gender by *meaning* are general, and apply to nouns of *all* Declensions.

The Rules that decide Gender by *endings* are special, and will be given with each Declension separately.

Rules for Gender according to Meaning.*

19. *These Rules apply to Nouns of all Declensions.*

- a. Names of *males, rivers, winds, and mountains*, are Masculine; as, **agricola** (*a farmer*), **Septentriō** (*the north wind*), **Arar** (*name of a river*), **Jūra** (*name of a mountain-chain*).
- b. Names of *females, countries, towns, islands, and trees* are Feminine; as, **mulier** (*a woman*), **Gallia** (*Gaul*), **Rōma** (*Rome*), **Dēlos** (*an island*), **Corinthus** (*a city in Greece*), **pirus** (*a pear-tree*), **Cyprus** (*an island*).

REMARK. There are exceptions to the above laws, which must be decided by the Special Rules for Endings. They can be learned only by observation and practice.

c. These are Neuter: —

1. Indeclinable Nouns (as, **nihil, fās**).
2. Infinitives, Phrases, Clauses, and other parts of speech used as Nouns. These are, of course, *indeclinable*, and would be regarded as Neuter in English, when used as Nouns (36, REM., page 10); as, *To err* is human (that is, a human *thing*). In the Latin for this sentence,

* This section may be omitted until the beginner shall have acquired a familiarity with the forms of Nouns and the use of the Cases. In the earlier lessons of this book, only those nouns are used whose gender is decided by the *English sense* (as **nauta, agricola**) and by the Special Rules (for gender by *endings*) given in connection with each Declension. Later, the General Rules will be required, and reference will be made to this section as well as to **NOTE 3**.

Errāre est hūmānum, the Adjective **hūmānum** is in the neuter gender, agreeing with the Subject **errāre**.

Cases.

20. Latin nouns have six Cases: *Nominative, Genitive, Dative, Accusative, Vocative, Ablative*. The following table tells: (1) The relation of each to other words in a sentence; (2) Its English equivalent; (3) What question it answers. Notice that what we express in English by a Preposition is very often indicated in Latin merely by a change in the ending of a word (Inflection).

<i>Latin Case.</i>	<i>Relation to other Words.</i>	<i>Like what English Case.</i>	<i>Answers what Question.</i>
NOMINATIVE.	Subject.	Nominative.	<i>Who? or What?</i>
GENITIVE.	Possession, or <i>Of</i> .	Possessive, or <i>Of</i> with Objective.	<i>Whose?</i> <i>Of { Whom?</i> <i>What? }</i>
DATIVE.	Indirect Object.	Objective with <i>To</i> or <i>For</i> .	<i>To { Whom?</i> <i>For { What? }</i>
ACCUSATIVE.	Direct Object.	Objective.	<i>Whom? or What?</i>
VOCATIVE.	Case of Address.	Independent.	Used in addressing a person or thing.
ABLATIVE.	Adverbial Phrases.	Objective with <i>By, From, In, With</i> .	<i>With { Whom?</i> <i>From { Whom?</i> <i>By { What?</i> <i>In { What?</i>

REMARK. Besides these there was a Locative Case, answering the question *Where?* Its form and use will be described hereafter.

N. B. It will be found very helpful to the class if the teacher will apply the above principles to the following sentences, showing what Latin case should be used to represent each Noun and Pronoun. The use of the Cases will be more clearly understood by such a practical application.

Exercise.

1. The troops of the enemy were overcome in one battle. 2. John's companion will not tell him the name of the farmer. 3. My friend, will

you give a tired man some supper and a room in which he can rest with comfort? 4. "Boys," said the teacher, "you have recited the morning's lesson well." 5. The man died from the effects of sunstroke. 6. This district is bounded by the river Garonne, the Atlantic, and the country of the Belgae. 7. I will keep these facts in mind. 8. He was treated with great kindness.

Declension of Nouns.

21. Latin Nouns have five Declensions. They are distinguished: —

1. By the final letter (or *characteristic*) of the Stem (16).
2. By the ending of the Genitive Singular.

The Declensions will be presented separately, beginning with the First.

TO TEACHERS.

In the following Lessons the author has not attempted to prescribe the exact amount to be assigned for each day's recitation. Classes differ so much in maturity and general preparation, that the individual teacher must use his own judgment as to the length of the daily lesson.

If any Lesson seems too long for a single exercise, it may, of course, be assigned in two or more portions, or some of the sentences may be omitted.

Various uses may be made of the "English into Latin" exercises : —

I. They may be assigned, one each day, as a regular part of the next recitation.

II. A few sentences only from each may be required.

III. The English exercises of two successive Lessons may form the material for the third day's recitation.

IV. The writing of these sentences may be made *work at sight*, to be performed in the class-room, allowing the pupil to consult the English-Latin Vocabulary for needed Latin theme-forms.

LATIN LESSONS.

EXPLANATION OF REFERENCES.

In this book, References are made : —

1. To sections of the Latin Grammars of Allen and Greenough (Revised Edition) and Harkness (Revised Edition of 1881), and to the Appendix (at the end of this book): for example, A. & G. 25; H. 37; App. 5.
2. To the NOTES (beginning on page 149 of this book). These, in the *headings* of the Lessons, are indicated thus: N. 35. In the Exercises, N. is omitted.
3. To other portions of the book (Lessons, etc.). These will explain themselves.

LESSON I.

FIRST DECLENSION OF NOUNS.

Learn N. 9, *a, b, c, d* (page 153); also N. 8 (1), (2), (5), (6), (8).

Learn the Declension (with English meanings) of **stella**, A. & G.

35; or **mensa**, H. 48; or **silva**, APP. 1.

Remember that all syllables for whose Quantity rules have not been given (11, page 20), and not marked long, are short.

Study each Latin word in the following Exercise so as to be able to give : —

1. Its Pronunciation.
2. The Quantity of syllables for which rules have been given.
3. Its Accent.
4. Its Stem and Gender.
5. Its Case and Number.
6. Its Meaning. If any form, as **viae**, can be found in more than one Case or Number, tell what these are, and give its meaning for each.
7. All the Case Endings of **stella** (6).

EXERCISE.

Special Vocabularies for the first 29 Lessons are given on pages 259 – 265. The Special Vocabularies must be so thoroughly learned by the student that, when questioned by the teacher, the English meaning can be given at once, when the Latin equivalent is stated, or the Latin word, when the English meaning is given.

1. Glōriārum. 2. Causa.* 3. Linguā. 4. Nautīs. 5. Viae. 6. Silvās. 7. Mensam. 8. Pecūniae. 9. Agricolīs. 10. Stellae. 11. Viā. 12. Victōriārum.

In each of the following English sentences, give the exact Latin equivalent for the words printed in *italics*; for example, *farmer's* = agricolae, Genitive Singular.

1. The *farmer's* garden contained a bed of *roses*. 2. That *sailor* has a good *memory*. 3. *Sailors*, you have won many *victories*. 4. We intrust many facts to the *memory*. 5. The *sailors* will win a *victory*. 6. The *farmers' tables* were bought *with money*. 7. He brought the *money from Rome*. 8. *Rome's glory* was great. 9. The *sailors' language* seems strange to the *farmers*.

LESSON II.

VERBS; THE SIMPLE SENTENCE; SUBJECT NOMINATIVE.

First Conjugation of Verbs: Present Indicative Active.
Learn: (1) N. 54 (entire), 56, 57, a. (2) The Conjugation of **amō**, in the Present Indicative Active, and the English meanings. A. & G. 128; H. 205; APP. 28.

The Simple Sentence. Learn N. 100, 102, 105.

Subject Nominative. Learn N. 118.

Agreement of the Verb with its Subject. Learn N. 117 (the simple Rule only).

* There is no Article (**a, an, the**) in Latin. **Causa** may mean *cause, a cause, or the cause*.

EXERCISE.

Translate these sentences, and apply all the principles given in the NOTES on this Lesson.

1. Vocāmus. 2. Puellae vocant. 3. Amat. 4. Pugnās. 5. Nauta pugnat. 6. Laudātis. 7. Vocō. 8. Agricola vocat. 9. Laudāmus. 10. Vocās.

Give the Latin for —

1. They are calling. 2. You (*plural*) fight. 3. The girl loves. 4. We praise. 5. You (*singular*) love. 6. The sailors fight. 7. He praises. 8. The girls call. 9. You (*singular*) praise. 10. The farmers are praising. 11. He does call. 12. The girl's memory.

General Questions.

What is the Stem of **mensa**? **via**? What is the Present Stem of **amō**? **vocō**? **laudō**? **pugnō**? What are the Personal Endings of the Present Tense? What Person does each represent? Is **vocāmus** a complete sentence? Why? Name the Present Stem and Personal Ending of each Latin Verb-form used in this Exercise (54, 3). In how many ways can you translate **amant**? What is a Simple Sentence? What must every Sentence contain? Decline **via**.

LESSON III.

SECOND DECLENSION OF NOUNS; DIRECT OBJECT.

Second Declension of Nouns (Masculine). Learn N. 10, *a, b, c*. Learn the Declension (with English meanings) of **servus**, **puer**, **ager**, **vir**. A. & G. 38; H. 51 & 4; APP. 2.

Direct Object. Learn N. 139.

EXERCISE.

Translate. Apply all the principles given in the NOTES on this Lesson and on Lesson II.

1. Magister puerōs laudat.* 2. Servī pugnant. 3. Puerī equōs

* In Latin, the Subject regularly stands first, and the Verb last (see 192).

amant. 4. Dant agrōs. 5. Puerōs vocātis. 6. Servum liberās. 7. Puer puellās vocat. 8. Amīcī amīcōs amant. 9. Agrīs. 10. Equōrum. 11. Serve. 12. Librō. 13. Virī. 14. Puer.

Give the Latin for —

1. The man frees the slaves. 2. The Romans fight. 3. O friend! 4. Of books. 5. I praise the boys' friends (120). 6. To the man. 7. The man's slave calls the boys. 8. Of a book. 9. With money. 10. For the slaves. 11. To the Romans' horses. 12. We praise the boy.

General Questions.

What is the Stem of **vir**? **servus**? **ager**? **puer**? Is this a true statement: "The Nominative and Vocative are always alike" (10, c)? What are the Case Endings of **equus**? **libor**? What Verbs can take a Direct Object in the Accusative? What are the Personal Endings of **liberō**? Decline, side by side, **equus**, **stella**; also, **ager**, **causa**. What Nouns of the Second Declension are Masculine? Name the Present Stem and Personal Ending of each Verb-form used in this Exercise.

LESSON IV.

SECOND DECLENSION OF NOUNS; FIRST AND SECOND DECLENSIONS OF ADJECTIVES.

Second Declension of Nouns (Neuter). Learn N. 10, *a*, *b*; 8 (3). Learn the declension of **bellum**, A. & G. 38; or **templum**, H. 51; or **dōnum**, APP. 2.

Adjectives of the First and Second Declensions. Learn N. 24 & *a*. Learn the Declension of **bonus**, **miser**, **niger**, A. & G. 81, 82; or **bonus**, **liber**, **aeger**, H. 148, 149, 150; or **magnus**, **liber**, **niger**, APP. 10 & *a*.

Agreement of Adjectives. Learn N. 108.

EXERCISE.

Translate. Decline the Nouns and Adjectives. Give the Rule for the agreement of each Adjective. Some of the Adjectives are not

in the proper form and must be corrected, with reasons for the corrections.

1. Puerī bonī.* 2. Equus nigrī. 3. Praemia parvum. 4. Virīs liberīs. 5. Servōrum miserōrum. 6. Dōnō magnā. 7. Silvae magnae. 8. Puellīs magnōs. 9. Templā magna Rōmānōrum. 10. Nautae aegrae. 11. Templī magnī. 12. Glōriam magnam amās.

Give the Latin for —

1. With small rewards. 2. Of good friends. 3. Of a great forest. 4. Large temples (*Accusative*). 5. Good friend (*Vocative*). 6. Sick farmers (*Nominative*). 7. By a great war. 8. The wretched slaves fight. 9. We call the black horses. 10. For the small boys.

General Questions.

What are the Stems of **miser**? **parvus**? Is final **a** ever *long*? Where? What Cases are always alike in Neuter Nouns? Decline, side by side, **equus**, **stella**, **bellum**; also, **ager**, **causa**, **dōnum**; also, **vir bonus**; also, **agricola bonus**; also, **bellum magnum**. Give the Latin for: *You praise*; *We fight*; *He gives*.

LESSON V.

APPOSITION; GENITIVE CASE.

Apposition. Learn N. 106.

Genitive Case. Learn N. 119 and CAUTION. **Genitive denoting Possession.** Learn N. 120.

EXERCISE.

Translate. Decline the Nouns and Adjectives, and give the Rules for their Case and Gender. Conjugate the Verbs; give the Stem and Personal Endings of each; give the Rule for their agreement. Analyze each sentence according to N. 194, a.

* The Adjective regularly follows its Noun (193, 1).

1. Genēvam, oppidum magnum, occupant. 2. Germānī agrōs Gallōrum * vastant. 3. Sabīnus lēgātus Gallōs superat. 4. Oppida magna occupās. 5. Titum, amicum Sabīnī, laudātis. 6. Agrum agricolae vastāmus. 7. Puer gladium Titī lēgātī portat. 8. Titus et Sabīnus oppidum Genēvam occupant (117, a). 9. Librōs magistrī portās. 10. Virī equōs agricolārum laudant. 11. The temples of the Romans are long and high.

General Questions.

What is the difference between an Appositive and a Predicate Noun? Pronounce these words, and give the reason for the *accent* of each: **agricolae, mensam, servōrum, magister, praemia, stellārum, amicos, victōriis.**

LESSON VII.

VERBS: DEFINITIONS; FIRST CONJUGATION (*continued*).

Transitive and Intransitive; Voice; Number; Person; Mode, — Indicative; Tense, — Present, Imperfect, Future; Personal Endings; Conjugation and Present Stem; Formation of Tenses. Learn N. 56; 57 & a; 60, 61, 1, 2; 63, a; 64 & a (*Active Endings*); 65; 68, a, b, c; 117 & a.

Learn the Conjugation (and English meanings) of the **Present**, **Imperfect**, and **Future Indicative, Active**, of *amāre*. A. & G. 128; H. 205; APP. 28.

EXERCISE.

Translate. Analyze each Verb-form. Conjugate the Tense in which each is found.*

1. Servum vocās; servōs vocātis. 2. Puerum laudābās; puerōs laudābātis. 3. Pugnābis; pugnābitis. 4. Vir vocat; virī vocābant. 5. Oppidum occupābimus. 6. Amābit; amāmus; amābat. 7. Amātis; amābis; amābāmus. 8. Portābō; portābitis; portābam. 9. Titus agrōs Germānōrum vastābat. 10. Occupābitis oppida. 11. Bonus est, et virōs bonōs amābit. 12. Titus et Sabīnus lēgātī pugnābunt. 13. Cōpiās Gallōrum superābās. 14. Amīcōs virī vocābit.

Give the Latin for —

1. He calls; he will call; we call; they used to call. 2. You (*plural*) were carrying; they will carry; we carry; he is carrying. 3. You (*singular*) fight; you (*plural*) will fight; you (*singular*) do fight; we shall fight. 4. The dangers are many and great. 5. The temple is small. 6. We are free. 7. You (*singular*) are a lieutenant. 8. You (*plural*) are slaves.

General Questions.

What is Mode, and what does it show? (15 & a, page 3.) What is Tense, and what are the three divisions of time? (16, page 4.)

* In the First and Second Conjugations, any form in the

Present Indicative = Present Stem + Personal Ending (54, 3).

Imperfect Indicative = Present Stem + Tense Sign (ba) + Personal Ending.

Future Indicative = Present Stem + Tense Sign (bi) + Personal Ending (68 c).

LESSON VIII.

VERBS: PRINCIPAL PARTS AND STEMS. NOUNS: DECLENSION OF **FILIA** AND **DEA**.

Principal Parts. Learn N. 66.

Stems. Learn N. 65, 67.

Declension of **filia** and **dea**. Learn N. 9, *e*.

General Questions and Practice.

How many *Principal Parts* has a Regular Verb? Why are they so called? What name is given to each? How many *Stems* has a Regular Verb? What are they called? How is the Present Stem found? The Perfect Stem? The Supine Stem? From which Stem is the Imperfect Indicative formed? The Future Indicative? Give the *Principal Parts* of the Verbs contained in the Special Vocabulary for this Lesson. Give the *Stems* of the same Verbs. Conjugate the Present, Imperfect, and Future Tenses of each.

Decline **filia**; **dea**. How do they differ from other Nouns of the First Declension?

Analyze these forms, and *prove* the Tense, Person, and Number: **amābitis**; **narrās**; **vastābant**; **vocātis**; **dabimus**; **liberābās**; **servābunt**; **monstrābāmus**; **pugnābō**; **dās**; **portābis**.

Give the Latin for —

1. O goddesses; of goddesses. 2. To a daughter; to the daughters. 3. The daughter's book is large. 4. The girls love the lieutenant's daughters. 5. For the goddesses; the temples of the goddess. 6. The wall is high; the walls are long.

General Review.

What Nouns of the first Declension are Masculine? Of what gender are the others? What Nouns of the second Declension are Masculine? Neuter? Give the stem of **dōnum**; **via**; **puer**; **magister**; **vir**. Decline together: **puer**, **silva**, **dōnum**; also, **vir magnus**; also, **equus niger**. What is the regular position of an Adjective? of a Subject? of a Genitive? of a Verb? Why is **sum** called a *Copula*? Can **sum** take an Accusative as Object? What is the Noun or Adjective after **sum** called? Why? Review the Vocabularies of Lessons I., II., III., IV., V., VI.

LESSON IX.

VERBS (*continued*); DATIVE CASE.

Learn N. 61, entire ; 64, *b* ; 67 ; 68, *d, e, f*. (N. 62 may be learned or omitted, as the teacher may desire.)

Learn the Conjugation of the **Perfect, Pluperfect, and Future Perfect Indicative, Active**, of *amō*. A. & G. 128 ; H. 205 ; APP. 28.

Dative of Indirect Object. Learn N. 129.

EXERCISE.

Translate. Analyze each Sentence. Analyze each Verb-form ; conjugate its Tense. Give a Synopsis (78) of each Verb, in the Indicative Mode. Give the Principal Parts and Stems of each Verb.*

Notice that dō is unlike other Verbs of this Conjugation, as it has ã (not ā) when it takes an additional syllable ; as, dāmus, dābis (but amāmus, amābis).

1. Servum vocāvistis. 2. Oppidum servāverat. 3. Oppida occupāverimus. 4. Cōpiæ Titī Gallōs superāvēre. 5. Viam monstrāvit. 6. Fābulam narrāverās. 7. Puerō librum dedistī. 8. Virīs frūmentum dederit. 9. Servō gladium dedit. 10. Puer nautīs fābulam narrābit. 11. Puerīs attentīs fābulās narrāvērunt. 12. Amīcus præmium magnum nōn dederat. 13. Puellīs viam monstrāvimus. 14. Cōpiīs pecūniam nōn dabātis. 15. Injūriæ Gallōrum multæ sunt.

Give the Latin for —

1. The teacher will give the attentive boy a book. 2. He has told his (*omit*) friend a good story. 3. Many Germans overcome

* In the Indicative Mode, of all Conjugations, the **Perfect Tense** = Perfect Stem + the Personal Endings (of the Perfect Indicative; 64, *b*).

Pluperfect Tense = Perfect Stem + the Tense Sign (*era*) + the Personal Endings.

Future Perfect Tense = Perfect Stem + the Tense Sign (*eri*) + the Personal Endings (68, *f*.)

large forces of the Gauls. 4. The lieutenants, Titus and the friend of Sabinus, will have seized the town of Geneva. 5. He had carried; we were carrying; you (*plural*) have carried. 6. LESSON X.

VERBS: FIRST CONJUGATION; SUBJUNCTIVE MODE.

Learn N. 63, *b*; 69, *a* (1), *b*, *c*, *d*.

Learn the Conjugation of the *Subjunctive Mode, Active Voice*, of *amō*. A. & G. 128; H. 205; APP. 28.

REMARK. In this Lesson the meanings of the Subjunctive Mode are not required; but numerous Latin forms are given for practice in analysis of the verb. The *use* of the Subjunctive is presented later (Lesson XXI.).

EXERCISE.

*Tell the Mode, Tense, Number, and Person of each word. Prove your answers by analyzing * each Latin form.*

1. Dēs; dederis; dedissētis; darent. 2. Amāverit; amētis; amāvissēs; amārēmus. 3. Portās; portēs; portārēs; portābis. 4. Pugnēmus; pugnābās; pugnāvissēmus; pugnāverimus. 5. Narrēt; narrāret; narrābat; narrāverit. 6. Laudārēmus; laudābimus; laudāvissent; laudāvistis. 7. Servāverās; servāvēre; servēs; servārētis. 8. Vocāvit; vocāvisset; vocābunt; vocāverint.

* In the Subjunctive Mode of the First Conjugation, the Tenses contain these elements:—

Present Subjunctive = Present Stem (*a* changed to *e*) + Personal Endings.

Imperfect Subjunctive = Present Stem + Tense Sign (*re*) + Personal Endings.

Perfect Subjunctive = Perfect Stem + Tense Sign (*eri*) + Personal Endings.

Pluperfect Subjunctive = Perfect Stem + Tense Sign (*isse*) + Personal Endings.

General Questions.

What questions does the Direct Object answer? the Indirect Object? What Tenses does the Subjunctive lack? Name the Tenses of the Indicative. How does the Imperfect Indicative differ in meaning from the Perfect? Translate **vocābās**; **vocāvisti**. What two meanings may **vocāvisti** have? What names are given to the Perfect Tense? How many Tenses are there in the Indicative differing in *form*? How many differing in *meaning*? How do the forms of the Perfect Subjunctive differ from those of the Future Perfect Indicative? Give a Synopsis of the Indicative and Subjunctive, Active, of **narrō**; **dō**.

LESSON XI.

FIRST CONJUGATION: IMPERATIVE MODE; VOCATIVE CASE.

SECOND DECLENSION: **FILIUS** AND PROPER NAMES
IN **IUS**.

Learn N. 57, c; 63, c; 64, c (Active Endings); 70; 100.

Learn the Conjugation of the *Imperative Active* of **amō**. A. & G. 128; H. 205; APP. 28.

Vocative Case. Learn N. 145.

Learn the Declension of **filius**, and also of Proper Names in **ius**; as, **Cassius**, **Manlius**. N. 10, d, e.

EXERCISE.

Translate. Analyze each Sentence. Analyze each Verb-form (64, c). Give Rule for the use and form of each word.

1. Virōs bonōs amāte. 2. Tite, oppidum occupā. 3. Mī * fili, agricolam vocā. 4. Filius meus servum vocat. 5. Concilium, Cāi, magnum est. 6. Proelium, Sabīne, nuntiā. 7. Pugnātō; pugnātō; pugnātōte. 8. Proelia, mī amīce, multa et magna sunt. 9. Auxilium deārum nōn parvum est. 10. Cōpiaie Cassī (10, e) magnae sunt. 11. Cōpia frūmentī parva est. 12. Date, virī,

* **Meus** has **mī** (not **mee**) in the Voc. Sing. Masc. In the other forms it is like **bonus**.

frūmentum equīs. 13. Meam patriam, Jūli, servā. 14. Equī Jūli albī sunt. 15. Conciliō, puerī, fābulam narrāte. 16. Amātō; laudantō; vocātōte.

Give the Latin for —

1. Fight, my men. 2. My men fight. 3. O Pompey, save the towns. 4. My son, give the money to the daughters of Cassius. 5. Marcus and Caius are good men. 6. Call the slaves, Marcus. 7. The lieutenants, Cāius and Cassius, have seized the town of the Germans. 8. Sabīnus, my friend, the rewards of the battle are great.

General Questions.

What Stem does the Imperative contain? What can you say of the use of the Future Imperative? How does **Cassius** differ in declension from **servus**? How does **meus** differ from **bonus**? Give the Vocative of **Marcus Tullius**; **Lūcius Cotta**.

LESSON XII.

FIRST CONJUGATION: INFINITIVES, PARTICIPLES, GERUND, AND SUPINE.

Learn N. 57, *d*; 58, *a* & REMARK; 59, *a, b*; 63, *d*; 71; 72.

Learn the *Active Infinitives, Participles*, also the *Gerund* and *Supine*, of **amō**. A. & G. 128; H. 205; APP. 28.

General Questions and Practice.

Give the Stem and Ending of the Present Infinitive, also of the Perfect Infinitive. Do Infinitives have Personal Endings? Give the reason for your answer (15, *e*, page 4). Of what forms is the Future Infinitive composed? What Stem does it contain? Give the Stem and Ending of the Present Participle of **amō**; **liberō**; **vocō**. The same Participle in English ends in what letters? What Active Participle is found in English, but not in Latin? (*Ans.* The Perfect; as, *having loved*.) What Stem does the Future Participle contain? Give its ending. What is a Participle (189)? To what Declension of Adjectives does the Future Participle belong? Does the Present Participle belong to that Declension? Why not? Describe the Gerund; the Supine.*

* The meaning and use of the Supine are taken up later.

In the following sentences, give the exact Latin equivalents for words printed in *italics* : —

He fell, *fighting* bravely. He wishes to *seize* the town. We are said to *have praised* the slave. He is thought to *be about to fight*. You (plural) are *desirous* (*cupidus*) of *fighting*. Titus will *overcome by fighting*. He pays (*dō*) *attention* (*opera*) to *fighting*.

Give a complete Synopsis (78) of *vastō*; *vocō*; *dō*; *liberō*, in the Active Voice.

The following Verbs belong to the First, Second, Third, and Fourth Conjugations. The Roman Numeral at the left of each indicates its Conjugation. Their Principal Parts are given, and, in answering the questions below, precisely *the same Rules* for Stems, Formation of Tenses, etc., are to be applied, as for *amō*. (See N. 67, 68, 69, 70, 71, 72.)

	PRESENT INDICATIVE.	PRESENT INFINITIVE.	PERFECT INDICATIVE.	SUPINE.
I.	servō,	servāre,	servāvī,	servātum.
II.	moneō,	monēre,	monuī,	monitum.
III.	regō,	regere,	rexī,	rectum.
IV.	audiō,	audīre,	audīvī,	audītum.

Questions and Application of Principles.

Give all the Stems of these Verbs (65, 67). Conjugate the Imperfect Subjunctive of each; the Perfect Indicative; the Perfect Subjunctive; the Pluperfect Subjunctive; the Pluperfect Indicative; the Future Perfect Indicative. Give all the Infinitives of each.

Conjugate the Present Indicative of *moneō*; the Imperfect Indicative; the Imperative; the Future Indicative.

What is the Present Imperative, Second Person Singular, of *regō*? *audiō*? What is the Present Participle of *servō*? *moneō*? *regō*? Give the Gerund of *servō*; *moneō*; *regō*.

Give the Supine forms of the four Verbs.

How may the Imperfect Subjunctive Active of all Conjugations be found? (69, b.)

LESSON XIII.

DECLENSION OF **DEUS**; IRREGULAR ADJECTIVES: GENITIVE IN **IUS**, DATIVE IN **Ī**.

Learn the Declension of **deus**, N. 10, *f*.

Learn the list of Adjectives having **ius** in the Genitive, and **ī** in the Dative, N. 43, *a, b*. Decline them. A. & G. 83, *a, b*; H. 151; APP. 11.

General Questions.

What is the Vocative Singular of **servus**? **deus**? What is the Nominative Singular Neuter of **malus**? **alius**? Decline together the Masculine of **bonus** and **alius**; the Feminine; the Neuter. How does **alter** differ from the others in declension? (*Ans.* The **i** is *short* in the Genitive; as, **alte'rius**, but **utrius**, **alius**.) How does **alter** differ in meaning from **alius**? (*Ans.* **Alius** means *another*, of several; **alter**, *the other*, of two.) Decline together the Latin for *no god*; *any boy*; *another gift*; *the other sailor*; *one daughter* (in the singular); *the other son*; *no way*; *the whole town* (in the singular). What is a Diphthong? Pronounce **deae**; **neuter**; **coelum**.

EXERCISE.

Translate. Decline the Nouns and Adjectives. Conjugate the Verbs.

1. Alii viri templa aedificant. 2. Injūriæ alterius viri multae sunt. 3. Victōriæ ūnūs lēgātī nōn multae sunt. 4. Nulli agrī Germānōrum vacant. 5. Nātūra amicō meō vītā longā nōn dedit. 6. Equī neutrius servī nigrī sunt. 7. Occupāte, virī, tōtum oppidum. 8. Nulli poētae * Cāium laudābunt. 9. Aliud templum altum est. 10. Laudā, Cassī, servōs sōlōs. 11. Nuntiā, Marce, proelium Cāiō sōlī. 12. Amīcī meī, poētae fābulam narrābimus.

* The mark (·) is called a *Diaeresis*, and shows that the vowel over which it is placed does *not* form a Diphthong with the preceding vowel. **Poēta** is pronounced **po-ē'-ta**.

Give the Latin for —

1. Of other gods; to one god. 2. For the goddesses alone.
3. Of any aid; for no aid. 4. The life of the other horse is long.
5. The Romans alone give aid to the Gauls. 6. Julius, the Germans will seize the whole town of Geneva.
7. The glory alone of the war is great. 8. The stars alone are bright.
9. Other forces will fight. 10. We show (point out) the dangers of one battle.

LESSON XIV.

NOUNS: THIRD DECLENSION; ELEMENTARY PRACTICE.

REMARK. Nouns of the Third Declension have a great variety of forms in the Nominative Singular; but their Case-endings follow the same law (N. 6). These nouns are Masculine, Feminine, and Neuter; but as their gender depends largely upon their Nominative *endings*, and as there are over *twenty* different endings in the Nominative, the Gender of nouns in the Third Declension is not so easily distinguished as in the other Declensions.

The Stems of nouns in the Third Declension have various endings; and this fact is apt to present some difficulty to the beginner.

In this Lesson, eight nouns are given for practice: three Masculine, two Feminine, three Neuter. Their Gender can be easily remembered by their *meaning*. The Stem of each can be found by cutting off the ending **is** from the Genitive Singular; as, **milit-, nōmin-, rēg-** (stems of **miles, nōmen, rex**). English words derived from the Latin are given to show that *the Latin Stem is often found in the English word*, and so to aid the pupil's memory.

Learn the **REMARK** at the head of this Lesson.

Learn **N. 6** (for the Third Declension); **8** (1), (2), (3), (4), (5), (6).

Learn the Declension of **consul, mīles, rex, virgō, soror, caput, nōmen, corpus**. A. & G. **46, 49**; H. **58, 59, 60, 61**; APP. **3, 4**.

EXERCISE.

Translate. Decline the Nouns and give their Stems. Conjugate the Verbs.

1. **Lēgātus mīlitēs consulis laudāvit.** 2. **Soror rēgis virginem**

laudābit. 3. Caput equī magnum est. 4. Corpora virōrum magna sunt. 5. Miles rēgi proclium nuntiāverat. 6. Filii rēgum malī sunt. 7. Filiae Titī lēgātī virginem timidam vocāvēre. 8. Amāte, puerī, sorōrēs.* 9. Consulēs oppidīs nōmina dederint.

Give the Latin for —

1. To the kings; the king's; the kings' horses. 2. For the consul's sisters. 3. With the bodies of the soldiers. 4. The maiden's sister's name. 5. O sister; the consul's soldiers. 6. For the body of the horse. 7. The boy's head is small. 8. My friend's sisters are praising the consul's daughters.

General Questions.

What is the Stem of miles? caput? virgō? rex? soror? consul? corpus? nōmen? What are the Case-endings of a Masculine or Feminine noun? of a Neuter noun? In what Cases will the endings vary with different nouns? (*Ans.* Nominative and Vocative Singular.) What Cases are always alike in Neuter nouns of all Declensions?

LESSON XV.

NOUNS: THIRD DECLENSION; GENERAL PRINCIPLES; GENDER.

General Principles. Learn N. 1 & (2), (3), (4), *a*; 2 (1), (2), (3), (4); 11 (entire); 12 (entire); 13 (entire); 14.

Rules of Gender. Learn the Nominative Gender Endings of Nouns of the Third Declension. N. 4 (3).

Questions and Practice.

The answers to these questions are given in the NOTES on this Lesson, and in the Examples under them.

Into what two classes are nouns of the Third Declension divided (11)? What is the Genitive Plural of the nouns whose stems are milit-, nāvi-,

* The possessive words, *my, your, their*, etc., are not expressed in Latin when they can be readily supplied from the general meaning of the sentence.

jūdic-, **rég-**, **aetāt-**, **custōd-**, **lapid-**, **turri-**, **virgin-**, **capit-**, **nōmin-**, **corpor-**? Give the Nominative Singular of each. What changes of consonants or vowels appear in them? Why is not the Genitive Singular of **corpus**, **corporis**? What is meant by "increasing in the Genitive" (15)? What is an *abstract* noun? a *collective* noun?*

In the following list of nouns, the Nominative and Genitive Singular of each are given; tell the Gender of each noun, and give the reason:—

Aestās (**aestātis**), **opus** (**operis**), **lux** (**lūcis**), **ōrātiō** (**ōrātiōnis**, *a speech or speaking*), **honor** (**honōris**), **animal** (**animālis**), **turris** (**turris**), **leō** (**leōnis**), **calcar** (**calcāris**), **mōs** (**mōris**), **virtūs** (**virtūtis**), **tempus** (**temporis**), **agger** (**aggeris**), **nūbēs** (**nūbis**), **obses** (**obsidis**), **mare** (**maris**), **legiō** (**legiōnis**, *a legion*), **pater** (**patris**), **palūs** (**palūdis**), **trāmes** (**trāmitis**), **pax** (**pācis**), **rex** (**rēgis**), **onus** (**oneris**), **cīvitās** (**cīvitātis**), **altitūdō** (**altitūdinis**, *height*), **caput** (**capitis**), **urbs** (**urbis**), **nōmen** (**nōminis**), **rūpēs** (**rūpis**), **flōs** (**flōris**), **genus** (**generis**), **consul** (**consulis**), **custōs** (**custōdis**), **soror** (**sorōris**), **nox** (**noctis**), **hostis** (**hostis**, *an enemy*), **vectīgal** (**vectīgālis**).

Decline the nouns whose stems are: **aetāt-**, **lūc-**, **custōd-**, **virtūt-**, **lapid-**.

LESSON XVI.

NOUNS: THIRD DECLENSION; CONSONANT-STEMS.

Review all the NOTES at the head of Lesson XV.

Learn Section 4, *a*, *d* (omitting the REMARK), page 17. Learn, also, N. 15 & *a*, *b*, REMARK.

Learn the Declension of all the Nouns given in A. & G. 46, 49; or H. 57, 58, 59, 60, 61; or APP. 3, 4.

* An *abstract* noun is the name of a *quality* (as, *height*, *bravery*, *greatness*, *goodness*, etc.), or of an *action* (as, *siege*, *running*). A *collective* noun is defined in section 3, *d*, page 1.

TO THE STUDENT. Remember that, to inflect a noun of the Third Declension, two things must be known: 1. its *Genitive Singular* (which will show the *Stem*); 2. its *Gender*. Remember, also, that the Stems of Latin words are very often found in English words derived from them; this fact is of great value as a means of aiding the memory, as has already been said. Many such may be found in the Latin words used in this Lesson and Lesson XIV.; as, FLOR-AL (flōr-, stem of flōs); CAPIT-AL (capit-, stem of caput); PRINCIP-AL (princip-, stem of princeps).

General Questions and Practice.

Decline each of the following nouns side by side with the proper form of the adjective. First decide the gender of the noun, and make the adjective agree with it in gender. The Genitive forms of the nouns are given in Lesson XV. and in the Vocabulary for this Lesson.

Aestās longus. Opus magna. Lux clārum. Honor magnus. Leō parva. Mōs bonum. Longitūdō magna. Virtūs magnus. Tempus longa. Legiō nullus. Pater bona. Rex misera. Cīvitās ulla. Caput alius. Nōmen sōlus. Flōs alba. Consul aegrum. Custōs ūnus (*in singular*). Soror beātus.

What Consonants are called *Liquids*? Why? What Mutes suffer some change before *s*? Do nouns having *consonant-stems* increase in the Genitive? How do *pater*, *māter*, *frāter* differ from the other nouns of this class?

EXERCISE.

Translate. Decline the Nouns and Adjectives. Conjugate the Verbs. Give the Stem of each Noun. Tell how the Nominative Singular is formed from the Stem.

1. Flōrēs albī sunt. 2. Altitūdō mūrī magna est. 3. Patrī puerī librum dedit. 4. Consulēs opus mīlitum laudāverant. 5. Mōrem malum nōn laudābimus. 6. Soror rēgis filiābus consulum flōrēs dat. 7. Virtūs rēgum nōn parva est. 8. Nōmina flōrum multa sunt. 9. Principēs * beātī sunt.

Give the Latin for —

1. To the guards of the gates. 2. In width of fields. 3. Of

* The Gender is often decided by the *sense*, without regard to the Nominative ending.

the king's soldiers. 4. By the great height of the wall. 5. To my brothers' bravery. 6. The honors of a good man are great. 7. The light of the stars is bright. 8. The king praised my father; he will not praise my mother. 9. The leaders of the Gauls will have laid waste the whole town.

LESSON XVII.

NOUNS: THIRD DECLENSION; VOWEL-STEMS.

Learn N. 16, entire; 17, entire.

Learn the Declension of the Nouns given under one of these References: A. & G. 52; H. 62, 63; APP. 5.

Mixed Stems (consonant-stems in the Singular, vowel-stems in the Plural). Learn N. 18. Learn the Declension of **urbs** and **nox**, A. & G. 54; or of **urbs** and **arx**, H. 64; or of **urbs**, **mons**, **nox**, APP. 6.

Questions.

Do nouns having *i*-stems increase in the Genitive? Do those having *consonant-stems*? How do nouns (*vowel-stems*) usually form the Nominative Singular from the Stem? What nouns do not? What vowel change is very common? Give the Nominative Singular endings of nouns of this class. What nouns have *i* as the *regular* ending in the Ablative Singular? What nouns have *e* or *i*? What nouns *seem* to increase in the Genitive? Explain this? What is the Genitive Plural of **pars**, **nox**, **mons**, **urbs**? Why? What name may be given to the stems of these nouns? What three classes of stems may nouns of the Third Declension have? [Ans. I. *Consonant* (Mute or Liquid); as, **milit-**, **rég-**, **virgin-**, **corpor-**: II. *Vowel* (*i*); as, **nāvi-**, **nūbi-**, **animāli-**: III. *Mixed*; as, **urb-**, **mont-** (Singular); **urbi-**, **monti-** (Plural)]. What nouns, in common use, are Masculine, contrary to the Rules of Gender (19, a)?

EXERCISE.

Translate. Decline the Nouns and Adjectives. Analyze the complete Sentences.

1. Custōdēs leōnum timidī sunt. 2. Principēs et ducēs Gallōrum puguāvērunt. 3. Montēs et collēs Galliae altī sunt. 4.

Nautae mare et nāvēs amant. 5. Numerus hostium magnus est. 6. Dux hostium finēs rēgis vastāverat. 7. Calcāria ducis acūta sunt. 8. Partem urbis occupant. 9. Multa animālia pulchra sunt. 10. Custōs turris amīcus meus est. 11. Monstrā, Tite, montem. 12. Altitudīne montium. 13. Animālium magnōrum. 14. Pars nāvium; nāvēs multae. 15. Montēs altōs; maris altī. 16. Vectīgālī magnō; noctium longārum.

Give the Latin for —

1. Of taxes; by towers; of the hills; to the leaders of the enemy. 2. Soldiers, lay waste the Germans' territory. 3. By fire; of fires; for a part of the city. 4. By the sea; of many seas; O beautiful city; O lofty mountains. 5. By a great cloud; O my father; by a bad custom. 6. The bodies of many animals. 7. Save the city, Cāius.

Decline, side by side, the Latin words meaning —

The deep sea; a great tax; a lofty mountain; a great citadel; a good custom; a small body.

LESSON XVIII.

THE VERB **SUM**: GENERAL PRACTICE.

Learn N. 55, 83, 84 & a, b, c.

Learn the entire Conjugation of **sum**. A. & G. 119; H. 204; APP. 40.

Questions and Practice.

How many stems has **sum**? What are they? What forms are lacking in its conjugation? Give a complete Synopsis of **sum**. Why is not the Imperfect Indicative **esam**, and not **eram**? What is Mode? Tense? How many meanings has **fui** ? By what two names is this tense-form called? Why is **sum** called a *Copula*? What is the Noun or Adjective after it called? Why? Tell where these forms are found: **este**; **fuerātis**; **sitis**; **estis**; **fuissēmus**; **fuerit**; **fuisti**; **essēs**; **futūrus**; **erātis**; **sis**; **es**; **fuere**; **suntō**.

Give the Latin for —

1. The cities were great. 2. Caius and Marcus will be good leaders. 3. The forces of Pompey, the leader of the enemy, are great. 4. You are a good man, Marcus. 5. My brother had been a teacher. 6. Father, show the boy (129) the beautiful gifts. 7. Boys, be attentive. 8. The flowers are white and beautiful. 9. The example of the consul was bad. 10. The mountain is high. 11. The legions of the enemy will have seized the city of Rome. 12. The number of states will be great. 13. We have been good lieutenants of good soldiers. 14. Men, give corn to the horses. 15. You (*plural*) will have been timid. 16. The leaders have praised and will praise the legion. 17. My son, be good.

LESSON XIX.

THE VERB **POSSUM**; USE OF THE INFINITIVE.

Learn N. 1 (4) *b*; 85, 1.

Learn the Conjugation of **possum**. A. & G. 120; H. 290, II.; APP. 41.

Infinitive as Complement. Learn N. 165, *b*; 173, CAUTION.

TO THE STUDENT. *Can* and *could* must always be expressed by **possum**.

EXERCISE.

Translate. Apply Rule for the use of each word. Examples on Page 262.

1. Urbēs Gallōrum expugnāre nōn poterimus. 2. Caesar castra servāre nōn potuit. 3. Militibus arma dare potueris. 4. Jūdex injustus esse potest. 5. Militēs ducis bonī ignāvī esse nōn possunt. 6. Servus virō frūmentum dare poterat. 7. Noctēs longae esse nōn possunt. 8. Arcem expugnāre potuerātis. 9. Castra Caesaris longa et lāta sunt. 10. Partem hostium superāre potuistī. 11. Date, ducēs, arma virīs.

Give the Latin for —

1. We can fight; you (*singular*) could fight. 2. You (*plural*) could have overcome Titus, the leader. 3. He will not be able to seize the mountain. 4. The keepers could not free the animals. 5. The width of the camp cannot be great. 6. We consuls (106) had not been able to overcome Caesar's forces. 7. No soldiers of the king can be cowardly. 8. The leaders' arms were many and great.

Questions and Practice.

How are these forms obtained : **possum** ? **possim** ? **possem** ? **potui** ? **posunt** ? What forms of Conjugation does **possum** lack ? How is **potens** used ? Translate **rex potens est**; **consulēs potentēs sumus**. Give a complete Synopsis of **possum**. Tell how these Nominatives are formed from their stems : **jūdex**; **virtūs**; **custōs**; **civitas**. Decline, side by side, the Latin for : *a large spur*; *a long night*; *a good work*; *a cowardly legion*; *no battle*; *a bad name*.

Why is the *Complementary Infinitive* so called ?

LESSON XX.

THE INFINITIVE WITH A SUBJECT ACCUSATIVE.

Learn N. 143, 166, 189 (*the heading only*) ; also 56, page 16.

CAUTION. Remember that a Participle is *always* a Participle, even in a compound tense, as the Future Infinitive Active, and must agree with its Noun in Gender, Number, and Case.

EXERCISE.

Translate. Give Rules for the form and use of all words. Examples on Page 262. The Accusative with the Infinitive should be translated precisely like a clause ; that is, as though the Accusative were Nominative, and the Infinitive in the Third Person, Singular or Plural.

1. "Urbēs magnae sunt." 2. Dicit urbēs magnās esse. 3. Nuntiābit Rōmānōs cōpiās Gallōrum superāvisse. 4. Negat (199, 5)

Caesarem oppidum expugnātūrum esse. 5. "Dux castra servābit." 6. Lēgātus dicit ducem castra servātūrum esse. 7. Putat legiōnēs pugnāre nōn posse. 8. Putō cōpiās Sabīnī ignāvās esse. 9. Spērāmus militēs consulis Genēvam occupātūrōs esse. 10. Putābitis consulēs injustōs fuisse. 11. Dicit iter longum futūrum esse. 12. Dicit nullōs agrōs vacāre. 13. Putās nautam Caesarī proelium nuntiāre potuisse. 14. Dicit maria lāta et alta esse. 15. Putātis rēgem urbī Rōmae (106) nōmen dedisse. 16. Custōdēs nuntiant hostēs arcem occupāvisse. 17. Spērās bella longa futūra esse. 18. Nuntiā, Pompēi, consuli militēs castra servātūrōs esse.

Give the Latin for —

1. He says that the teacher praised the boy. 2. The men think that the mountains are high. 3. You (*plural*) hope that the soldiers can protect the city and the citizens. 4. They will deny that the bodies of animals are small. 5. He hopes that the marches will not be long. 6. "The rewards of bravery will be great." 7. The king says that the rewards of bravery will be great.

Questions.

What is a *Direct Quotation*? an *Indirect Quotation*? What verbs are followed by the Infinitive with a Subject Accusative? Why can *putō* and *spērō* be followed by the same construction as *diō*, *negō*, and *nuntiō* (166, II.)? What Conjunction is omitted in Latin after verbs of *saying*, etc.?

LESSON XXI.

USE OF THE SUBJUNCTIVE MODE.*

Learn N. 57, *b*; 170; 174 & *a, b*; 175 & *a, b, c*, REMARK 1.
Read carefully section 19, page 6.

* TO TEACHERS. Although the Subjunctive presents some difficulties to a beginner, yet it seems best to give him an insight into that mode at an early period of his study, that he may not be compelled to memorize the Subjunctive forms of all the Conjugations, and yet not make a practical application of them. If the principles stated in this Lesson are emphasized when it is

Review the Conjugation of the Subjunctive, Active, of *amō, sum, possum*.

Study these References in connection with the Examples for this Lesson (page 263), and also the following —

HINTS FOR THE STUDENT. The Subjunctive Mode has a great variety of uses; this Lesson deals with one which is very common, and which illustrates the *whole* mode better than any other use. The Indicative states something as a *fact*; the Subjunctive states something, not as a *fact*, but as *possible* or *impossible*. The sentences of this Lesson contain the Conjunction *sī* (*if*), and are called *Conditional Sentences*. They are Complex (section 40, c, page 12). Of course, the Conjunction *sī* introduces the Subordinate Clause. The *statement*, or more important thought, will always be found in the Principal Clause. In these sentences, both the Indicative and Subjunctive are used.

Remember, it is not *sī* that requires the Subjunctive, but the *thought* to be expressed. *Remember*, that the Subjunctive has no Future or Future Perfect Tense; in such sentences as these, the Present must be used as a Future, and the Perfect as a Future Perfect. *Notice* that, as in English, *were* (as, *if I were rich*) indicates that something is *not true* at the *present* time; such a meaning must not be decided by the *if* clause altogether, but by the *Principal* clause.

STUDY THE EXAMPLES.

EXERCISE.

Translate. Tell what TIME each Verb denotes, and WHAT KIND of a statement it makes. Study the EXAMPLES, page 263.

LESSON LXXIII.

GERUND AND GERUNDIVE.

Gerund. Learn N. 190.

Gerundive. Learn N. 189, *f*; 190, *a*.

REMARK. The Gerund has already been employed in these Lessons; so, also, has the Infinitive (as a verbal noun in the Nominative Case). The use of both is very easily understood, being like that of any *neuter* noun. The use of the Gerundive (for the Gerund) must be studied with special care (N. 190, *a*). Study the Examples under the NOTE. Notice that *ad*, with the Accusative of the Gerund or Gerundive, implies a *purpose*.

Questions and Practice.

What is used as the Nominative of the Gerund? What two common uses has the Gerundive? When should it be used instead of the Gerund? Give the rule for determining the form of the Noun and of the Gerundive. Give the Latin for: *the hope of seeing the soldiers; the opportunity (facultās) for (of) leaving this place is not given.*

EXERCISE.

CAESAR'S HISTORY OF THE GALLIC WAR.

BOOK I. — CHAPTERS 1-13.

References (to the NOTES) and Explanations are given on pages 143-148. Quantity is not indicated, except that of the Penult in new words.

I. GALLIA est omnis divisa in partes tres, quarum unam incolunt Belgae, aliam Aquitani, tertiam, qui ipsorum lingua Celtae, nostra Galli appellantur. Hi omnes lingua, institutis, legibus inter se differunt. Gallos ab Aquitanis Garumna flumen, a Belgis 5 Matrōna et Sequāna dividit. Horum omnium fortissimi sunt Belgae, propterea quod a cultu atque humanitate provinciae longissime absunt, minimeque ad eos mercatores saepe comeant, atque ea, quae ad effeminandos animos pertinent, important; proximique sunt Germanis, qui trans Rhenum incolunt, quibus- 10 cum continenter bellum gerunt; qua de causa Helvetii quoque reliquos Gallos virtute praecedunt, quod fere quotidianis proeliis cum Germanis contendunt, quum aut suis finibus eos prohibent, aut ipsi in eorum finibus bellum gerunt. Eorum una pars, quam Gallos obtinere dictum est, initium capit a flumine Rhodano; con- 15 tinetur Garumna flumine, Oceāno, finibus Belgarum; attingit etiam ab Sequanis et Helvetiis flumen Rhenum; vergit ad septentriones. Belgae ab extremis Galliae finibus oriuntur; pertinent ad inferiorem partem fluminis Rheni; spectant in septentriones et orientem solem. Aquitania a Garumna flumine ad 20 Pyrenaeos montes et eam partem Oceāni, quae est ad Hispaniam, pertinet; spectat inter occasum solis et septentriones.

II. Apud Helvetios longe nobilissimus et ditissimus fuit Orgetōrix. Is, Marco Messāla et Marco Pisōne consulibus, regni

cupiditate inductus conjurationem nobilitatis fecit et civitati persuasit, ut de finibus suis cum omnibus copiis exirent; perfacile esse, quum virtute omnibus praestarent, totius Galliae imperio potiri. Id hoc facilius eis persuasit, quod undique loci natura Helvetii continentur: una ex parte flumine Rheno, latissimo atque 5 altissimo, qui agrum Helvetium a Germanis dividit; altera ex parte, monte Jura altissimo, qui est inter Sequanos et Helvetios; tertia, lacu Lemanno et flumine Rhodano, qui provinciam nostram ab Helvetiis dividit. His rebus fiebat, ut et minus late vagarentur et minus facile finitimis bellum inferre possent; qua de causa 10 homines bellandi cupidi magno dolore afficiebantur. Pro multitudine autem hominum et pro gloria belli atque fortitudinis, angustos se fines habere arbitrabantur, qui in longitudinem millia passuum ducenta et quadraginta, in latitudinem centum et octoginta patebant. 15

III. His rebus adducti et auctoritate Orgetorigis permoti, constituerunt ea, quae ad proficiscendum pertinerent, comparare; jumentorum et carrorum quam maximum numerum coëmere; sementes quam maximas facere, ut in itinere copia frumenti suppetere; cum proximis civitatibus pacem et amicitiam confir- 20 mare. Ad eas res conficiendas biennium sibi satis esse duxerunt; in tertium annum profectionem lege confirmant. Ad eas res conficiendas Orgetorigis deligitur. Is sibi legationem ad civitates suscepit. In eo itinere persuadet Castico Catamantaloedis filio, Sequano, cujus pater regnum in Sequanis multos annos obtinuerat 25 et a senatu populi Romani amicus appellatus erat, ut regnum in civitate sua occuparet, quod pater ante habuerat; itemque Dumno-rigi Aeduo, fratri Divitiaci, qui eo tempore principatum in civitate obtinebat ac maxime plebi acceptus erat, ut idem conaretur, persua- det, eique filiam suam in matrimonium dat. Perfacile factu esse 30 illis probat conata perficere, propterea quod ipse suae civitatis imperium obtenturus esset; non esse dubium, quin totius Galliae plurimum Helvetii possent; se suis copiis suoque exercitu illis regna conciliaturum confirmat. Hac oratione adducti inter se fidem et jusjurandum dant, et, regno occupato, per tres potentis- 35

simos ac firmissimos populos totius Galliae sese potiri posse sperant.

IV. Ea res est Helvetiis per indicium enuntiata. Moribus suis Orgetorigem ex vinculis causam dicere coëgerunt. Damnatum
5 poenam sequi oportebat, ut igni cremaretur. Die constituta causae dictionis Orgetōrix ad iudicium omnem suam familiam, ad hominum millia decem, undique coëgit, et omnes clientes obaeratosque suos, quorum magnum numerum habebat, eodem conduxit; per eos, ne causam diceret, se eripuit. Quum civitas ob eam rem
10 incitata armis jus suum exsequi conaretur, multitudinemque hominum ex agris magistratus cogerent, Orgetōrix mortuus est; neque abest suspicio, ut Helvetii arbitrantur, quin ipse sibi mortem consciverit.

V. Post ejus mortem nihilo minus Helvetii id, quod constitue-
15 rant, facere conantur, ut e finibus suis exeant. Ubi jam se ad eam rem paratos esse arbitrati sunt, oppida sua omnia numero ad duodecim, vicos ad quadringentos, reliqua privata aedificia incendunt; frumentum omne, praeterquam quod secum portaturi erant, comburunt, ut, domum reditionis spe sublata, paratiores ad omnia
20 pericula subeunda essent; trium mensium molita cibaria sibi quemque domo efferre jubent. Persuadent Raurācis et Tulingis et Latovicis, finitimis, uti, eodem usi consilio, oppidis suis vicisque exustis, una cum iis proficiscantur; Boiosque, qui trans Rhenum incoluerant et in agrum Noricum transierant Norēiamque oppugna-
25 rant, receptos ad se socios sibi adsciscunt.

VI. Erant omnino itinera duo, quibus itineribus domo exire possent: unum per Sequanos, angustum et difficile, inter montem Juram et flumen Rhodanum, vix qua singuli carri ducerentur; mons autem altissimus impendebat, ut facile perpauci prohibere
30 possent: alterum per provinciam nostram, multo facilius atque expeditius, propterea quod inter fines Helvetiorum et Allobrogum, qui nuper pacati erant, Rhodanus fluit, isque nonnullis locis vado transitur. Extremum oppidum Allobrogum est proximumque Helvetiorum finibus Geneva. Ex eo oppido pons ad Helvetios
35 pertinet. Allobrogibus sese vel persuasuros, quod nondum bono

animo in populum Romanum viderentur, existimabant; vel vi coacturos, ut per suos fines eos ire paterentur. Omnibus rebus ad protectionem comparatis, diem dicunt, qua die ad ripam Rhodani omnes conveniant. Is dies erat ante diem quintum Kalendas Apriles, Lucio Pisōne, Aulo Gabinio consulibus. 5

VII. Caesari quum id nuntiatum esset, eos per provinciam nostram iter facere conari, maturat ab urbe proficisci, et, quam maximis potest itineribus, in Galliam ulteriorem contendit et ad Genevam pervenit. Provinciae toti quam maximum potest militum numerum imperat (erat omnino in Gallia ulteriore legio una); 10 pontem, qui erat ad Genevam, jubet rescindi. Ubi de ejus adventu Helvetii certiores facti sunt, legatos ad eum mittunt, nobilissimos civitatis, cujus legationis Namēius et Verudoctius principem locum obtinebant, qui dicerent, sibi esse in animo sine ullo maleficio iter per provinciam facere, propterea quod aliud iter haberent 15 nullum; rogare, ut ejus voluntate id sibi facere liceat. Caesar, quod memoria tenebat Lucium Cassium consulem occisum, exercitumque ejus ab Helvetiis pulsum et sub jugum missum, concedendum non putabat; neque homines inimico animo, data facultate per provinciam itineris faciendi, temperaturos ab injuria et maleficio 20 existimabat. Tamen, ut spatium intercedere posset, dum milites, quos imperaverat, convenirent, legatis respondit, diem se ad deliberandum sumpturum; si quid vellent, ad Idus Apriles revertentur.

VIII. Interea ea legione, quam secum habebat, militibusque, 25 qui ex provincia convenerant, a lacu Lemanno, qui in flumen Rhodanum influit, ad montem Juram, qui fines Sequanorum ab Helvetiis dividit, millia passuum decem novem murum, in altitudinem pedum sedecim, fossamque perducit. Eo opere perfecto praesidia dispōnit, castella commūnit, quo facilius, si se invito 30 transire conarentur, prohibere possit. Ubi ea dies, quam constituerat cum legatis, venit, et legati ad eum reverterunt, negat se more et exemplo populi Romani posse iter ulli per provinciam dare, et, si vim facere conentur, prohibiturum ostendit. Helvetii, ea spe dejecti, navibus junctis ratibusque compluribus factis, alii vadis 35

Rhodani, qua minima altitudo fluminis erat, nonnunquam interdiu, saepius noctu, si perrumpere possent, conati, operis munitione et militum concursu et telis repulsi, hoc conatu destiterunt.

IX. Relinquebatur una per Sequanos via, qua, Sequanis invitis, 5 propter angustias ire non poterant. His quum sua sponte persuadere non possent, legatos ad Dumnorigem Aeduum mittunt, ut eo deprecatore a Sequanis impetrarent. Dumnorix gratia et largitione apud Sequanos plurimum poterat, et Helvetiis erat amicus, quod ex ea civitate Orgetorigis filiam in matrimonium duxerat; 10 et cupiditate regni adductus novis rebus studebat, et quam plurimas civitates suo sibi beneficio habere obstrictas volebat. Itaque rem suscipit et a Sequanis impetrat, ut per fines suos Helvetios ire patiantur, obsidesque uti inter sese dent, perficit: Sequani, ne itinere Helvetios prohibeant; Helvetii, ut sine maleficio et injuria 15 transeant.

X. Caesari renuntiatur Helvetiis esse in animo per agrum Sequanorum et Aeduorum iter in Santōnum fines facere, qui non longe a Tolosatium finibus absunt, quae civitas est in provincia. Id si fieret, intelligebat magno cum periculo provinciae futurum, 20 ut homines bellicosos, populi Romani inimicos, locis patentibus maximeque frumentariis finitimos haberet. Ob eas causas ei munitioni, quam fecerat, Titum Labienum legatum praefecit; ipse in Italiam magnis itineribus contendit duasque ibi legiones conscribit, et tres, quae circum Aquilēiam hiemabant, ex hibernis educit; et 25 qua proximum iter in ulteriorem Galliam per Alpes erat, cum his quinque legionibus ire contendit. Ibi Centrōnes et Graiocēli et Caturīges, locis superioribus occupatis, itinere exercitum prohibere conantur. Compluribus his proeliis pulsus, ab Ocēlo, quod est citerioris provinciae extremum, in fines Vocontiorum ulterioris 30 provinciae die septimo pervenit; inde in Allobrogum fines, ab Allobrogibus in Segusiāvos exercitum ducit. Hi sunt extra provinciam trans Rhodanum primi.

XI. Helvetii jam per angustias et fines Sequanorum suas copias transduxerant, et in Aeduorum fines pervenerant eorumque agros 35 populabantur. Aedui, quum se suaque ab iis defendere non pos-

sent, legatos ad Caesarem mittunt rogatum auxilium : Ita se omni tempore de populo Romano meritos esse, ut paene in conspectu exercitus nostri agri vastari, liberi eorum in servitutem abduci, oppida expugnari non debuerint. Eodem tempore Aedui Ambarri, necessarii et consanguinei Aeduorum, Cæsarem certiores faciunt, 5 sese depopulatis agris non facile ab oppidis vim hostium prohibere. Item Allobroges, qui trans Rhodanum vicos possessionesque habebant, fuga se ad Caesarem recipiunt et demonstrant, sibi praeter agri solum nihil esse reliqui. Quibus rebus adductus Caesar non expectandum sibi statuit, dum, omnibus fortunis sociorum con- 10 sumptis, in Santōnos Helvetii pervenirent.

XII. Flumen est Arar, quod per fines Aeduorum et Sequanorum in Rhodanum influit incredibili lenitate, ita ut oculis, in utram partem fluat, judicari non possit. Id Helvetii ratibus ac lintribus junctis transibant. Ubi per exploratores Caesar certior factus est, 15 tres jam copiarum partes Helvetios id flumen transduxisse, quartam vero partem citra flumen Arārim reliquam esse, de tertia vigilia cum legionibus tribus e castris profectus ad eam partem pervenit, quae nondum flumen transierat. Eos impeditos et inopinantes aggressus magnam eorum partem concidit; reliqui fugae sese 20 mandarunt atque in proximas silvas abdiderunt. Is pagus appellabatur Tigurinus; nam omnis civitas Helvetia in quattuor pagos divisa est. Hic pagus unus, quum domo exisset patrum nostrorum memoria, Lucium Cassium consulem interfecerat et ejus exercitum sub jugum miserat. Ita, sive casu sive consilio deorum 25 immortalium, quae pars civitatis Helvetiae insignem calamitatem populo Romano intulerat, ea princeps poenas persolvit. Qua in re Caesar non solum publicas, sed etiam privatas injurias ultus est, quod ejus soceri Lucii Pisōnis avum, Lucium Pisōnem legatum, Tigurini eodem proelio, quo Cassium, interfecerant. 30

XIII. Hoc proelio facto, reliquas copias Helvetiorum ut consequi posset, pontem in Arāre faciendum curat atque ita exercitum transducit. Helvetii repentino ejus adventu commoti, quum id, quod ipsi diebus viginti aegerrime confecerant, ut flumen transirent, illum uno die fecisse intelligerent, legatos ad eum mittunt; 35

cujus legationis Divico princeps fuit, qui bello Cassiāno dux Helvetiorum fuerat. Is ita cum Caesare agit : Si pacem populus Romanus cum Helvetiis faceret, in eam partem ituros atque ibi futuros Helvetios, ubi eos Caesar constituisset atque esse voluisset;
5 sin bello persequi perseveraret, reminisceretur et veteris incommodi populi Romani et pristinae virtutis Helvetiorum. Quod improvise unum pagum adortus esset, quum ii, qui flumen transissent, suis auxilium ferre non possent, ne ob eam rem aut suae magnopere virtuti tribueret aut ipsos despiceret; se ita a patribus majori-
10 busque suis didicisse, ut magis virtute quam dolo contenderent aut insidiis niterentur. Quare ne committeret, ut is locus, ubi constitissent, ex calamitate populi Romani et internecone exercitus nomen caperet aut memoriam proderet.

CHAPTER XIII.

Hoc proelio facto = post hoc proelium. — **Copias**, 123, e. — **Ut posset**, purpose of *faciendum curat* (172, REMARK 2). — **In Arare**, over the Arar. — **Pontem faciendum**, 189, h. — **Intelligerent** (184, a), *when they saw*. — **Ut...** *transirent*, in apposition with *id* (181, e), namely, *the crossing of the river*. — **Bello Cassiano**, 160; 110, c. — **Dux Helvetiorum**, 124. — **Is ita cum Caesare agit** introduces a passage of Indirect Discourse (186, 187), extending through the remainder of the chapter. This is given under NOTE 187, e, together with the Latin of the *Direct* form, and the two should be carefully studied and compared. A general outline of each sentence is here given. **Si to Helvetiorum**. This sentence is *Declaratory*, as far as *voluisset*; the remainder is *Imperative*. The Principal Verbs in the Declaratory part are *ituros (esse)*, *futuros (esse)*; the Principal Verb in the Imperative part is *reminisceretur*, *let him remember (he should remember)* (187, c). — **Constituisset, Voluisset**, Future Perfect Indicative (*you shall have*, etc.) in Direct Discourse (see 187, e). — **Bello**, 151. — **Persequi (eos)**, *in pursuing them*. — **Perseveraret**, the subject is Caesar. — **Reminisceretur**, what form in Direct Discourse? — **Incommodi**, the defeat and death of Cassius (125). — **Quod to niterentur**. This sentence is *Imperative*, to *despiceret*; the remainder is *Declaratory*. The Principal Verbs in the Imperative part are (no) *tribueret, despiceret*, *let him not (= that he should not) attribute* (the victory), etc., or *despise them*; the Principal Verb in the Declaratory part is *didicisse*. — **Quod**, 182, d. — **Improviso**, notice the derivation (literally = *in an un-fore-seen manner*). — **Possent**, what mode in

Direct Discourse ? (184, a.) — **Magnopere**, 39. — **Majoribus**, 36, b. — **Didicisse** = **institutos esse**. — **Insidiis niterentur**, to rely (that they should rely) on *ambuscades* (151). — **Contenderent, niterentur**, what mode in Direct Discourse ? (181, REMARK.) — **Quare to proderet**. This sentence is *Imperative*, the Principal Clause being **ne (Caesar) committeret**: let him not (= that he should not) cause the place where they should take (should have taken) their stand to receive (literally, cause that it should receive) a name, etc., or transmit the remembrance (of the defeat to future generations). — **Constitissent**, Future Perfect Indicative (we shall have taken our stand) in Direct Discourse. — **Caperet, proderet**, what mode in Direct Discourse ? (181, b.)

NOTES.

THE ESSENTIALS OF LATIN GRAMMAR.

ETYMOLOGY.

In Latin words, changes were often made which rendered them easier to pronounce. These are called *Euphonic* changes. Some of the most common changes are these : —

I. Consonant Changes.

(1.) **Q** was regarded as a single consonant, equivalent to **C**. Hence we find *cūjus* as the genitive of *quī*; *secūtus* (from *sequor*) for *sequūtus*; *cum* for *quum*.

(2.) **S** between two vowels became **R**; as, *eram* and *erō* (from stem *es*); *flōris* (from *flōs*); *corporis* (from *corpus*).

(3.) **C** and **G** united with **S**, forming **X**; as *pacs* = *pax*; *regs* = *rex*; *regsi* = *rexī*. **H** did the same; as, *vehsi* = *vexī*; *trahsi* = *traxī*.

(4.) **D** and **T** were

a. Suppressed before **S**; as, *pēs* for *peds*; *custōs* for *custods*; *virtūs* for *virtuts*; *pars* for *parts*.

b. Changed to **S**; as, *possum* for *potsum*; *cessi* for *cedsi*. This change is called *Assimilation*. See (6), below.

(5.) **M** was changed to **N** before a *lingual*; as, *septen(m)decim*; *eun(m)dem* (so English *iden-tity*, from *īdem*).

(6.) Assimilation (from two Latin words, *ad*, *to*, and *similis*, *like*, is a change made in a consonant by which it becomes *like* the following consonant. The form of the word *assimilation* itself is the result of this change, *d* being changed to *s*.

It is very common in the case of Prepositions compounded with other words. A good example of it is seen in the verb *afferō*, a compound of *ad* and *ferō*. Its Present Indicative is *afferō*; Perfect Indicative, *at-tuli*; Supine, *al-lātum*.

2. Vowel Changes.

Vowel changes are frequent. Notes will be given on special changes when they shall occur. Some of those most common are given here :—

(1.) E changed to I; as, *militis* (from *miles*); *principis* (from *princeps*); *verticis* (from *vertex*); *nōminis* (from *nōmen*); *retineō* (from *re + teneō*).

(2.) U changed to I; as, *capitis* (from *caput*).

(3.) O changed to I; as, *virginis* (from *virgō*).

(4.) O changed to U; as, *corpus* (gen. *corporis*) for *corpos*.

(5.) A changed to I; as, *conficiō* (from *con + faciō*).

(6.) A changed to E; as, *confectum* (from *con + factum*).

(7.) OE changed to Ū; as, *pūniō* (from *poena*); *mūniō* (from *moenia*).

(8.) AE changed to Ī; as, *occidō* (from *ob + caedō*).

(9.) AU changed to Ū; as, *inclūdō* (from *in + claudō*).

Outline of Rules for Gender.

3. Gender decided by *meaning*.* These Rules apply to *all* Declensions; *A small figure at the right of a word refers to REMARKS at the end of these tables.*

MASCULINE. ¹	FEMININE. ²	NEUTER.
Names of <i>Males, Rivers, Winds, and Mountains.</i>	Names of <i>Females, Countries, Towns, Islands, and Trees.</i>	<i>Indeclinable Nouns; Infinitives, Phrases, Clauses, and other parts of speech used as indeclinable nouns.</i>

4. Gender decided by *ending* of Nominative Singular.

(1.) First Declension.

MASCULINE.	FEMININE.	NEUTER.
cf. <i>9, c.</i>	<i>a.</i>	

(2.) Second Declension.

<i>us, er, ir.</i>		<i>um.</i>

* Some names of *rivers, countries, towns, etc.*, follow the rules of gender by *ending*.

(3.) *Third Declension.*

MASCULINE.	FEMININE.	NEUTER.
ō, or, ōs, er, ēs (increasing in the Genitive to <i>idis</i> or <i>itis</i>).	ās, ēs (not increasing in the Genitive), <i>is, ys, x, s</i> (preceded by a consonant), <i>dō, gō, iō</i> (abstract and collective), <i>ūs</i> (Genitive, <i>-ūdis</i> or <i>-ūtis</i>).	a, e, i, y, c, l, t, men (Genitive, <i>-mīnis</i>), <i>ar, ur, us</i> (Genitive, <i>-ōris</i> or <i>-ēris</i>).

(4.) *Fourth Declension.*

us. ⁴			ū.

REMARKS. 1. Because *vir* (*man*), *fluvius* (*river*), *ventus* (*wind*), *mons* (*mountain*), are Masculine.

2. Because *mulier* (*woman*), *terra* (*land, country*), *urbs* (*city*), *insula* (*island*), *arbor* (*tree*), are Feminine.

3. *Pelagus* (*sea*), *virus* (*poison*), *vulgus* (*crowd*), are Neuter. *Vulgus* is rarely Masculine.

4. *Manus* (*hand*), *domus* (*house*), *Idūs* (*the 15th, or 13th, of the month*), and several others, are Feminine.

5. *Diēs* (*day*) is Masculine or Feminine in the Singular, and Masculine in the Plural. *Merīdiēs* (*noon*) is Masculine.

 3. Vowel stems have also *is*. 4. Except words of two syllables, ending in *cus* (as *lacus*); also *portus* and a few others, which have *ūbus*. 5. Except *rēs, spēs, fidēs*, which have *ēi*.

Formation of the Cases.

7. The following table will be helpful to the beginner, since it shows *how* the Cases were anciently formed from the Stems, in the Five Declensions, and what changes and contractions were afterwards made:—

Notice, in the above table, that the Ablative Singular originally ended in *d*. Afterwards, *d* was dropped and the *stem-vowel* was lengthened (in *puellā*, *equō*, *currū*). In *rēge*, the final vowel was *not* a stem-vowel, but a connecting vowel, and was not affected. Other changes, producing long vowels in final syllables, can be pointed out and explained by the teacher.

General Laws of Declension.

8. (1.) The Nominative and Vocative are always alike, in both numbers, except in nouns of the Second Declension ending in *us*.

(2.) The Accusative Singular of Masculines and Feminines always ends in *m*, and the Accusative Plural in *s*.

(3.) Neuter nouns have the Nominative, Accusative, and Vocative alike in both numbers, and these cases, in the Plural, always end in *a*.

(4.) In the Third, Fourth, and Fifth Declensions, the Nominative, Accusative, and Vocative Plural (*in all genders*) are alike.

(5.) The Dative and Ablative Plural are always alike.

(6.) The Genitive Plural always ends in *um*.

(7.) The vowels *i*, *o*, *u* are *long* when final.

(8.) The vowel *a* is short when final, except in the Ablative Singular.

(9.) Final *e* is *short* in the Third Declension, and *long* in the Fifth.

NOUNS : FIRST DECLENSION.

9. Latin nouns of the First Declension end in *a* in the Nominative Singular.

a. The Stem ends in *a* (called the *Stem-Vowel*, or *Characteristic*).

b. The Case Endings are given in 6.

- c. The Gender of nouns of the First Declension is Feminine, except of a few that are Masculine from their meaning ; as, *nauta*, a sailor ; *agricola*, a farmer ; *poëta*, a poet ; *Belgae*, *Celtae* (names of tribes).
- d. Observe that final *a* is long in the Ablative Singular.
- e. *Filia*, a daughter, and *dea*, a goddess, have *filiābus* and *deābus* in the Dative and Ablative Plural, instead of *filiis* and *deis*. Were it not for some such peculiarity, these words could not be distinguished, in those cases, from *filius*, a son, and *deus*, a god, of the Second Declension.

NOUNS : SECOND DECLENSION.

10. Nouns of the Second Declension end in **us, er, ir** (Masculine), **um** (Neuter).

- a. The Stem ends in **o**.
- b. The Case Endings are given in **6**.
- c. Nouns ending in **us** are exceptions to the law stated in **NOTE 8** (1), as they have **e** in the Vocative Singular.
- d. **Filius** and **genius** drop **e** in the Vocative ; so do proper names ending in **ius** ; as, *fili* ; *Cassi* ; *Jūli* (instead of *filie* ; *Cassie* ; *Jūlie*). This does not affect the accent ; as, *Mercū'ri* (for *Mercū'rie*).
- e. The Genitive of nouns ending in **ius** or **ium** ends in **ii** or **i** (that is, **ii** contracted). This does not affect the accent ; as, *ingē'ni* (for *ingē'nii*).
- f. **Deus**, a god, is thus declined : Singular **deus, deī, deō, deum, deus, deō**. Plural N. and V. **deī, diī** (or, contracted, **di**), G. **deōrum** (or, contracted, **deūm**), D. and **ABL. deīs, diīs** (or, contracted, **dis**), Acc. **deōs**.
- g. **Vulgus**, the crowd, is Neuter, and has the Accusative like the Nominative. It has no Plural.

NOUNS : THIRD DECLENSION.

11. Nouns of the Third Declension are divided into two classes : —

- a. Nouns whose stem ends in a Consonant. They have **um** in the Genitive Plural ; as, *militum*.
- b. Nouns whose stem ends in the Vowel **i**. They have **ium** in the Genitive Plural ; as, *nāvium*.

12. The Nominative Singular of most nouns is formed by adding **s** to the stem.

- a. If the stem ends in **c** or **g**, the Nominative will end in **x** (1 (3)) ; as, **lux** (= **lūc** + **s**) ; **rex** (= **rēg** + **s**).
- b. If the stem ends in **t** or **d**, those letters will be dropped before the final **s** of the Nominative (1 (4) a) ; as, **aetās** (= **aetāt** + **s**) ; **custōs** (= **custōd** + **s**) ; **lapis** (= **lapid** + **s**).

13. In forming the Nominative, the vowel before the final consonant of the stem is often changed.

- a. The most common change is from **i** to **e** ; as, **miles**, **jūdex**, **nōmen**, **nūbēs** (from the stems **mīlit-**, **jūdic-**, **nōmin-**, **nūbi-**).
- b. Other vowel changes are from **i** to **u** (as, **caput**, from stem **capit-**) ; **i** to **o** (as, **virgō**, **multitūdō**, from stems **virgin-**, **multitūdin-**) ; **o** to **u** (as, **corpus**, from stem **corpor-**) ; **e** to **u** (as, **opus**, from stem **oper-**).

REMARK. In the Genitives of **corpus**, **opus**, **flōs**, and others of like form, **r** takes the place of **s**, according to the law stated in 1 (2) ; as, **corporis**, **operis**, **flōris**, etc., instead of **corposis**, **opesis**, **flōsis**, etc.

14. Nominatives ending in **o** (as, **leō**, **multitūdō**, **virgō**) have lost the final **n** of the stem. The stems of these nouns are **leōn-**, **multitūdin-**, **virgin-**. It will be seen from these examples that nouns ending in **do** and **go** also change the vowel (i) before **n** to **o**.

Consonant-Stems.

15. Nouns whose stem ends in a Consonant *increase in the Genitive* ; that is, they have more syllables in that case than in the Nominative. Notice the **REMARK** below.

- a. The final consonant of the stem may be a *Mute* or a *Liquid* (4, page 17) ; as, **rēg-**, **duc-**, **capit-**, **custōd-**, **consul-**, **leōn-**.
- b. The Nominative Singular, except in the case of Neuters and nouns having Liquid stems, is formed by adding **s** to the stem. For Examples, see 12, a, b.

REMARK. **Pater**, **māter**, **frāter** (Genitives, **patris**, **mātris**, **frātris**), *seem* not to increase in the Genitive. The reason is that the stems are really **pater-**, **māter-**, **frāter-**, and that they are contracted to **patr-**, **mātr-**, **frātr-** ; so that **patris** is for **pateris**, etc.

Vowel-Stems.

16. Nouns whose stem ends in the Vowel **i** *do not increase in the Genitive*. Notice the **REMARK** below.

- a. The Nominative Singular, except of Neuters, is formed by adding *s* to the stem ; as, *nāvis* (= *nāvi* + *s*).
- b. As in nouns having Consonant-stems, *i* in the stem is frequently changed to *e* in the Nominative ; as, *mare*, *nūbēs* (from stems *mari-*, *nūbi-*).
- c. Nouns having vowel-stems end : —
 - (1.) In *ēs* and *is* (Feminine, with a few exceptions).
 - (2.) In *e*, *al*, *ar* (Neuter) ; *these have i in the Ablative Singular.*

REMARK. Neuters (ending in *al*, *ar*), as *animal*, *calcar* (Genitives, *animālis*, *calcāris*), *seem* to increase in the Genitive. These forms, however, have lost a final *e* in the Nominative (as will be explained hereafter), and hence are to be regarded as nouns ending in *āle*, *āre* (26, b). *Animāle*, *calcāre* (Genitives, *animālis*, *calcāris*), *do not increase.*

Peculiarities of Vowel-Stems.

17. Nouns having *i*-stems differ from those having Consonant-stems in the following respects : —

- a. The Genitive Plural ends in *ium* ; Neuters have *ia* in the Nominative, Accusative, and Vocative, Plural. This seems irregular ; but it is not at all so, as *um* and *a* are added to the *stem* (ending in *i*) just as to a stem ending in a consonant.
- b. The Ablative Singular of all Neuters (ending in *e*, *al*, *ar*) ends in *i*. The nouns *ignis*, *nāvis*, *turris*, and some others, have *e* or *i* in the Ablative.
- c. Some nouns have *im* in the Accusative Singular ; others (as *turris*) have *em* or *im*. These can be best learned by practice.
- d. The Accusative Plural (Masculine and Feminine) is often written *is* ; as, *turrēs* (or *is*) ; *nūbēs* (or *is*).

18. Monosyllables (*one-syllable* nouns), whose stem (in the Singular) ends in two consonants, are declined as *consonant-stems* in the Singular, but as *vowel-stems* in the Plural. That is, they increase in the Genitive, yet have *ium* in the Genitive Plural, and *ēs* or *is* in the Accusative Plural ; as, *urbs*, *nox* (Genitive Plural, *urbium*, *noctium*). The same principle applies to many nouns (*not monosyllables*) having stems (in the Singular) ending in two consonants ; as, *cohors*, *cliens* (Genitive Plural, *cohortium*, *clientium*).

19. The Rules for Gender according to Nominative endings are given under N. 4.

- a. The following nouns, in common use, are exceptions to these rules, being *Masculine* : *dens*, a tooth, *fons*, a fountain, *mons*, a moun-

tain, pons, a bridge ; ignis, fire, finis, a limit, end, collis, a hill.
According to the rules, these nouns should be *Feminine*.

- b. There are many nouns not provided for by the rules : the gender of these must be learned by practice ; as, *jūs* (Genitive, *jūris*), *right*, *law* (Neuter) ; *iter* (Genitive, *itineris*), *journey, march* (Neuter).

NOUNS : FOURTH DECLENSION.

20. Nouns of the Fourth Declension end in *us* (Masculine),* *ū* (Neuter).

- a. The Stem ends in *u*. The Case Endings are given under 6.
- b. The Nominative Singular of Masculines is formed by adding *s* to the stem ; as, *curru + s*.
- c. From 7, it will be seen that the Fourth Declension resembles the Third. The Genitive Singular of *curru*s, for instance, is contracted from *curruis* to *currūs*, and hence the *long u* (11, e, p. 21). Other instances of contraction are shown in the Table under 7.
- d. Notice that, in the Dative and Ablative Plural, the *u* of the stem becomes *i* ; also, that Neuter nouns have all cases in the Singular (except the Genitive) alike.

REMARK. Dissyllables (words of *two syllables*) ending in *cus* (as *lacus*), and a few others, have *ubus* in the Dative and Ablative Plural.

21. Most nouns of the Fourth Declension are formed from the Supine stem of verbs ; as, *exercitus, mōtus, adventus* (from *exerceō, moveō, adveniō*).

- a. The Supines of verbs are therefore nouns of the Fourth Declension, but have only the Accusative and Ablative Singular.
- b. *Domus* (*house* or *home*) belongs both to the Fourth and Second Declensions. Its inflection will be found under the References given in Lesson XXXV.

NOUNS : FIFTH DECLENSION.

22. Nouns of the Fifth Declension end in *ēs*. The Nominative = Stem + *s*.

- a. The Stem ends in *ē*. The Case Endings are given under 6.
- b. The Gender is Feminine ; except *diēs* (*day*), which is usually Masculine. *Meridiēs* (*noon*) is also Masculine.

* *Manus, domus, Idūs* (Plural), and a few others, are Feminine.

- c. Only two nouns, *diēs* and *rēs*, have all the cases in the Plural. A few others have the Nominative and Accusative, Plural.
- d. Contrary to the rule (11, b, p. 20), *e* is *long* before *i* in the Genitive and Dative Singular in all nouns except *rēs*, *spēs*, *fidēs*.

Compound Nouns.

23. There are, in Latin, several Compound Nouns. Of these, the two most common are : —

- a. **Respublica** (= the noun *rēs* + the Feminine adjective *publica*), meaning *the public affair*, that is, *the state*. Both parts of the word are declined, — *rēs* as the noun (Fifth Declension) and *publica* as the feminine of *bonus*. Genitive = *reipublicae*, or *rei publicae*.
- b. **Jusjūrandum** (= the noun *jūs* + the Neuter participle *jūrandum*, from *jūrō*, *to swear*), meaning *an oath*. *Jūs* is the noun, Third Declension Neuter, and *jūrandum* is declined like *bonum*. Genitive = *jūrisjūrandi*.
- c. **Pater, māter**, and some other nouns, are often joined with *familiās* (an old form of the Genitive, First Declension, = *familiae*). The first noun is declined regularly, but *familiās* does not change its form ; as, *patresfamiliās* (*the heads of families*) ; *mātresfamiliās* (*matrons*).

ADJECTIVES.*

24. Latin Adjectives are declined like Nouns. As they must agree with a Noun or Pronoun in Gender, Number, and Case (108), they are declined in *three* Genders, *two* Numbers, and *six* Cases. They are divided into two classes : —

- a. Adjectives whose Masculine and Neuter forms are like Masculine and Neuter nouns of the Second Declension, and whose Feminine form is like a Feminine noun of the First Declension ; as, *bonus* (Masculine), *bona* (Feminine), *bonum* (Neuter). That is, they are declined exactly as *servus*, *stella*, *bellum*, would be, if declined *side by side*. These Adjectives are therefore called **Adjectives of the First and Second Declensions**.
- b. Adjectives declined like Nouns of the Third Declension are called **Adjectives of the Third Declension**.

* *Ūnus*, *alius*, and others having the same peculiarities of declension, are described under Numeral Adjectives (43).

All Adjectives of the First and Second Declensions have a separate form for each gender; but Adjectives of the Third Declension differ in this respect, according to the rules stated in the next NOTE.

25. Adjectives of the Third Declension may have, in the Nominative Singular, (1) a separate ending for each gender; (2) one form for both Masculine and Feminine, and another for the Neuter; (3) the same form for *all* genders. For convenience, therefore, we say that an Adjective of the Third Declension has *three endings*, or *two endings*, or *one ending*. They can be distinguished by the following rules:—

- a. Adjectives of *three endings* end in **er**; as, **ācer** (Masculine), **ācris** (Feminine), **ācre** (Neuter).
- b. Adjectives of *two endings* end in **is**, or are in the Comparative Degree; as, **fortis** (*brave*); **fortior** (*braver*). These have, in the Nominative Singular, **fortis** (Masculine and Feminine), **forte** (Neuter); **fortior** (Masculine and Feminine), **fortius** (Neuter).
- c. Adjectives of *one ending* include those *not* ending in **er** or **is**, and *not* in the Comparative Degree; as, **audax**, **ingens**, **vetus**.

26. a. Adjectives of the Third Declension ending in **er** are *i*-stems. The fact to be specially noticed is that they have *i* in the *Ablative Singular*, and **ēs** or **is** in the *Accusative Plural* (Masculine and Feminine).

- b. Adjectives ending in **is** are *i*-stems. They have *i* in the *Ablative Singular*, and **ēs** or **is** in the *Accusative Plural* (Masculine and Feminine). Neuter nouns (Third Declension), ending in **al** and **ar**, are really Neuter forms of Adjectives ending in **is** (the *e* having disappeared); as, **animālis**, *living*, **animāle** (*animal*), *a living thing*.
- c. Adjectives of *one ending* are *i*-stems. Notice, however, (1) that they *increase in the Genitive*; (2) that they have *e* or *i* in the *Ablative Singular*. In the *Plural* they are declined like **fortis**. (**Vetus**, *old*, and a few others have consonant-stems in both numbers.)

CAUTION. As these adjectives have *two endings* in the *Accusative Singular* (because the *Accusative*, *Neuter*, must be like the *Nominative*), it will be less confusing to decline them in two columns, thus:—

	M. F.	N.
Nominative	audax	audax.

- d. **Comparatives** have *two endings* and Consonant (*Liquid*) stems; but notice that they have *e* or *i* in the *Ablative Singular*. Also notice that the *Accusative Plural* (Masculine and Feminine) has **ēs** or **is**.

CAUTION. Beginners are very apt to write the *Nominative* and *Genitive Plural* **ia**, **ium**. Notice that these forms have *no i*.

27. *Plūs*, *more*, is a Neuter Noun in the Singular, declined like *jūs*; hence, to express *more wisdom*; *more pain*, we must say *plūs sapientiae*; *plūs doloris* (122, b).

In the Plural it is an Adjective, declined like the Plural of any other Comparative, except that it has *ium* in the Genitive.

28. As already stated, Adjectives of one ending, and also Comparatives, have *e* or *i* in the Ablative Singular. The usual distinction is that the form ending in *i* is used *adjectively*, and the form ending in *e*, *substantively*.

COMPARISON.

29. Adjectives expressing *quality* are compared, in Latin as in English, in three ways: (1) *regularly*; (2) *irregularly*; (3) by the use of the Adverbs *more* and *most*.

(1.) Regular Comparison.

30. The Comparative (Masculine) is formed by adding *ior*, and the Superlative by adding *issimus* (Masculine) to the stem of the Positive, minus the stem vowel; as,

<i>cārus</i> , dear;	<i>cārrior</i> , dearer;	<i>cārissimus</i> , dearest.
<i>fortis</i> , brave;	<i>fortior</i> , braver;	<i>fortissimus</i> , bravest.
<i>audax</i> , bold;	<i>audācior</i> , bolder;	<i>audācissimus</i> , boldest.

REMARK. The Comparative is always of the Third Declension, and the Superlative of the First and Second.

a. Participles, if used as Adjectives, are regularly compared; as, *amans*, *amantior*, *amantissimus*; *apertus*, *apertior*, *apertissimus*.

(2.) Irregular Comparison.

31. Two classes of Adjectives do not form their Superlative according to the law of Regular Comparison:—

a. Adjectives ending in *-er* form the Superlative by adding *rīmus* to the Positive; as,

ācer, *ācrior*, *ācerrimus*; *miser*, *miserior*, *miserrimus*.

b. Six Adjectives ending in *-ilis* form the Superlative by adding *līmus* to the stem, minus the stem vowel *i*; as, *facilis*, *facilior*, *facillimus*. The list is:—

<i>facilis</i> , easy;	<i>similis</i> , like;	<i>gracilis</i> , slender.
<i>difficilis</i> , difficult;	<i>dissimilis</i> , unlike;	<i>humilis</i> , lowly.

32. Compound Adjectives ending in *-dīcus*, *-fīcus*, *-vōlus* (derived from the verbs *dīcō*, *faciō*, *vōlō*), form the Comparative and Superlative as though they were participial forms ending in *ns* ; as,

maledicus, *abusive* (*ill-speaking*), *maledicentior*, *maledicentissimus*.

mūnificus, *liberal*, *mūnificentior*, *mūnificentissimus*.

benevolus, *benevolent* (*well-wishing*), *benevolentior*, *benevolentissimus*.

33. The Adjectives *bonus* (*good*), *malus* (*bad*), *magnus* (*great*), *parvus* (*small*), *multus* (*much*), *multī* (plural of *multus*, meaning *many*), and a few others, are very irregular in their forms of comparison. Like the English *good*, *bad*, and other adjectives, the three degrees are formed from different stems. References to their forms of comparison are given in Lesson XXIX.

34. Five Adjectives have no Positive. They are, in the Comparative, *citerior* (*hither*), *interior* (*inner*), *prior* (*former*), *propior* (*nearer*), *ulterior* (*farther*). They are derived from Prepositions.

In English, also, we have Adjectives without a Positive, and derived from Prepositions ; as, (*in*), *inner*, *innermost* (or *inmost*).

35. These four have peculiar Superlatives : —

Exterus (*outside*), *superus* (*high*), *inferus* (*low*), *posterus* (*following*). These, also, are derived from Prepositions. References to their comparison are given in Lesson XXXIV.

36. The following are more or less peculiar in comparison : —

a. *Dives* (*rich*), *divitior* or *dītior*, *divitissimus* or *dītissimus*.

b. *Juvenis* (*young*), *minor nātū* (*less by birth ; that is, younger*), *minimus nātū* (*least by birth ; that is, youngest*). Instead of *minor nātū*, *minor* alone is often used (*nātū* being understood), especially in the plural ; as, *minōrēs*, *descendants*. *Senex* (*old*), *māior nātū*, *maximus nātū*. Or, *mājōrēs* alone is used for the Comparative (*nātū* being understood), in the sense of *elders* or *ancestors*.

(3.) Comparison by MORE and MOST.

37. Adjectives which have a vowel before the ending *us* usually form the Comparative and Superlative by the use of the Adverbs *magis* (*more*), and *maximē* (*most*) ; as, *dubius* (*doubtful*), *magis dubius*, *maximē dubius*.

Formation and Comparison of Adverbs.

38. Adverbs of *Manner* are formed from Adjectives. English Adverbs of *Manner* are formed by adding *ly* to Adjectives ; as, *dearly*, *bravely*.

In Latin Adverbs the ending of the Positive shows *from what Declension of Adjectives* the Adverb is derived.

- a. An Adverb is formed from the stem of an Adjective of the First and Second Declensions by changing the stem-vowel to *ē*; as, *cārē*, *dearly* (from stems *cāro-*, *cāra-*, *dear*). Other examples are: *dignē* (*worthily*); *pulchrē* (*beautifully*).
- b. An Adverb is formed from an Adjective of the Third Declension by adding *ter* to the stem; as, *forti-ter* (*bravely*), *gravi-ter* (*heavily*), *audāci-ter* * (*boldly*), *ācri-ter* (*eagerly*).

Adjectives ending in *ns* (Genitive, *-ntis*) drop *ti* from the stem before forming Adverbs; as, *sapienter* (*wisely*), for *sapienti-ter*; *prūdentē* (*prudently*).

- c. In Adverbs regularly compared, the Comparative is the same in form as the Neuter Accusative Singular of the Adjective (Comparative); as, *cārīus* (*more dearly*), *gravius* (*more heavily*), *ācrius* (*more eagerly*), *sapientius* (*more wisely*), *melius* (*better*).
- d. The Superlative of the Adjective belongs to the First and Second Declensions. Therefore, according to the rule given above (a), the Superlative of the Adverb will end in *ē*; as, *cārissimē*, *ācerrimē*, *facillimē*, *sapientissimē*, *pessimē*.

Comparison of Adverbs: Peculiar Forms.

39. Bene, *well* (from *bonus*), *melius*, *optimē*.

Magnopere, *greatly*; *magis*, *more*; *maximē*, *most*. There is no simple Adverb derived from the Positive of *magnus*. *Magnopere* = *magnō* + *opere*, and is used as the Positive of the Adverb. *Facile* is regularly used instead of *faciliter* (see a, below).

- a. The Accusative and Ablative Singular of the Adjective (Neuter) are very often used as Adverbs; as, *multum*, *multō* (*much*). *Facile* is regularly used, as stated above.
- b. These Adverbs are compared in like manner, though not formed from Adjectives:—

diū, *long* (*in time*), *diūtius*, *diūtissimē*.
saepe, *often*, *saepius*, *saeplissimē*.

Peculiar Meanings of Adjectives.

40. a. The Comparative may be variously translated; as, *audācior*, *bolder*, *rather bold*, *too bold*.

* *Audāciter* is usually written *audacter*.

- b. The Superlative may often be rendered by *very*; as, *vir optimus, a very excellent man*.
- c. *Quam* (adverb of degree) with the Superlative has a peculiar force. *Supplicium quam gravissimum* means *as severe punishment as possible*. So *quam plurimī*, *as many as possible*.
- d. *Per* gives to a Positive almost the meaning of a Superlative; as, *permagnus, very great* (that is, *thoroughly great*).

NUMERAL ADJECTIVES.

41. Numeral Adjectives are **Cardinal** and **Ordinal**, as in English (see 9, b, page 2); as, *ūnus, one*; *primus, first*.

- a. A third class of Numerals is composed of adjectives called **Distributives**. They answer the questions, *How many at a time?* *How many in a set?* Examples are *singuli, one by one*; *bini, two by two, in pairs*.

The lists of these Numerals are given in the Grammars and in the Appendix.

Declension of Numeral Adjectives.

42. a. Ordinal Adjectives are declined like *bonus*.

b. Distributive Adjectives are declined like the plural of *bonus*.

c. Cardinal Adjectives, from 4 to 100, inclusive, are *not declined*.

From 200 to 900, inclusive, they are declined like the plural of *bonus*; as, *ducentī, ac, a* (*two hundred*). The declension of the other Cardinal Adjectives is described in the next NOTE.

43. a. *Ūnus* is peculiar in its declension. In general it is like *bonus*, but it has *ūnius* in the Genitive Singular, all genders (instead of *ūnī, ūnac, ūnī*), and *ūnī* in the Dative Singular, all genders (instead of *ūnō, ūnac, ūnō*).

In the Plural *ūnī* means *alone* or *only*; as, *ūnī Ubī, the Ubī alone*.

- b. Like *ūnus* are declined these adjectives, which are not Numerals, but are placed here because their irregularities are the same as those of *ūnus*:—

<i>alius</i> (neuter, <i>aliud</i>), <i>other</i> .	<i>ullus, any</i> .
<i>nullus, no</i> .	<i>alter</i> (genitive, <i>alterius</i>), <i>the other</i> (of two).
<i>sōlus, alone</i> .	<i>neuter</i> (genitive, <i>neutrius</i>), <i>neither</i> .
<i>tōtus, whole</i> .	<i>uter</i> (genitive, <i>utrius</i>), <i>which</i> (of two).

- c. *Duo* has peculiar forms of declension, which are given in the Grammars and the Appendix.

REMARK. *Ambō* (*both*) is declined like *duo*.

d. *Trēs* (Neuter, *tria*) is declined like the plural of *fortis*.

e. *Mille* may be a Noun or an Adjective.

As a Noun : (1) it is Neuter and is declined like *mare*, but it *has*, in the Singular, only the Nominative and Accusative (*mille*); (2) it is always followed by the Genitive (123, c); as, *mille hominum*; *duo millia* (or *millia*) *passuum* (*two miles*).

As an Adjective, it is *not declined*, and may be used in agreement with a noun in *any case*; as, *mille viri*; *cum mille viris*.

NUMERAL ADVERBS.

44. Numeral Adverbs answer the question, *How often?* The list is given in the Grammars and the Appendix.

PRONOUNS.

45. Pronouns are of seven classes : —

1. Personal ; 2. Reflexive ; 3. Possessive ; 4. Demonstrative ; 5. Relative ; 6. Interrogative ; 7. Indefinite.

The Personal and Reflexive Pronouns are declined as Substantives ; their gender must be decided by the *sense*. All the other Pronouns are declined as Adjectives, having a separate form for each gender.

46. The *Personal Pronouns* are : First Person, *ego*, *I* (plural, *nōs*) ; Second Person, *tū*, *you* (plural, *vōs*). There is no Personal Pronoun of the Third Person in Latin ; but a Demonstrative (usually *is*) is used instead. As in English, this pronoun requires a separate form for each gender, and it supplies these forms. The declension of *is* is given under Demonstrative Pronouns.

REMARK. *Ego* and *is* can, of course, have no Vocative.

47. *Reflexive Pronouns* (that is, pronouns that *turn*, or *refer*, *back*) are so called because they *refer back* to the subject of their sentence or clause. Hence they have no Nominative or Vocative. The Reflexive Pronouns of the First and Second Persons have case-forms precisely like the Genitive, Dative, Accusative, and Ablative of the Personal Pronouns. The list is : First Person, *meī*, *of myself* (*nostrī*, *of ourselves*) ; Second Person, *tui*, *of yourself* (*vestri*, *of yourselves*) ; Third Person, *sui*, *of himself, herself, itself* (*sui*, *of themselves*). The plural of *sui* is declined like the singular.

CAUTION. Notice that *sui* cannot be used as a Third Personal Pronoun, for two reasons : (1) it has no Nominative ; (2) it is *always used reflexively*. The following conjugation of *laudō* in the Present Indicative,

with a subject and object expressed, will help to make clear the use of the Personal and Reflexive Pronouns :—

Ego mē laudō, <i>I praise myself.</i>	nōs nōs laudāmus.
tū tē laudās, <i>you praise yourself.</i>	vōs vōs laudātis.
is (ea) sē laudat, <i>he (she) praises himself (herself).</i>	ii (eae) sē laudant.

48. Possessive Pronouns are formed from the Personal and Reflexive Pronouns, and are declined as Adjectives of the First and Second Declensions. They are :—

meus (Vocative Singular, mī) *my*, or *mine*; tuus, *your*, or *yours*; suus, *his*, *her* (*hers*), *its*; noster, *our*, or *ours*; vester, *your*, or *yours*; suus, *their*, or *theirs*.

CAUTION. Suus (like suī) is used *reflexively*. When *his*, *her*, *its*, or *their*, is *not* reflexive, the Genitive of *is* should be used; as, dominus servum suum vocāvit, et opus ejus laudāvit, *the master called his (the master's) slave, and praised his (the slave's) work*. Beginners often find the meaning of suus troublesome. It is an Adjective, and must agree with its noun in *gender*, *number*, and *case*. Being *reflexive*, its meaning must be decided, not from its *ending*, but from the meaning of the Subject. The following sentences will make this clear :—

Rex servum suum vocat, *the king calls his slave*; rēgina servum suum vocat, *the queen calls her slave*; puerī mātrem suam amant, *the boys love their mother*; puellae patrem suum amant, *the girls love their father*.

49. Demonstrative Pronouns (that is, Pronouns that *point out*) agree with the Substantives which they limit in *gender*, *number*, and *case*. They are declined, for the most part, like Adjectives of the First and Second Declensions. They (particularly *is*) are often used as the Personal Pronoun of the Third Person (46). From their meaning, they all (except *ipse*) lack the Vocative. They are :—

hīc, <i>this</i> (near me);	is, <i>that</i> (when used Adjectively).
ille, <i>that</i> (near him, or yonder);	ipse, <i>self</i> .
iste, <i>that</i> (near you);	idem,* <i>the same</i> , = is + dem (an emphatic syllable).

REMARKS. 1. From their meaning, hīc, iste, ille, are often called *Demonstratives of the First, Second, and Third Persons*.

2. Is does not point out as definitely as hīc, ille, iste. It is very commonly used as an Antecedent to the Relative Pronoun; as, is quī, *he who* (*one who*, *a man who*). Sometimes it has no greater force than the

* For change of m to n (as eundem for eumdem) see 1 (5).

Article *the* ; as, *centum militēs eō tempore habuit, he had one hundred soldiers at the time.*

3. *Ipse* is used to add emphasis to some Noun or Pronoun ; as, *vōs ipsī, you yourselves ; vir ipse, the man himself (or the very man).*

50. The **Relative Pronoun** is *quī*. It has a separate form for each gender (*quī, quae, quod*), since it must agree in gender with its Antecedent. It is to be rendered *who, which, that*, according to the sense.

51. The **Interrogative Pronoun** resembles the Relative in declension. It has two forms, which are regularly used as follows :—

1. *quis, quae, quid*, used as a Substantive ; as, *quis mē laudat ? who praises me ? quid commisit ? what has he done ?*

2. *quī, quae, quod*, used as an Adjective ; as, *quī homō mē laudat ? what man praises me ? quod facinus commisit ? what deed has he done ?*

REMARK. *Quis* and *quī* are sometimes used for each other.

CAUTION. When the question refers to one of *two*, we must use *uter, utra, utrum* (*which of the two ?*).

52. **Indefinite Pronouns** do not refer to *definite* objects. The simple Indefinite (= *any*) is *quis* (or *quī*). We very seldom find this form, however, except in *compounds*, which, with a very few exceptions, are declined exactly like the Relative and Interrogative Pronouns. The compounds (in common use) that have peculiar forms are *aliquis, sīquis, nēquis*. These, like the Interrogative Pronoun, have two forms, — *quis* (Substantive), and *quī* (Adjective). These compounds are declined, in general, like the Relative and Interrogative ; but notice that they regularly have final *a*, where the Relative and Interrogative have final *ae* (except in the Nominative Plural Feminine).

a. *Aliquis* (= *alius + quis*) means, literally, *some one or other*.

b. *Sīquis* and *nēquis* are written as compounds, or as separate words.

This is because *sī* and *nē* are Conjunctions, and connect clauses as well as help in forming the compound pronouns.

c. The meanings of *aliquis, sīquis, nēquis*, are given here :—

SUBSTANTIVE.

aliquis, any one, some one ;

sīquis, if any one ;

nēquis, lest any one ;

ADJECTIVE.

aliquī, any, some.

sīquī, if any.

nēquī, lest any.

d. Other Indefinite Pronouns (the first part declined like the Relative and Interrogative) are : *quicumque, whoever or whosoever ; quīdam, a certain man (or a certain) ; quīvis* (= *quī + vis*, from *volō*), *any-you-please ; quisque, each, every.*

53. The following General Remarks on the Pronouns will be found useful :—

- a. The Preposition *cum* (*with*) is joined as an Enclitic (195, 3) to the Ablative of the Personal, Reflexive, Relative, and Interrogative Pronouns; as, *mēcum*, *nōbiscum*, *tēcum*, *vōbiscum*, *sēcum*, *quibuscum*; but *cum iis* (*his, illis*).
 - b. *Quisque* (*each*) with a Superlative has a peculiar meaning; as, *quisque sapientissimus*, *all the wisest*. That is, if *each* is wisest, then *all* are. So also, *quisque dītissimus*, *all the richest*.
 - c. The Enclitic *-que*, added to the simple Indefinite, gives it a *universal* force; as, *quis* (*any*); *quisque* (*each, every*).
- This same force is given to an Adverb, by adding *-que*; as, *ubi* (*where*), *ubique* (*everywhere*); *unde* (*whence*), *undique* (*from every side, on every side*).
- d. The Preposition *inter*, with a Reflexive Pronoun in the Plural, gives a peculiar force and meaning; as, *inter nōs amāmus*; *inter vōs amātis*; *inter sē amant*: *we (you, they) love each other*.

VERBS.

Special Note for Lesson II.

54. English Verbs are conjugated very much alike. In Latin, they are divided into four classes (called *Conjugations*), each Conjugation being somewhat unlike the others. They are called the First, Second, Third, and Fourth Conjugations. Just as we distinguish Declensions of Nouns by their Stems, so we distinguish one Latin Conjugation from the others by the Stem of its Present Tense, Indicative Mode, which we call the *Present Stem*. The following facts should be carefully studied :—

1. The **Present Stem**, in the First Conjugation, like the stem of nouns of the First Declension, ends in *a*. The Present Stems of *amō*, *vocō*, and *liberō*, are *amā*, *vocā*, *liberā*.

2. English verbs have very few changes of *form* in conjugation. For instance, the Present Indicative of *love*, in its common use, has *loves* in the Third Person Singular, but *love* in all the other persons of both numbers. Hence, a Personal Pronoun, as *Subject*, is needed to show what the person of each form is. In Latin verbs, however, there is a special ending for each person, in both numbers; and the Personal Pronoun can be omitted, because each ending shows what Personal Pronoun is to be supplied in translating. These endings are called **Personal Endings**.

In the Present Indicative of all regular verbs these Personal Endings are :—

SINGULAR.	1. -ō (<i>I</i>).	PLURAL.	1. -mus (<i>we</i>).
	2. -s (<i>you</i>).		2. -tis (<i>you</i>).
	3. -t (<i>he, she, it</i>).		3. -nt (<i>they</i>).

3. Each form in the Present Tense is composed of the **Present Stem**, plus the proper **Personal Ending**. In the First Person Singular the stem-vowel *a* unites with the personal ending; as, *vocō* (for *vocaō*), *amō* (for *amaō*). The following examples show how these forms are built up, and the exact meaning of each element in them :—

ama + nt (love they), voca + mus (call we), da + t (gives he).

4. *Vocō* may be translated in three ways : *I call* ; *I am calling* ; *I do call* (section 17, *a, b*, page 4).

5. It is evident, from what has been stated (2, 3, 4), that a single verb-form contains a Subject and Predicate, and hence *may* be a complete sentence in itself ; as, *amat, he loves*.

Special Note for Lesson VI.

55. The verb *Sum* (*I am*) is Irregular and Intransitive. Like the English verb *to be*, it cannot make a statement, but requires some word (usually a Noun or Adjective) to *complete* its meaning ; that is, it acts as a *Copula*, and requires a *Complement*. This Complement, whether a Noun or Adjective, must be in the same case as the Subject. Study carefully section 37, *a*, page 10.

The Present Indicative of *Sum* is thus inflected :—

SINGULAR.	1. <i>sum, I am.</i>	PLURAL.	1. <i>sumus, we are.</i>
	2. <i>es, you are.</i>		2. <i>estis, you are.</i>
	3. <i>est, he is.</i>		3. <i>sunt, they are.</i>

Notice that the Personal Endings, in several of the forms, are like those in the Present Tense of *amō*.

Transitive and Intransitive Verbs ; Voice ; Number ; Person.

56. Latin Verbs, like those in English, may be Transitive or Intransitive. Transitive Verbs have two Voices, Active and Passive. Intransitive Verbs have no Passive Voice in ordinary use. As in English, Verbs have two Numbers and three Persons.

Modes.

57. Latin Verbs have four Modes, which are very similar to those in English having the same names. They are :—

- a. The **Indicative**, which states a positive fact, or asks a direct question; as, *amat, he loves; quis vocat? who calls?*
- b. The **Subjunctive**, which does not state facts, but expresses something as uncertain, possible, impossible, desired, &c.; as, *si Rōmam videat, fēlix sit, if he should see Rome, he would be happy; servum laudēmus, let us praise the slave.*
- c. The **Imperative**, which commands; as, *amicōs amā, love your friends.*
- d. The **Infinitive**, which, in Latin as in English, does not state or command, and has no person or number. It expresses the idea of the verb indefinitely (see section 15, c, p. 4). As in English, it is very frequently used as a Verbal Noun; as, *scīre est regere, knowledge is power* (literally, *to know is to rule*): *cōnātur transire, he tries to cross.*

Participles.

58. Latin Verbs have four Participles, or *Verbal Adjectives* :—

- a. **Active**: Present and Future Participles.
- b. **Passive**: Perfect Participle and Gerundive (or Future Participle, Passive).

REMARK. These Participles agree with their Substantives in gender, number, and case, and (with the exception of the Present Participle, which is of the Third Declension, one ending) are declined like *bonus*.

Gerund; Supine.

59. Latin Verbs have two *Verbal Nouns* :—

- a. The **Gerund**, which is like the English Verbal Noun ending in *-ing*. It is declined like a noun of the Second Declension, but has no Nominative or Vocative. The Infinitive takes the place of the Nominative; as, *ars canendī, the art of singing; canere est jūcundum, singing (to sing) is pleasant.*
- b. The **Supine**, which is a Verbal Noun of the Fourth Declension. It has only the Accusative and Ablative. Its uses are peculiar, and will be described hereafter (191).

Tenses.

This NOTE should be studied in connection with sections 16, 17, page 4.

60. The Tenses named in this NOTE are those of the Indicative Mode. This Mode is the only one in which the Tenses properly distinguish time.

1. **Present**; as, amō, *I love.*
2. **Imperfect**; as, amābam, *I was loving.*
3. **Future**; as, amābō, *I shall love.*
4. **Perfect**; as, amāvī, *I have loved, or I loved.*
5. **Pluperfect**; as, amāveram, *I had loved.*
6. **Future Perfect**; as, amāverō, *I shall have loved.*

61. A comparison of these Tenses and their meanings with the Table on page 4 will show that, —

1. The *Present*, *Future*, and *Future Perfect* have the same meaning as the English tenses called by the same names.

2. The *Imperfect* is like the Past Imperfect (or *Progressive*); that is, it denotes an action as *going on* (or *customary*) in past time; as, laudābat, *he was praising (he kept praising, he used to praise)*. It must be carefully distinguished from the Perfect.

3. The *Perfect* has two meanings, as different from each other as though they represented two distinct tense-forms, instead of one. These are: —

- a. The meaning of the English *Present Perfect*; as, laudāvī, *I have praised*. This is called the *Perfect Definite* (that is, *I have just finished praising*).
- b. The meaning of the English *Past (Indefinite)*; as, laudāvī, *I praised*. This is called the *Perfect Indefinite* * (that is, *I praised at some indefinite time in the past*).
4. The *Pluperfect* is like the English *Past Perfect*.

SPECIAL NOTE.†

62. As the Perfect has two meanings, and is really equivalent to two tenses, it may be found less confusing to give a distinct name to each of these uses. We may, therefore, regard the Tenses as *seven* in number. The word *Aorist* means *Indefinite*, and therefore the tenses may be thus named: —

1. *Present*; 2. *Imperfect*; 3. *Future*; 4. *Perfect* (English, *Present Per-*

* This is also called the *Perfect Historical*.

† This Note is for the use of those who prefer the *seven-tense* system, and may be omitted by others.

fect : *I have loved*); 5. *Aorist* (English, *Past* : *I loved*); 6. *Pluperfect* ; 7. *Future Perfect*. The *Perfect* is the same as the *Perfect Definite*, and the *Aorist* is the same as the *Perfect Indefinite*.

Tenses of the different Modes.

63. *a*. The **Indicative** has all the tenses. As in English, it is the only Mode in which the tenses actually distinguish *time*.

b. The **Subjunctive** lacks the *Future* and the *Future Perfect*. How it supplies this lack will be explained hereafter. The real *time* denoted by the tenses of the Subjunctive must often be decided, as in English (19, page 6), by the *sense*.

c. The **Imperative** has two tenses : *Present* and *Future*. The Present, as in English, has only the Second Person. The Future has the Second and Third Persons ; *it is seldom used*.

d. The **Infinitive** has three tenses : *Present*, *Perfect*, and *Future*. The Future Infinitive, Active, is made up of the Future Active Participle and *esse* (Present Infinitive of *sum*). The Future Infinitive, Passive, is described later.

e. The tenses of the **Participles** have already been given (58).

Personal Endings.

64. In English, the verb-form *love* may be in the Present Indicative First or Second Person Singular, or in the First, Second, or Third Person Plural ; a Personal Pronoun, as subject, must be expressed, or other words given, before we can tell in what person the verb-form is. In a Latin tense, however, each of the six forms shows its person by its *ending*, and the Personal Pronouns may be, and usually are, omitted. These endings are therefore called *Personal Endings* (54, 2). Only the Indicative, Subjunctive, and Imperative have Personal Endings. The endings of the Perfect Indicative (Active) and the Imperative are peculiar, and are given separately. The following table shows the Personal Endings :—

a. Personal Endings : Indicative and Subjunctive.

ACTIVE.		PASSIVE.		SUBJECT.
SINGULAR.	1. m (or o)	SINGULAR.	1. r	I.
	2. s		2. ris (or re)	you.
	3. t		3. tur	he, she, it.
PLURAL.	1. mus	PLURAL.	1. mur	we.
	2. tis		2. mini	you.
	3. nt		3. ntur	they.

b. *Perfect Indicative, Active.*

SINGULAR.	1. i.	PLURAL.	1. imus.
	2. isti.		2. istis.
	3. it.		3. erunt (or ěre).

c. *Imperative.*

	3. ntō.		3. ntor.

Conjugations.

65. Latin Verbs are divided into four Conjugations (54). They are distinguished by the vowel before *re* in the Present Infinitive Active. That part of the Present Infinitive which is left after taking away *re* is called the *Present Stem*. This Present Stem is here shown for the four Conjugations : —

CONJUGATION.	PRESENT INFINITIVE.	PRESENT STEM.
I.	amāre.	amā.
II.	monēre.	monē.
III.	regēre.	regē.*
IV.	audire.	audi.

Principal Parts.

66. The Principal Parts of a verb are so called because from them all the other forms of the verb are made up. They are *four* in number. The Roman figures indicate the Conjugations : —

	I.	II.	III.	IV.
<i>Present Indicative.</i>	amō.	moneō.	regō.	audiō.
<i>Present Infinitive.</i>	amāre.	monēre.	regēre.	audire.
<i>Perfect Indicative.</i>	amāvī.	monuī.	rexī.	audīvī.
<i>Supine.</i>	amātum.	monitum.	rectum.	audītum.

* The *Verb-Stem* of the Third Conjugation is usually *not* the same as the Present Stem. It is described in 79, 2, and α.

REMARK. As the Passive has no Supine, it has but three Principal Parts; as, *Present Indicative*, *amor*; *Present Infinitive*, *amāri*; *Perfect Indicative*, *amātus sum*.

Stems.

67. A Verb has three Stems: Present, Perfect, and Supine. The Present Stem has been described in **65**. To find the Perfect Stem, cut off *i* from the Perfect Indicative. To find the Supine Stem, cut off *um* from the Supine. The Stems of the verbs given in **66** are:—

	PRESENT STEM.	PERFECT STEM.	SUPINE STEM.
I.	amā-	amāv-	amāt-
II.	monē-	monu-	monit-
III.	regē-	rex-	rect-
IV.	audī-	audīv-	audīt-

Formation of Tenses: Indicative Active.

68. a. The *Present* has no Tense Sign. It = Present Stem + Personal Endings. In the First and Third Conjugations, the stem-vowel is lost before *o* (as, *amō* = *amaō*). In the Third, there are vowel changes. In the Fourth, the Third Person Plural is *audiunt* (not *audi-nt*).

b. The *Imperfect* always has the Tense Sign *ba*. The vowel *e* (before *ba*) is always *long*.

c. The *Future* of the First and Second Conjugations always has the Tense Sign *bi*. The *i* disappears before *o* [as, *amāb(i)ō*, *monēb(i)ō*], and becomes *u* in the Third Person Plural.

The *Future* of the Third Conjugation consists of the Present Stem + Personal Endings. *E* becomes *a* in the First Person Singular. Verbs in *io* retain the *i* (like those of the Fourth Conjugation).

The *Future* of the Fourth Conjugation consists of the Present Stem + *am, ēs*, etc. It is inflected like that of the Third Conjugation.

d. The *Perfect* = Perfect Stem + Personal Endings of the Perfect, for all Conjugations.

e. The *Pluperfect* always has the Tense Sign *ēra*.

f. The *Future Perfect* always has the Tense Sign *ēri*. The *i* disappears before *o* [as, *monuēr(i)ō*, *amāvēr(i)ō*].

Formation of Tenses: Subjunctive Active.

69. a. The Present consists, in the First Person Singular of the

(1.) *First Conjugation*, of the Present Stem + *m*; *a* is changed to *e*.

(2.) *Second Conjugation*, of the Present Stem + *am*.

(3.) *Third Conjugation*, of the Present Stem + *m*; *e* changed to *a*.

(4.) *Fourth Conjugation*, of the Present Stem + *am*.

- b.* The Imperfect always has the Tense Sign *re*. It may be obtained by adding *m* to the Present Infinitive Active.
- c.* The Perfect always has the Tense Sign *eri*.
- d.* The Pluperfect always has the Tense Sign *isse*.

Formation of Tenses: Imperative Active.

70. The Present, Second Person Singular = Present Stem. As the forms of the Imperatives of the four Conjugations differ somewhat from each other, and are apt to confuse a beginner, this simple Rule will be found useful: *All the forms of the Imperative Active (except the Present, Second Singular) can be obtained from the Present Indicative (Second and Third Persons) by changing the Personal Endings to those of the Imperative.*

Formation of Tenses: Infinitive Active.

- 71. *a.* Present = Present Stem + *re*.
- b.* Perfect = Perfect Stem + *isse*.
- c.* Future = Future Participle + *esse* (Present Infinitive of *sum*).

Formation of Participles, Gerund, and Supine.

- 72. *a.* Present Participle = Present Stem + *ns* or *ens*; as, *ama-ns*, *rege-ns*, *audi-ens*.
- b.* Future Participle = Supine Stem + *urus*; as, *amāt-urus*.
- c.* Gerund = Present Stem + *ndī* or *endī*; as, *ama-ndī*, *audi-endī*.
- d.* Supine = Supine Stem + *um*; as, *monit-um*.

Formation of Tenses: Indicative Passive.

- 73. *a.* The Present is formed as in 68, *a*, but with Passive endings. Notice, however, that in the Third Conjugation, the Second Person Singular has *es* and not *i*; as, *regēris* (Active, *regis*).
- b.* The Imperfect has the regular Tense Sign and Passive endings.
- c.* The Future of the First and Second Conjugations has the Regular Tense Sign; but notice that the Second Person Singular has *bē* (not *bī*); as, *amābēris*, *monēbēris*. The Future of the Third and Fourth Conjugations has the same general form as the Future Active, with Passive endings; as, *regēris*, *audiēris*.
- d.* The Perfect Stem is not used in the Passive Voice. The Perfect, Pluperfect, and Future Perfect, Passive, are compound, consisting of the Perfect Passive Participle with *sum*, *eram*, *erō*.

Formation of Tenses: Subjunctive Passive.

74. a. The *Present* and *Imperfect* are formed as the same tenses are in the Active, but with Passive endings.

b. The *Perfect* and *Pluperfect* are compound, and consist of the *Perfect Passive Participle* with *sim* and *essem*.

Formation of Tenses: Imperative Passive.

75. Notice :—

a. That the Second Person Singular, Present, is the same in form as the *Present Infinitive Active*.

b. That there is no Second Person Plural in the Future.

c. That the other forms can be obtained from the Present Indicative Passive according to **70**.

Formation of Tenses: Infinitive Passive.

76. a. In the First, Second, and Fourth Conjugations the *Present* is formed by changing final *e* of the Present Infinitive Active to *L*. In the Third it is formed from the *Present Stem* by changing *ĕ* to *I*; as, *amāri*, but *regi*.

b. The *Perfect* = *Perfect Passive Participle* + *esse*.

c. The *Future* = *Supine* (Accusative) + *iri*. The word *iri* is the Present Infinitive Passive of *eō* (*I go*), and *amātum iri* has the idea of *going to be loved*. This tense of the Infinitive is a peculiar form and one seldom used. What takes its place will be explained hereafter.

Formation of Passive Participles.

77. a. The *Perfect* = *Supine Stem* + *us*; as, *amāt-us*.

b. The *Gerundive* (or *Future Participle*) = *Present Stem* + *ndus* or *endus*; as, *ama-ndus*, *audi-endus*.

Synopsis.

78. A Synopsis is a general outline of a Verb. The following Synopsis of *amō*, *I love*, shows from what Stem each form is made. In the Synopsis of any other Conjugation the same *Modes*, *Tenses*, etc., would be formed from the same Stems. The only differences would be those peculiar to each Conjugation, and described in **68-77**.

Some Peculiarities of the Four Conjugations.

79. Most verbs of the First and Fourth Conjugations have Principal Parts that are quite similar. The Perfect Stem is formed by adding **v**, and the Supine Stem by adding **t**, to the Present Stem; but the Second and Third Conjugations, and some verbs of the First and Fourth, have peculiarities which should be carefully noticed.

1. Only a few verbs of the Second Conjugation form their Perfect and Supine Stem by adding **v** and **t** to the Present Stem. **Dēlēō**, *I destroy*; **flēō**, *I weep*; and the compounds of **plēō**, *I fill* (as, **complēō**), are those in common use; as, **complēō**, **complēre**, **complēvi**, **complētum**.

Most verbs of the Second Conjugation form the Perfect by changing **v** to **u** (3, p. 17), and the **e** of the stem disappears; as, **monuī** (for **moneuī** = **monēvi**). They form the Supine by changing *long e* of the stem to *short i*; as, **monitum** (for **monētum**).

2. The Third Conjugation (like the Third Declension) has the greatest variety of forms of all the Conjugations. These differences occur in the Perfect and Supine, and can be best learned by practice. In other Conjugations the Present Stem (sometimes slightly changed) is usually found in all the Principal Parts; but, in the Third Conjugation, the final **ē** of the Present Stem rarely appears, in any form, in the Perfect and Supine Stems. **Rege-**, therefore, is called the Present Stem of **regō**, but **reg-** is the *Verb-Stem*.

a. The Third Conjugation is like the Third Declension in another respect: in many verbs **s** is added to the Verb-Stem to form the Perfect Stem (as, **reg** + **s** = Perfect Stem **rex**), just as **s** is added to the Stem to form the Nominative Singular; as, **reg** + **s** = **rex**, *a king*. Likewise **mitti** (Perfect of **mittō**) = **mitt-si**.

3. **Verbs of the Third in iō**. Some verbs of the Third Conjugation end in **iō**, and have some forms, in the Present-Stem Tenses, like those of the Fourth Conjugation. They are called *Verbs in iō*. **Capiō**, *I take*, is one of this class. Notice this simple Rule for remembering its irregularities: *Verbs in iō have the forms of the Fourth Conjugation wherever the Fourth has i followed by a vowel*. Hence we have **capiō** (**audiō**); **capiēbam** (**audiēbam**); **capiens** (**audiens**); but **capere** (**audire**).

4. **V** is often dropped in the Perfect, Pluperfect, and Future Perfect; as, **audieram** (= **audiveram**); **iit** (= **ivit**). Sometimes a contraction takes place; as, **amasse** (= **amāvisse**); **consuesse** (= **consuevisse**).

5. **Dicō**, **dūcō**, **faciō**, **ferō**, and their compounds, drop final **e** in the Imperative Present, Second Singular, making **dīc**, **dūc**, **fac**, **fer**.

6. The Perfect Stem of some verbs doubles the first two (sometimes three) letters of the Present Stem, often with vowel changes. This is

called *Reduplication* (that is, *redoubling*); as, *currō* (Perfect, *cucurrī*); *dō* (Perfect, *dedī*); *stō* (*stetī*); *pellō* (*pepulī*); *cadō* (*cecidī*); *caedō* (*cecidī*); *discō* (*didicī*); *poscō* (*poposcī*).

REMARK. In compounds, the *reduplication* is dropped; as, *repellō*, *repulī*; *incidō* (= in + *cādō*), *incidī*; *incidō* (= in + *caedō*), *incidī*. But compounds of *dō* and *stō* *always*, and those of *currō* and some others *often*, retain it; as, *addō* (*addidī*); *instō* (*institi*); *dēcurrō* (*dēcucurrī*).

7. Many verbs of the Third Conjugation do *not* add *s* to form the Perfect Stem. The following verbs, in common use, should be noticed:—

a. *Legō* (Perfect, *lēgī*), *I choose, read*.

Three compounds of *legō*, however, have *x* in the Perfect: *diligō* (*not dēligō*), *intelligō*, *negligō*.

b. *Vertō* (Perfect, *vertī*), *I turn*.

c. Verbs having *nd* before final *o*; as, *scandō* (*scandī*); *incendō* (*incendī*); *contendō* (*contendī*).

8. Section 4, *d* (p. 18), will be found useful, as explaining many of the consonant changes taking place in the Third Conjugation; as, *reg-ō*, *rec-tum*; *scrib-ō*, *scriptum*.

Deponent Verbs.

80. Deponent Verbs have a *Passive* form but an *Active* meaning. The name (*Deponent*) means *putting off, or aside*, because they lay aside (*dēpōnunt*) the *Passive* sense. They occur in all four Conjugations, and are inflected like the *Passive* of other verbs of these Conjugations. Of course, the Present Imperative, Second Singular, has the same form as the Present Infinitive Active *u.uld have*.

CAUTION. Notice that, in Deponent Verbs, —

a. The *Future Infinitive* is taken from the *Active Voice*; as, *hortātūrus esse* (*not hortātum iri*).

b. The forms of *both voices* are found after the Infinitive Mode; that is, a Deponent Verb has *all four Participles, the Gerund, and the Supine*.

REMARKS. 1. Deponents are the only Latin verbs that have a Perfect Participle *with an Active meaning*. 2. The Gerundive is regularly *Passive* in meaning; as, *militēs cohortandī sunt*, *the soldiers must be exhorted*. 3. The Perfect Participle is sometimes *Passive* in meaning.

Semi-Deponent Verbs.

81. Four verbs have no Perfect Stem, and are half Active and half Passive in form. They form the Present-Stem tenses, etc., regularly,

according to their Conjugations. All other forms they borrow from the Passive; hence they are called Semi-Deponent (*half-deponent*). Their meaning is Active. The list is: *audeō, audēre, ausus sum, I dare; gaudeō, gaudēre, gāvīsus sum, I rejoice; soleō, solēre, solitus sum, I am accustomed; fidē, fidere, fīsus sum, I trust.*

Periphrastic Conjugations.

82. The word *Periphrastic* is derived from two Greek words, and means *roundabout speaking*. The English word *circumlocution* (*circum, around, and loquor, I speak*) means the same thing. The *Future Infinitives*, Active and Passive, are examples of *roundabout speaking*. *Amātūrus esse* means, literally, *to be about to love*; *amātum iri* has the general idea of the English *going to be loved*. Other forms might be mentioned, which, like the English *I am going to go*, state something in a roundabout way. In Latin there are two Conjugations (compound in their forms), which, from the frequency of their use, are called *the Periphrastic Conjugations*. They are thus formed:—

- a. The First, or **Active, Periphrastic Conjugation** consists of the *Indicative, Subjunctive, and the Present and Perfect Infinitive of sum*, with the *Future Active Participle*. It expresses *intention*, or that something is *going to happen*; as, *amātūrus sum, I am about to love, intend to love, am going to love.*

REMARK. The Subjunctive has no Future Tense. The Present is sometimes used with a Future meaning; but when Future time is to be *accurately stated*, and *distinguished* from Present time, the form *sim* with the Future Active Participle must be used. *Amātūrus sim* may, therefore, be called the *Future Subjunctive* of *amō*; as, *dubium est utrum filium amātūrus sit, necne, it is doubtful whether he will love his son, or not (utrum amet = whether he loves).*

- b. The Second, or **Passive, Periphrastic Conjugation** has the same Mode and Tense forms as the First; but the *Gerundive* is used. It expresses *necessity, duty, etc.*; as, *amandus sum, I ought to be loved, must be loved; amandus fui, I was (worthy) to be loved, ought to have been loved.*

Irregular Verbs.

83. Each Conjugation forms its Principal Parts according to its own laws. Many verbs in these Conjugations, however, do not strictly obey these laws. For example, *petō* and *quaerō* belong to the Third Conjugation; yet they have *petīvi, quaesīvi*, in the Perfect (more like the Fourth than the Third Conjugation). We do not, however, call such verbs

Irregular, because their stems and inflection are, *in general*, like those of their own conjugation. We call those verbs *Irregular*, which have two or three stems entirely unlike each other (like English *am*, *was*, *been*; *go*, *went*, *gone*), or which have some forms of inflection not to be found in the four Conjugations. In studying an Irregular Verb, always notice how much of it is *regular*, as well as what are the *irregular* forms. The most common *Irregular Verbs* are *sum*, *ferō*, *eō*, *fiō* (and their compounds), *volō*, *nōlō*, *mālō*.

84. *Sum*, *I am*, has these stems : Present, *es* ; Perfect, *fu* ; Supine, *fut* (found only in the Future Participle). Its chief peculiarities are : —

- a. In the Present Indicative, *sum*, *sumus*, *sunt*, have lost the *e* (as though '*sum*, etc.). The same is true in the Present Subjunctive ; as, *sim* (for *esim*).
- b. The stem *es* becomes *er* in the Imperfect and Future Indicative, according to **1** (2).
- c. The *Supine*, *Gerund*, and *Present Participle* are wanting. The Present Participle (used as an adjective) is found in three compounds : *potens*, *absens*, *praesens*. Therefore we may say that, *if sum had a Present Participle, it would be ens*.
- d. Instead of *futūrus esse* we often find *fore*, and instead of *essem*, *forem* is sometimes used.

85. Two Compounds of *sum* have peculiar forms : —

1. *Possum*, *I am able*, *I can*, is made up of the adjective *potis*, *able*, and *sum*, *I am*. Only the first syllable of *potis* (*pot*) is employed, so that the verb is really *potsum* (**1** (4) *b*). The same change occurs wherever *pot* would stand before *s* ; as, *possunt*, *possim* (for *potsunt*, *potsim*). *Potesse* is shortened to *posse* (hence the Imperfect Subjunctive is *possem*), and *f* is dropped from *fuī*, etc. (*potuī*, *potuisse*, etc., for *potfuī*, *potfuisse*).

It has a Present Participle (used only as an adjective); but no *Imperative*, *Future Participle*, *Gerund*, or *Supine*.

2. *Prōsum*, *I am helpful*, *I assist*, takes *d* before *e* ; as, *prōdesse*, *prōdest*, *prōderam*, etc. The form *prōd* is used to separate the vowels, just as *re*, *back*, and *eō*, *I go*, form the compound *redeō*, *I go back* (like the English *an*, not *a*, before words beginning with a vowel).

86. *Ferō*, *I bear*, has three stems, very unlike each other : Present, *fere* (sometimes *fer*); Perfect, *tul* ; Supine, *lāt*. The tenses formed from the Present Stem are exactly like those of the Third Conjugation with these exceptions : —

- a. The vowel *e* (or *i*) is lost : (1) in certain forms of the Present Indicative, Active and Passive ; (2) in the Imperfect Subjunctive,

Active and Passive; (3) in the Imperative (certain forms), Active and Passive; (4) in the Infinitive, Active and Passive. The Present Infinitive Passive (*ferri*) is the most irregular of all the forms. If like the Third Conjugation, it would be *feri* (like *regi*); but it has *rr*, as though it had been shortened from *ferēri*.

87. Eō, *I go*, has the stems *i*, *iv*, *it*; hence it resembles a verb of the Fourth Conjugation. It has these irregularities:—

- a. The vowel *i*, unlike the Fourth Conjugation, is *short* in the Supine stem; as, *itūrus*.
- b. The Present stem is changed to *e* before *a*, *o*, *u*; as, *eō*, *eunt*, *eam*.
- c. The Future Indicative is *ibō*, a mixture of the First (or Second) and Fourth Conjugations.
- d. The Present Participle has *euntis*, etc., in the Genitive and other cases, instead of *ientis* (as, *audientis*). The Gerund is *eundi* (not *iendi*, as in *audiendi*).

REMARK. Although *eō* is Intransitive, yet some of its compounds (with Prepositions) are Transitive, and are followed by the Accusative; as, *adeō*, *I approach*; *transeō*, *I cross*; *subeō*, *I undergo*.

88. Fiō, *I am made*, *I become*, is used as the Passive of *faciō*, and also, as its second meaning indicates, as an Intransitive verb, in the sense of *become*, *happen* (that is, *to be brought about*). Some of its tenses evidently are the Passive of *faciō*. Its peculiarities are:—

- a. The Present Infinitive is *fieri*.
- b. The Imperfect Subjunctive is formed as though the Present Infinitive were *fieri*.
- c. Tenses formed from the Present stem have Active *endings*, but (frequently) Passive *meanings*.

REMARK. Compounds of *faciō* with *prepositions* have regular Passive forms, with vowel changes (2); as, *conficior*, *confici*, *confectus sum*. Other compounds do not change the vowel *a* to *i*, and have *fiō* in the Passive; as, *benefaciō*, *I benefit* (Passive, *benefiō*, *benefieri*, *benefactus sum*). So that this simple rule may be followed: *Faciō always has fiō in the Passive; but ficiō is regular*. The Imperatives Passive of *faciō*, *conficiō*, *benefaciō*, are *fi*, *conficere*, *benefi*.

89. Volō, *I am willing*, *wish*, resembles, in some respects, the Third Conjugation (as in the Future Indicative). It has these peculiarities:—

- a. The Present Infinitive *would be volere*, if of the Third Conjugation. The *o* is changed to *e* (= *velere*); then, as in *ferere*, the second *e* is dropped (= *velre*); then the *r* is assimilated (*made like*) to the *l* (= *velle*). This same *e* is also seen in the Present and Imperfect Subjunctive (*velim*, *vellem*).

b. The Present Indicative *would have* **volis, volit, volimus, volitis**.

Volis is shortened to **vis**; **volit** to **vult** (= **volt**); **volitis** to **vultis** (= **voltis**). **Volimus** becomes **volumus** (like **sumus**).

c. **Velim** (Present Subjunctive) = **volam**.

d. Lack of forms, as shown in the Grammars and Appendix.

90. Volō has two compounds: **nōlō**, *I am unwilling*, and **mālō**, *I would rather, I prefer*. **Nōlō** = **nōn volō**; **mālō** = **magis volō** (as though it were **mavolō**). Their similarity to **volō** will be seen in their conjugation.

REMARK. Notice that **nōlō** is the only one of the "**volō** class" that has an Imperative. Notice, also, that this Imperative is a mixture of the Fourth and Third Conjugations.

Defective Verbs.

91. Defective Verbs are such as lack many tenses, or parts of tenses. The most important Defective Verbs are these three, which have no tenses formed from the Present stem:—

1. **Coepī**, *I began*. The verb **incipiō**, *I begin* (**in** + **capiō**), supplies the place of the Present; as, **incipiunt crēdere**, *they begin to believe*. When **coepī** is followed by a Passive Infinitive, it is expressed in a Passive form; as, **urbem aedificāre coepērunt**, *they began to build the city*; but **urbs aedificārī coepta est**.

2. **Memini**, *I remember*, and **ōdī**, *I hate*. These verbs have, in the Perfect, Pluperfect, and Future Perfect, the meaning of the Present, Imperfect, and Future. From the fact that they employ the tenses of *completed* action to express the meaning of the tenses of *incomplete* action, they are often called *Preteritive* (**praeter** + **ire**, *to pass by*); that is, they have only the tenses of *completed* action. **Memini** has these Imperative forms: **mementō**, **mementōte** (Future).

REMARK. The Perfect of **noscō**, *I begin* (or *learn*) *to know*, and also that of **consuescō**, *I become accustomed*, have the same peculiarity, and mean, *I know* (that is, *I have finished beginning, and now know*); *I am accustomed* (that is, *have become accustomed*). See **93, d**.

a. **Inquam**, *say I, quoth I*, has only one complete tense, the Present Indicative. It is used in *direct quotations only*, and never stands first; as, "**Venite**," inquit, "**in castra**."

b. These have Imperative forms only: **salvē!** **avē!** *hail!*

Impersonal Verbs.

92. Study section 26, page 8. In Latin, as in English, an *Impersonal Verb* is one having no *personal* subject, and is used only in the Third

Person Singular; but these verbs are more numerous in Latin than in English, forming a class of words very important and very frequently used. With such verbs we often, in English, use *it* as a subject; as, *it rains*. We hardly know what part of speech to call *it*. In Latin no such word was expressed; as, *pluit, it rains*.

CAUTION. It must be clearly understood, at the very first, that *every Latin verb has a subject*; and that, if the subject is not *expressed*, it is to be *understood*. The subject of an Impersonal Verb is its *general idea* (that is, its *stem*). *Pluit* means *rain is falling*; *tonat, thunder crashes, roars*, etc. There are a few Impersonal Verbs in Latin that we cannot translate into English, giving the full value to the *stem* as subject, since the same thought is *differently expressed* in the two languages. For instance, *me oportet* really means *necessity compels me*; but the English would be *I must*, and therefore we must so render it. Almost all Impersonal Verbs, however, *can* and *should* be rendered with the *stem* (or *thought*) as subject; as, *pugnātur, fighting* (or, *the fight*) *is carried on* (not *they fight*, or *it is fought*).

93. Impersonal Verbs, in Latin, are of two kinds: (1) Those whose regular use is Impersonal; (2) Those often used Impersonally.

1. *Verbs regularly Impersonal*. These are:—

- a. Verbs denoting *states of the weather*, etc. (as in English); as, *pluit, it rains*; *ningit, it snows*; *grandinat, it hails*; *tonat, it thunders*; *lūcescit, it grows light*; *vesperascit, it's getting dark*, or *drawing towards evening*. The real subjects of these verbs (their *stems*) might be thus expressed: *rain, snow, or hail, is falling*; *thunder sounds, crashes*, etc.; *light (lux) begins to appear*, or *break*; *evening (vesper) draws near*.
- b. Verbs denoting *mental state*. These must be rendered according to the *English use* of such words; as, *mē pudet, I am ashamed* (literally, *a feeling of shame possesses me*). The most common of these verbs are given here, with the Accusative Case, which is regularly used with them as *object*, though, in translating, the English requires the Accusative to be rendered as though it were the *subject*: *mē miseret, I pity*; *vōs poenitet, you are sorry for*, *you repent*; *tē pudet, you are ashamed*.
- c. Verbs having a *Phrase or Clause* as subject (as in English). Many of these are also used with *personal subjects*. Some of them are: *libet, it pleases*; *licet, it is permitted* (English, *license*); *oportet, it is necessary*; *accidit, it happens*; *accēdit, there is another* (added) *reason* (usually translated, *it is added*); *vidētur, it seems best*; *restat, it remains*; *praestat, it is better*.

2. Very many verbs may be used *Impersonally*. Some of them have been given above (c) ; as, *accidit, accēdit, vidētur*. A very large class of them is composed of Passive forms of Intransitive verbs. *Intransitive verbs can be used in the Passive only Impersonally*. A variety of such forms is given under 198. A few of those most commonly used are given here (notice that *the stem of the verb is the subject*): *pugnātur, pugnātum est, pugnandum est, fighting is, was, must be carried on ; nōbis mātūrandum est, haste must be made on our part (or, we must hurry) ; nocētur, harm is done, injury is inflicted ; manētur, a stay (or stop) is made ; itur, a march is made, is in progress ; imperātum est, the order was given*.

ADVERBS.

94. Learn section 28, page 9.

Adverbs have the same use in Latin as in English, and are divided into the same classes. Latin Adverbs may be, —

- a. Derived from Adjectives or Participles (see 38) ; as, *cārē, ācritē, doctē*. The Comparative of an Adverb is regularly the same in form as the Neuter Accusative of the Adjective (Comparative). See, also, d, below.
- b. Derived from Nouns ; as, *diū, noctū, partim*.
- c. Simple ; as, *saepe*.
- d. Besides the forms mentioned in a, b, c, there are forms of adjectives and pronouns used as adverbs. They can usually be explained as cases.

1. The Accusative and Ablative, Neuter, are often used as adverbs. The Accusative usually denotes *Degree or Extent* (142, c), and the Ablative, *Degree of Difference* (155) ; as, *plūrimum potest, he is very (or most) powerful* (literally, *he is powerful to a very great degree*) ; *hostium impetūs paulum tardāti sunt, the attacks of the enemy were checked a little* (literally, *to a slight extent*) ; *nuntii multō crēbriōrēs erant, the messages were (by) a great deal more frequent*.

2. The Feminine Ablative Singular is often used as an adverb (the noun being omitted) ; as, *quā, ūnā, ultrā, inf(e)rā (parte or viā), whither (by which way), together (by one way), beyond (on the farther side), below (on the under side)*.

PREPOSITIONS.

95. Prepositions, in Latin as in English, are *connectives* (see 29, page 9). When not used as connectives, they are adverbs* (as in English) ;

* This is the original use.

as, paulō post (or ante) vēnit, *he came a little while after (or before)*. They are followed by the Accusative or Ablative. The Accusative is used with about *thirty* prepositions; the Ablative with about *one third* as many. Those (in common use) which are *always* used with the Ablative are *seven* in number. They are given below in rhyme, that they may be more easily remembered :—

ā (or ab), dē;
cum, ex (or ē);
sine, prō, prae.

- a. Two of these have double forms : ā and ē are used *only* before words beginning with a *consonant*; ab and ex before those beginning with a *vowel or consonant* (somewhat like *a* and *an* in English); as, ā (or ab) flūmine, ē silvā; but ab urbe, ab hōc oppidō (see 4, b, page 17), ex agrō.
- b. Notice that ā (ab) means *away from*; ē (ex), *out of*; as, ā flūmine, *from the river*, that is, *from the river-bank*; but ē flūmine, *out of the river*.
- c. In and sub with the Accusative answer the question *Whither?* with the Ablative, the question *Where?* as, in oppidum vēnit, *he came into the town*; sub jugum missi sunt, *they were sent under the yoke*; but in hortō ambulat, *he is walking in the garden*; sub monte castra pōnit, *he pitches his camp at the foot of the mountain*.

CONJUNCTIONS.

96. Conjunctions, in Latin as in English (see 30, page 9), are :—

- (1.) *Co-ordinate*; as, et, *and*; sed, *but*.
- (2.) *Subordinate*; as, si, *if*; quod, *because*; ut, *that, so that*; nē, *lest, that not*; quum, *when, since, although*.

a. There are three words meaning *and* :—

1. Et, *and*, connects *independent* words, phrases, and clauses.
2. Que, *and*, always an Enclitic (195, 3), connects words, etc. that naturally form a *pair* of objects or thoughts, or convey one general idea; as the names of two men in partnership, a general *and* his army, the senate *and* the people. Que is joined to the *second* of the two words connected. If it connects clauses, it is joined to the *first* word of the second clause.

3. Atque (sometimes written āc) = ad + que, and hence means *and in addition, and too, and also*. It indicates that the second word, etc., is more important than the first; as, milites atque imperator, *the soldiers and the commander, too*. It is often used after words denoting *comparison*, etc., meaning *as or than*; as, aliter āc, *otherwise than*.

- b. Regularly, with several words, *et* was either used *before all but the first*, or was omitted entirely ; as, *equi et arma et obsidēs*, or *equi, arma, obsidēs*.

INTERJECTIONS.

97. Interjections are used as in English (see 31, page 9).

DERIVED AND COMPOUND WORDS.

Endings.

98. Many derived words have endings that give them special meanings. A few of those most common are given in this NOTE.

- a. **Nouns** composed of the Supine stem of Verbs + *or* denote the *male agent* ; as, *amātor, monitor, rector, auditor, inventor, victor*. Some nouns, derived from other *nouns*, have the same ending *tor*, and denote the *agent* ; as, *viātor, a traveller* (from *via*). A change of *tor* to *trix* gives a noun denoting the *female agent* ; as, *victrix, inventrix*.
- b. **Nouns** and **Adjectives** ending in *ulus* (*a, um*) denote *smallness*, and are called *Diminutives* ; as, *rivus, a stream, rivulus, a rivulet, or streamlet* ; *parvus, small, parvulus, very small* ; *adolescens, a youth, adolescentulus, a mere youth*.
- c. **Adjectives** ending in *ōsus* denote *fulness* ; as, *studiōsus, zealous, studious* (*full of study*) ; *bellicōsus, warlike* (*filled with the desire of war*).
- d. **Verbs** ending in *scō* denote the *beginning of an act* ; as, *noscō, I begin to know, or learn* ; *cognoscō, I find out* ; *lūcescit, day begins to break*. They are called *Inceptives* (from *incipiō, I begin*), and are of the Third Conjugation. See 91, 2, REMARK. The noun *adolescens, a youth*, is really the Present Participle of *adolescō, I grow up*, and means one who is *getting his full growth*.
- e. **Derivative Verbs** ending in *tō* or *itō* denote *repeated or vigorous action* ; as, *jactō* (from *jaciō*), *I hurl, keep throwing* ; *clāmitō* (from *clāmō*), *I keep shouting* ; *ventitō* (from *veniō*), *I keep coming* ; also, verbs formed from Supine stems ; as, *versor* (from *vertō*), *I keep turning, busy myself, am engaged in*. These verbs are called *Frequentatives*, and are of the First Conjugation.

Compound Words: Prefixes.

99. 1. Many Latin **Prepositions**, when used as the first part of Compound Verbs, have the force of adverbs, and give a special meaning to the compounds. Some of these meanings are evident, and need no explanation. The following have some special force : —

ā, ab, away, off; as, **abiit**, he has gone away; **quinque milia** (or **milibus**) **passuum abest**, he is five miles off.

com, con (adverbial forms of **cum**), together, thoroughly, earnestly; as, **conveniunt**, they assemble; **conferunt**, they collect; **conjungere**, to join together; **conficiō**, I complete; **cohortor**, I exhort earnestly; **collaudat**, he praises highly.

dē, down, away; as, **dēmissō capite**, with downcast head (look); **dējectus**, downcast (discouraged); **dēdūcō**, I withdraw, lead away.

in, on, against; as, **Gallis bellum inferō**, I make war on the Gauls.

ob, towards, to meet; as, **occurrō**, I run to meet.

per, through, thoroughly (through and through); as, **epistolam perlēgī**, I've read the letter through; **perterritus**, thoroughly frightened.

2. The following prefixes (never written alone) give a special meaning and force to Verbs:—

dis (or **dī**), apart, here and there, away; as, **discēdō**, I go away; **militēs dispōnit**, he places soldiers here and there; **ventus ignem distulit**, the wind spread the fire in every direction.

in (English, **in** or **un**) gives a negative force; as, **innocentia**, blamelessness, uprightness (literally, a not doing harm); **imperitus**, unskilled; **integer** (**in** + **tangō**, I touch), whole, unwearied.

re (red), back, behind; as, **redūcō**, I lead back; **mē recipiō** (**re** + **capiō**), I retreat, betake myself; **equitēs reliquit**, he left the cavalry behind.

sē, apart, away; as, **sēcēdō**, I go away; **sējungō**, I disjoin, separate.

NOTES ON SYNTAX.

THE SENTENCE.

100. Sentences, in Latin as in English, are : —

Declaratory ; as, *vir fortis est, the man is brave.*

Interrogative ; as, *quis aeger est ? who is sick ?*

Imperative ; as, *fortēs este, be brave ; veniant, let them come.*

Exclamatory ; as, *quam sapiens fuit ! how wise he was !*

Interrogative Sentences.

101. Questions, in English or Latin, may be *single* or *double*. *Is the man brave ? Did n't he call ?* are *single* questions.

Is the man brave, or cowardly ? Did he praise, or blame ? Did you call, or not ? are *double* questions.

In Latin, every question requires an *interrogative word*. This word may be an Interrogative Pronoun or Adverb ; as, *quis es ? who are you ? unde (cūr) vēnisti ? whence (why) have you come ?* Most of these words have a meaning and use as in English. A few, however, need special mention : —

a. In **Single Questions**, expecting the answer *yes* or *no*, we must use a word indicating *what answer is expected*.

If an *answer* merely is expected (either *yes* or *no*), use **-ne**. This word is always an Enclitic (**195, 3**), and is joined to the first word in the sentence ; as, *puerīne vēnērunt ? have the boys come ?*

If *yes* is expected, use **nonne** ; as, *nonne vir bonus est ? is he not a good man ?* or, *he is a good man, is n't he ?* Notice that **-ne** is an Enclitic in **nonne**.

If *no* is expected, use **num** ; as, *num miles fortis mortem timet ? does a brave soldier fear death ?*

b. In **Double Questions** an interrogative word is used with *each part* of the question. The words most commonly used are **utrum** (or **-ne**, enclitic) in the first part, and **an** in the second. **Utrum** is really the Neuter of the Adjective **uter** (**51, CAUTION**), and means, *which (thing) of these two is the fact ?* It is not to be translated into English. **An** means *or*. If the second part is merely

or not, use *annōn* ; as, *utrum pugnāvit an fūgit ? did he fight, or flee ? utrum patriam amat, annōn ? does he love his country, or not ?*

REMARK. *Yes* and *no*, in answer to questions, have no equivalent (in single words) in common use. Such an answer should usually be expressed by repeating the verb (with a negative adverb, if *no* is the answer); as, *vēnitne ? has he come ? vēnit, yes (he has come) ; suntne amici tui ? are they your friends ? nōn sunt, no (they are not).*

Subject and Predicate.

102. Every sentence must contain a Subject and a Predicate.

- a. The Subject of a Finite Verb must be in the Nominative Case. It answers the question *Who ?* or *What ?* and must be a noun or some word or collection of words used as a noun (see **36**, page 10); as, *benefacere rei publicae pulchrum est, to contribute to the welfare of (literally, to do good to) the state is honorable* (Subject, *benefacere rei publicae*).

The Subject, if a Personal Pronoun, is very frequently omitted, as the Personal Ending of the verb shows what it is ; therefore, a sentence may consist of but one word ; as, *vocātis, you are calling.*

- b. The Predicate may consist of a verb alone, or with modifiers ; as, *agricola vocat, the farmer calls ; miles pugnat, the soldier fights ; agricola puellam vocat, the farmer calls the girl ; miles fortiter pugnat, the soldier fights bravely.*

REMARK. The Direct Object of a Transitive Verb is in the Accusative Case ; as, *puellam* in the sentence above.

Copula and Complement.

103. Review **37**, a, page 10. The verb *sum, I am*, is the *Copula* in Latin. A noun or adjective, in the same case as the subject, is the *Complement*. The Copula and the Complement form the Predicate ; as, *puer bonus est, the boy is good ; Brūtus meus amicus fuit.*

- a. Review **37**, b, c, page 10. In Latin, as in English, there are other *Copulative Verbs* besides *sum* ; as, *fiō, I am made, become ; videor, I seem, appear* ; and the Passive of verbs signifying to choose, to call, to think, etc. ; as, *imperator creor (appellor, habeor), I am elected (called, considered) general.*

Modifiers.

104. Review **38**, page 11. As in English, a Subject or a Predicate may be modified by a

Word ; as, militēs fortēs urbem expugnāvērunt, brave soldiers stormed the city.

Phrase ; as, exercitus sub jugum missus est, the army was sent under the yoke.

Clause ; as, oppidum, quod hostēs cēpērunt, magnum fuit, the town, which the enemy took, was large.

Sentences Classified.

105. *Review 40*, page 11. Sentences, in Latin as in English, are :—

Simple ; as, magister puerō librum dat, the teacher gives a book to the boy.

Compound ; as, vēnī, vidī, vicī, I came, I saw, I conquered.

Complex ; as, puerum laudat, ut ā puerō laudētur, he praises the boy that he may be praised by the boy.

Apposition.

106. A noun used to describe or explain another Noun, or Pronoun, and meaning *the same* person or thing, is put (by Apposition) in the same case (**46**, page 13) ; as, *Labiēnus lēgātus ad urbem Rōmam vēnit*, *Labienus*, the lieutenant, *came to the city* (of) Rome. Notice that *Rome* is *not* in the Genitive, as it denotes the same thing as *city*.

a. If the Appositive describes two or more nouns, it must be in the Plural ; as, *per Marcum Silānum et Titum Sextium lēgātōs dēlectum habuit*, *he held a levy (of troops) through (using as agents) Marcus Silānus and Titus Sextius*, his lieutenants.

Predicate Nominative.

107. A Noun used to complete the Predicate, with *esse*, or any other Copulative Verb (**103**), agrees with the Subject in case, and is called the *Predicate Nominative* (**46**, *a*, page 13) ; as, *Cicerō vir fortissimus fuit*, *Cicero was a very brave man*.

REMARK. This same principle applies to a *Predicate Adjective* (**108**, 1).

ADJECTIVES.

108. An Adjective or Participle (that is, a *Verbal Adjective*) agrees with its Noun, or Pronoun, in gender, number, and case ; as, *cōpiaē bonae*, *good troops* ; *virī fortissimī*, *very brave men*.

REMARK. This, of course, applies to all Pronouns having three gender-forms (Possessive, Demonstrative, etc.).

1. An Adjective may be *Attributive* or *Predicate*.

An Attributive Adjective modifies its noun *directly*; that is, it is not connected with it by *esse*, or some other verb; as, *vir fortis bonus civis est*, *a brave man is a good citizen*.

A Predicate Adjective is one which helps to form the Predicate, and is connected with its noun by *esse*, or some other Copulative Verb.

2. An Attributive Adjective, modifying more than one noun, usually agrees with the nearest and is to be understood with the rest: or it is sometimes repeated; as, *omnēs agrī et maria*; or, *agrī omnēs omniaque maria*, *all lands and seas*.

3. A Predicate Adjective agrees with the Subject in gender, number, and case; as, *puer studiōsus est*, *the boy is studious*.

4. A Predicate Adjective, agreeing with two or more nouns, must be in the Plural; as, *nauta et mīles fortēs erunt*, *the sailor and the soldier will be brave*.

5. If the subjects are of different genders, a Predicate Adjective will be

a. Masculine Plural, if the subjects denote *living beings*; as, *pater et māter mortuī sunt*, *my father and mother are dead*.

b. Neuter Plural, if the subjects denote things *without life*; as, *amor et amicitia simillima sunt*, *love and friendship are (things) very much alike*.

Adjectives used as Nouns.

109. Adjectives may be used as Nouns: the Masculine, Feminine, and Neuter denoting *men*, *women*, and *things*. This is more common in the Plural than in the Singular; as, *Rōmānī*, *the Romans*; *omnia*, *all things* (or *property*); *nostrī*, *our men* (or *soldiers*); *finitimī*, *the neighbors*; *novissimī*, *the rearmost (soldiers)*; *hiberna* (*castra*), *winter-quarters*; *bona*, *goods*.

a. Sometimes Adjectives are so used in the Singular; as, *patria* (*terra*), *native land, fatherland*; *fera* (*bestia*), *a wild beast*.

b. The Neuter Singular of an Adjective very often agrees with an Infinitive or Clause used as a Substantive (see 36, REMARK, page 10); as, *dulce et decōrum est prō patriā morī*, *to die for one's country is (a) delightful and honorable (thing or service)*.

c. Sometimes the Neuter Plural is used as a Noun, when the *general sense* must decide its translation; as, *bona*, *goods*; *praeterita*, *past events* (English, *bygones*); *haec respondit*, *he made this reply*.

Special Uses of Adjectives.

110. a. An Adjective is sometimes used where, in English, we should use an Adverb, an Infinitive, or a Relative Clause. The Adjective usually

"describes the condition of the actor, rather than the manner of the action;" as, *prīmus vēnit*, *he came first (was the first to come, was the first who came)*; *invītus (laetus, libens) vēnī*, *I came unwillingly (joyfully, gladly)*.

- b. Often, in Latin, an Adjective is used, *agreeing with a Noun*, where the English idiom would require a Noun followed by a Genitive; as, *summus mons*, *the top of the mountain*; *mediō in colle*, *on the middle of the hill (half-way up the hill)*; *extrēmā hieme*, *in the last part of winter*; *primā aestāte* (or *initā aestāte*), *in the early part (or beginning) of summer*; *reliqui Belgae*, *the rest of the Belgae*.
- c. Adjectives, agreeing with Nouns, are often employed in Latin, where the English idiom requires a *possessive form*, or a *phrase*; as, *domus aliēna*, *another person's house*; *bellum servīle*, *the war with the slaves*; *bellum Veneticum*, *the war with the Veneti*.
- d. When two Adjectives agree with one Noun, they are regularly connected by a Conjunction; as, *virī multī et bonī*, *many good men* (literally, *men many and good*).

REMARK. This rule does not apply to Numerals or Adjective Pronouns; as, *decem* (or *illī*) *virī bonī*.

PRONOUNS.

Personal.

111. Personal Pronouns (as Subjects) are omitted, unless required for emphasis; as, *vēnī, vidī, vīcī*, *I came, I saw, I conquered*; *ego tē laudāvī, tū mē culpāvistī*, *I have praised you, (but) you have blamed me*.

- a. The speaker or writer often uses the First Person *Plural*, when he does not wish to make *himself* prominent in what he is saying (that is, he avoids *egotism*). Authors and editors often do the same in English; this use of the Subject is often called "the editor's *we*;" as, *Labiēnus, quem suprā diximus*, *Labiēnus, whom we (= I) have mentioned above*.

Reflexive.

112. The Reflexive Pronouns refer to the Subject of the sentence. The use of the Reflexives of the First and Second Persons (*meī, tuī*) can be easily understood, but special care must be taken in the use of the Reflexive of the Third Person (*suī*), and of the Possessive Pronoun (*suus*), which is the Adjective form of *suī* (**47, 48**).

- a. In a Subordinate Clause, *suī* and *suus* may refer either to the subject of their own clause, or to that of the principal clause; as, *Sabinus postulāvit ut hostēs sē suaque omnia dēderent*, *Sabinus demanded that the enemy should surrender themselves and all their property*; *Ariovistus imperat ut obsidēs ad castra sua redūcantur et sibi reddantur*, *Ariovistus gives orders that the hostages shall be brought back to his camp and restored to him*.
- b. *Inter sē* means to each other, from each other, each other, mutually; as, *obsidēs inter sē dedērunt*, *they gave hostages to each other* (that is, *exchanged hostages*); *inter sē cohortāti sunt*, *they encouraged each other* (*gave mutual encouragement*).

Possessive.

113. The Possessive Pronouns are usually omitted, when they are not emphatic, and can be easily understood from the general meaning of the sentence; as, *māter valet*, *my (your) mother is well*. They follow the same law of agreement as Adjectives.

On the proper use of *suus* and *ejus* (*eōrum*, *eārum*), see 48, CAUTION.

- a. The Possessives are often used as Nouns (109); as, *nostri*, *our men*; *suōs hortātus est*, *he encouraged his men*.

Demonstrative.

114. The Demonstrative Pronouns may be used :—

1. As *Adjectives*; as, *ille mīles*, *hic puer*, *vir ipse*, *ea nox*, *that soldier there, this boy here, the man himself* (or *the very man*), *that night*.

2. As *Personal Pronouns*. In this use *is* is very common, so that it is often called the *Third Personal Pronoun* (46); as, *is vēnit*, *he came*; *ea flēbat*, *she was weeping*; *Caesar id animadverterat*, *Caesar had noticed it* (*that thing or fact*). So also, *ipse dixit*, *he (himself) has said so*; *illī sē recēpērunt*, *they retreated*.

- a. *Ipse*, *self*, gives emphasis to the word with which it agrees, and may be translated in several ways; as, *vir ipse*, *the very man* (or *the man himself*); *ipsī sē interfēcērunt*, *they killed themselves with their own hands*.
- b. *Ille* sometimes means “the former” (that is, *the more distant*), and *hic*, *the latter* (that is, *the nearer*), of two persons or things described; as, *ille huic subvenit*, *the former comes to aid the latter* (somewhat like *alter* — *alter*).
- c. *Hic* is often used like the English *as follows*; as, *haec est ratiō oppugnātiōnis*, *the style of attack is as follows*; *haec respondit*, *he thus replied* (*replied these things, or words*).

Relative.

115. In Latin, as in English, a Relative Pronoun takes the Gender, Number, and Person, of its Antecedent ; *its Case depends on the form of its own clause* ; as, *urbs, quam vidēs, Rōma est, the city, which you see, is Rome* ; *ego, quī tē laudāvi, rex sum* ; *mīlitēs, ā quibus urbs capta est, fortēs sunt.*

- a. The Antecedent is often omitted ; as, (eōs) *quī iter cognoscerent misit, he sent men to investigate the route* ; *quod jussī sunt, (id) faciunt, they do what they have been ordered (to do).*
- b. *Quod, id quod, or quae rēs,* may be used to refer to a clause, or *idea*, as Antecedent ; as, *nostrī redintegrātis viribus, quod in spē victōriæ saepe accidit, pugnāre coepērunt, our men began to fight with renewed strength, which (that is, the renewal of strength) often happens in the hope of victory (when soldiers hope for victory).*
- c. The Relative is often omitted in English ; it is *never* omitted in Latin. Its importance as a *connective* is shown by its use ; as, *vir, quem vidēs, Caesar est, the man (whom) you see is Caesar.*
- d. A Relative at the beginning of a sentence must often be translated as a Demonstrative ; as, *quibus rēbus cognitis, profectus est, having ascertained these facts, he started.*
- e. In Latin, as in English, a Relative Adverb may take the place of a Relative Pronoun with a Preposition ; as, *ad eum locum vēnit, ubi fuerant (or, unde profūgerant), he came to the place, where they had been (or, whence they had fled).* In this example, *ubi* = *in quō* ; *unde* = *ā quō*.
- f. In English, *as* is often a Relative Pronoun, especially after *such* and *same*. In Latin, therefore, *quī* (after *idem*) should be translated *as*. *Quālis* and *quantus* (Relative Adjectives) should be translated *as* after *tālis*, *such*, and *tantus*, *such*, *so great* (195, 8).

Interrogative and Indefinite.

116. The general meaning and use of Interrogative and Indefinite Pronouns can be best learned from **51** and **52**, and from the Vocabulary.

VERBS.

117. A Finite Verb agrees with its Subject in Number and Person ; as, *puellae vocant, the girls call* ; *hostēs superantur, the enemy are overcome* ; *beātī estis, you are happy.*

REMARK. As already stated (111), the Subject is generally omitted, if it is a Personal Pronoun.

a. When a verb has two or more Singular subjects connected by a co-ordinate conjunction, it will be :—

1. Plural (as in English), if it agrees with them taken *together*; as, *virtūs et vitium inter sē contrāria sunt*, *virtue and vice are contrary to each other*.

2. Singular (as in English), if it agrees with them *separately*; as, *neque puer neque puella audit*, *neither the boy nor the girl hears*; *vel homō vel filius ejus hōc fēcit*, *either the man or his son has done this*.

b. With *two or more subjects* the verb often agrees with the nearest, and is understood with the others; as, *castra et imperātor magnō in periculō versābātur*, *the camp and commander were in great danger*.

REMARK. Two Singular subjects may denote *one thing*, and then the verb is *singular*; as in the English, *bread and milk is healthful*.

c. A *Collective Noun* (as in English) may take a Singular verb, when the body *as a whole* is spoken of; but when the *separate objects* are thought of, the verb must be Plural; as, *civitās jū suum armīs exsequī cōnāta est*, *the state attempted to assert its right by force of arms*; but *civitatī persuāsit ut exirent*, *he persuaded the state to go out* (that the *citizens* should go out).

d. In Latin, as in English, when a verb has several subjects, of *different persons*, it will be in the *First Person* rather than in the *Second* or *Third*, and in the *Second* rather than in the *Third*; as, *ego et tū et Cassius valēmus*, *Cassius, you, and I (= we) are well*; *tū et filius tuus valētis*.

THE CASES.

NOMINATIVE.

118. The Nominative is the case of the Subject, as in English. It may also be an Appositive or a Predicate Noun, as already described (106, 107).

GENITIVE.

119. The Genitive is most frequently used to modify another Noun, denoting a *different* person or thing. It is unlike the Appositive, since the

latter denotes the *same* person or thing as the word it describes. It may be translated by the Possessive, or by *of* with a Noun; as, *templa deōrum*, the temples of the gods; *pater pueri*, the boy's father.

CAUTION. In such expressions as *the city of Rome*, *of* must not be rendered by the Genitive, because *Rome* denotes the *same* thing as *city*. The Latin should be *urbs Rōma* (Appositive).

Genitive denoting Possession.

120. The Genitive denotes the *Possessor*, answering the question *Whose?* as, *filius servi*, the slave's son; *castra Caesaris*, Caesar's camp.

Genitive of Quality.

121. The Genitive (with an Adjective) denotes *Quality*, answering the question *Of what kind?* or (as in the English *ten-foot pole*, *five days' march*), *Of what length, height, depth?* etc.; as, *vir magnae sapientiae*, a man of great wisdom; *rēs ejus modi* (or *ejusmodi*), affairs of that sort; *iter quinque diērum*, a five days' journey (or march); *fossa trium pedum*, a ditch of three feet (a three-foot ditch).

a. The Genitive of Quality is used to denote *Indefinite Value*. This is expressed by the Genitive Singular of an Adjective (Neuter, agreeing with *pretii*, understood). Among the forms so used are *magnī, parvī, tantī, quantī*; as, *magnī tuae epistolae sunt*, your letters are of great value.

Partitive Genitive.

122. The Genitive denotes the *whole* of which a *part* is taken. This is called the *Partitive Genitive*. It is used:—

- a. With Nouns, Pronouns, and Adjectives; as, *pars equitum*, a part of the horsemen; *quis vestrum?* which of you? *uter consulum?* which of the (two) consuls? *nihil reliquū est*, there is nothing left (of a remainder).
- b. With Neuter Adjectives and Adverbs of Degree (both used as Nouns); as, *plūs doloris*, more grief; *tantum spatii* (or *loci*), so much space; *satis eloquentiae* (or *pecūniae*), enough eloquence (or money).

123. Notice these facts concerning the *Partitive Genitive*:—

- a. Cardinal numbers regularly (and other words sometimes) take the Ablative with *ē* (*ex*) or *dē*, and *not* the Partitive Genitive; as, *quinque ex militibus*; *ūnus dē nobīs*.

- b. **Nostrum** and **vestrum** are used as Partitive Genitives ; **nostrī** and **vestrī** as Objective Genitives (124) ; as, *quis nostrum ? uter vestrum ?* But we must say *nostrī oblitus, forgetful of us*.
- c. **Mille** (the noun) is followed by the Partitive Genitive ; as, *quinque millia passuum, five miles ; sex millia hominum*.
- d. CAUTION. *All of us ; all of you ; all of the soldiers ; etc.*, must not be expressed by the Partitive Genitive, since *all* does not denote a part, but the whole. The Latin should be, *nōs omnēs, we all ; vōs omnēs ; milites omnēs*.
- e. CAUTION. *The top of the mountain ; the middle of the night ; the rest of the Gauls ; etc.*, must not be expressed by a noun and a Partitive Genitive (110, b), but thus : *summus mons ; media nox ; reliqui Galli*.

Subjective and Objective Genitive.

124. Many Nouns and Adjectives have the general meaning of Transitive Verbs ; for instance, *amor* in the expression *amor patriae, love of country*. If this were to be expressed in the form of a sentence, it would be *nōs (tū, ego, is, etc.) patriam amāmus (amās, amō, amat, etc.)*, *we (you, I, he) love (loves) our (your, my, his) country*. That is, *patriae*, as well as *patriam*, is the *Object* of the *love*. So also, *cupidī bellī sumus = bellum cupimus*. Hence such a Genitive is called the *Objective Genitive*. If a Genitive of *Possession* were used, it would represent the *actor*, or *Subject*, and hence such a Genitive is called the *Subjective Genitive*. *Amor Deī (love of God)* may mean *Deus nōs amat, or nōs Deum amāmus* ; the former would represent the *Subjective Genitive*, and the latter the *Objective Genitive*. The following examples will illustrate both : *militis amor bellī, the soldier's (Subjective) love of war (Objective) = miles bellum amat. — rerum novarum cupidī sunt, they are desirous of a revolution (Objective) = ii res novās cupiunt. — rerum nōn imperitus (or ignārus) fuit, he was not unskilled in (or ignorant of) affairs (Objective). — Helvetiorum injūriæ populī Rōmānī magnæ erant, the injuries inflicted by (literally, of) the Helvetii (Subjective) upon (literally, of) the Roman people (Objective) were great.*

Genitive with Verbs of Remembering and Forgetting.

125. Verbs meaning *to remember, to forget* (that is, *to be mindful of, to be forgetful of*), are regularly followed by the Genitive ; as, *nunquam illius noctis obliviscar, I shall never forget that night ; mortis ejus meminī, I remember his death*.

Genitive after Sum.

126. a. As in English, the noun which the Genitive limits is not always expressed. Nouns meaning *duty, part, nature, mark, property*, are often omitted, as in these examples: *militis Rōmāni est aut vincere aut mori*, *it is a Roman soldier's (duty) either to conquer or die*; *imperātōris est jubere*, *it is a commander's duty (right) to order*; *omnia sunt victōris*, *all things are (the property) of the victor (that is, belong to the victor)*.

REMARK. If, however, a Personal Pronoun is used in the English sentence, the Latin requires the Neuter of the corresponding Possessive Pronoun; as, *tuum est videre nē mali mihi noceant*, *it is your (duty) to take care (see to it) lest bad men harm me*. In this sentence *tuum* agrees with *videre* (**109, b**).

- b.** The Genitive is often used after *sum*, equivalent to the English *composed of*; as, *dē his duōbus generibus alterum est Druidum, alterum equitum*, *of these two classes, one is composed of the Druids, the other of the knights*.

Genitive with Impersonal Verbs.

127. a. The Impersonal Verbs *miseret*, *it causes pity*; *poenitet*, *it causes repentance*; *pudet*, *it causes shame*; *taedet*, *it causes weariness*; *piget*, *it causes vexation*, take an Accusative (of the person) as Direct Object, and a Genitive expressing *the cause of the feeling* (**93, b**); as, *eōs poenitet hōrum consiliōrum*, *they repent of these plans (literally, it causes them repentance for these plans)*.

- b.** The Impersonal Verbs *rēfert* and *interest* (*it is to the advantage of, it concerns*) take the Genitive of the person *to whose advantage anything is*. The subject of these verbs is usually an Infinitive, or an Accusative with the Infinitive; as, *interest omnium rectē facere*, *it is to the interest of all to act rightly*; *interest rei publicae manūs hostium distinēri*, *it is to the state's advantage that the bands of the enemy be kept apart*.

Other Uses of the Genitive.

128. The Genitive is used before *causā, grātiā* (*for the sake of*); *instar* (indeclinable noun, meaning *likeness*); *pridīē* (*the day before*); *postridīē* (*the day after*); as, *amicitiā causā Caesarem secūtus est*, *he followed Caesar for friendship's sake*; *haec saepēs instar mūri est*, *this hedge is like (the likeness of) a wall*; *pridīē (postridīē) ejus diēi*, *the day before (the day after) that day*.

REMARK. *Pridiē* and *postridiē* are contracted forms of *priōri diē* and *posterō diē*; so that *pri(ōri)diē ējus diēi* really means *on that day's predecessor*, and *posterōdiē* (in its shortened form) *ējus diēi* = *on that day's successor*.

DATIVE.

129. The Dative denotes the *Indirect Object*, and answers the question *To or For whom (or what)?* as, *agricolae pecūniam nautis dant*, the farmers give money to the sailors; *nōn scholae sed vitae discimus*, we learn, not for the school, but for life; *puer mihi nōmen dixit*, the boy told (to) me his name; *multa parentibus dēbēmus*, we owe much (many things) to our parents.

CAUTION. *a.* In the sentences, *he comes to the city; we follow him to the gate*, there is no Dative, because *city* and *gate* do not denote the *indirect object* of an action. When the verb expresses *motion*, the Preposition *ad* with the Accusative must be used; as, *ad urbem venit*. But see 159.

b. When *for* means *in defence of, in behalf of*, *prō* with the Ablative must be used; as, *dulce est prō patriā mori*, it is sweet to die for (one's) country.

Dative with Intransitive Verbs.

130. Intransitive Verbs can, of course, take only an Indirect Object; as, *rēs legiōni feliciter evēnit*, the affair turned out successfully (*happily*) for the legion.

Dative of Advantage or Disadvantage.

131. The Dative is very often used to denote *Advantage* or *Disadvantage*; that is, to denote that something is *helpful* or *injurious* (to any one), *pleasant* or *disagreeable* (to him), *fit* or *unfit* (for his use), etc. The Dative is thus used with very many Verbs and Adjectives; as, *domus dominis aedificātur*, a house is built for its owners, not for the mice; *Aedui Rōmānis amīci erant*, the Aedui were friendly to the Romans; *Caesarī Ariovistus inimicus fuit*, Ariovistus was hostile to Caesar.

a. The following Verbs (and others of similar meaning) would be Transitive in English; in Latin they are regularly Intransitive, and take a Dative of Advantage or Disadvantage:—

1. Verbs meaning to *benefit* or *injure*, *please* or *displease*, *command* or *obey*, *serve* or *resist*.

2. Verbs meaning to *believe* or *distrust*, *persuade*, *pardon*, *envy*, *threaten*, *be angry*.

CAUTION. These verbs, if used in the Passive, must be *Impersonal* (134).

- b. Some of the Adjectives taking a Dative of Advantage or Disadvantage are these : —

Friendly, amicus ; *unfriendly*, inimicus ; *useful*, utilis ; *useless*, inutilis ; *fit*, aptus ; *unfit*, incommodus ; *acceptable*, grātus ; *dear*, cārus ; *displeasing*, ingrātus ; *faithful*, fidēlis ; *angry*, irātus.

CAUTION. Juvō, *I help*, takes the Accusative. Imperō, *I command*, takes the Dative ; but jubeō, *I order*, takes the Accusative.

- c. The Dative of Advantage or Disadvantage is often used where we should expect to find the Ablative of Separation (147). It is thus used with Verbs compounded with ab, dē, ex, and sometimes with other words. It usually represents a *person* ; as, mihi hunc timōrem ēripe, *relieve me of this fear (take this fear from me)* ; scūtō militi dētractō, *having snatched a shield from a soldier*.

Dative with Adjectives: Like, Equal, Near.

132. The Dative is used (as in English) to limit Adjectives meaning *like* (and *unlike*), *equal* (and *unequal*), *near* ; as, puer similis patrī est, *the boy is like (to) his father* ; hostēs nostris (militibus) nōn parēs sunt, *the enemy are not equal to (a match for) our soldiers* ; proximī Germānis sunt, *they are nearest to the Germans* ; finitimī Galliae fuērunt, *they were neighboring to Gaul (bordered on Gaul)*.

- a. As *prope* (*near*) is a Preposition, the Adjective and Adverb derived from it very often take the Accusative, as though they were Prepositions ; that is, they retain the force of the Preposition *prope* ; as, Crassus proximus mare Oceanum hiemāverat, *Crassus had passed the winter very near the Atlantic*.

Dative with Compounds.

133. Compound Verbs containing the Prepositions ad, ante, con, in, inter, ob, post, prae, prō, sub, super, and sometimes circum, usually take the Dative of Indirect Object ; as, virtūte omnibus praestābant, *they excelled all in valor* ; aliquid ei accidit, *something has happened to him* ; Rōmānī Germānis bellum inferunt, *the Romans make war on the Germans* ; moenibus multitudō circumjecta est, *the multitude was thrown about the walls (that is, surrounded them)*.

CAUTION. Of course, if the *simple* verb is *Transitive* (as, mittō) the compound verb will *remain* Transitive, and take the Accusative of the Direct Object ; as, proelium committō, *I join battle* ; equitēs praemittō, *I send the horsemen ahead*.

Dative with Impersonal Verbs.

134. In English, Intransitive Verbs have no Passive ; in Latin, they may have a Passive, but it must be *Impersonal*. All verbs that take only the Dative, therefore, can be used in the Passive *only* Impersonally. This includes those verbs mentioned in 93, 2, as well as such verbs as *veniō*, *eō*, *pugnō*, *contendō*, *currō* ; as, *puerō nocētur*, *harm is done to the boy (the boy is harmed)*; *militibus imperātur*, *a command is given to the soldiers (the soldiers are commanded)*; *lēgibus pārendum est*, *obedience must be rendered to the laws (the laws must be obeyed)*; *nōn parcitur hostibus*, *no quarter is given to the enemy (the enemy are not spared)*.

REMARK. The Impersonal Verbs *libet* (*it pleases*) and *licet* (*it is permitted*) take the Dative ; as, *licet mihi ire*, *I may go* (literally, *it is permitted me to go*).

Dative of Possessor.

135. Instead of *habēō* with the Accusative, the Dative is very often used with the verb *sum*, to denote the *Possessor* ; as, *nōbīs sunt librī*, *we have books* ; *virō quinque equī sunt*, *the man has five horses*.

- a. The Dative is also used with the compounds of *sum* (except *possum*, which takes the Infinitive, and *absum*, which takes the Ablative, usually with *ā* or *ab*) ; as, *Caesari exercitus nōn dēfuit*, *an army was not wanting (lacking) to Caesar*.

Many of these are provided for by 133.

Dative of Agent.

136. The Dative is regularly used with the Gerundive to denote the *Agent*. This is sometimes called the Dative of *Apparent Agent*, since the *real Agent* is expressed by the Ablative with *ā* or *ab* (151, CAUTION). The Dative, in this use, denotes that something must be done *on a person's part*, as far as he is concerned, for his advantage, etc.; yet it may usually be more simply rendered as though it were Ablative ; as, *omnia Caesari agenda erant*, *all things had to be done by Caesar (on Caesar's part)*; *militibus castra relinquenda sunt*, *the camp must be abandoned by the soldiers*.

Two Datives.

137. Some verbs take *two Datives* ; one denotes the *Purpose*, and the other is the Dative of *Advantage* or *Disadvantage* ; as, *militēs subsidiō Sabīnō mittit*, *he sends soldiers as aid (relief) to Sabinus* ; *haec rēs magnō impedimentō nostris erat*, *this circumstance proved a great hindrance to our men*.

REMARK. The Dative of *Purpose* is sometimes used without the Dative of Advantage or Disadvantage.

- a. A Phrase (containing *ad*) is very often used to express a Purpose ; as, *militēs ad pugnandum alacrēs erant*, the soldiers were eager for fighting ; *ad urbem videndam vēnit*, he came to see the city (180).

Dative instead of the Genitive.

138. The Dative is often used where we should expect a Genitive. It will always be found, however, that the Dative expresses *more* than simple Possession ; as, *advantage, disadvantage*, etc. ; as, *Galli Titō ad pedēs sē prōjiciunt*, the Gauls throw themselves at Titus's feet (literally, throw themselves before (*prō*) Titus, at his feet) ; *Pulfiōnī scūtum transfigitur*, Pulfiō's shield is pierced through.

ACCUSATIVE.

139. The Accusative denotes the *Direct Object* of a Transitive Verb ; as, *magister puerum laudat*, the teacher praises the boy ; *oppidānī portās clausērunt*, the townspeople closed the gates.

- a. Verbs of *motion*, which are Intransitive (as simple verbs), often become Transitive when compounded with *ad*, *circum*, *in*, *trans* ; as, *urbem adiit*, he approached the city ; *consilia ineunt*, they form (enter upon) plans ; *nostrōs circumvēnērunt*, they entrapped (English, "got around") our men ; *flūmen transit*, you are crossing the river.

Cognate Accusative.

140. In English, an Objective Case may be used after an Intransitive Verb (as well as after a Transitive Verb) to repeat the idea contained in the Verb ; as, *he went his way ; we ran a race ; I have dreamed a dream*. It is called in English the *Cognate Objective* (*Cognate*, from *con* + *nascor*, means *kindred, related*) ; in Latin, it is called the *Cognate Accusative* ; as, *mīrum somnium somniāvī*, I have dreamed a wonderful dream ; *jusjūrandum jūrāvī*, I have sworn an oath ; *viam tridui prōcessit*, he advanced a three days' journey.

Two Accusatives.

141. Some Verbs take *two Accusatives* :—

- a. Verbs of *making, calling, thinking* (as well as verbs of similar meaning), take two Accusatives (of the same Person or Thing), just as in English they take two Objectives ; as, *Ancum Martium rēgem*

populus creāvit, the people elected Ancus Martius king ; Rōmulus urbem Rōmam vocāvit, Romulus called the city Rome ; tē virum sapientem putō, I think you a wise man. When these verbs become Passive, one Accusative becomes the *Subject*, the other becomes the *Predicate Nominative* (as in English); as, *urbs Rōma vocāta est.*

- b. Verbs of *asking* and *teaching* (as well as verbs of similar meaning) take two Accusatives (one denoting the Person and the other the Thing), as in English ; as, *sententiam mē rogāvit, he asked me my opinion ; Caesar frūmentum Aeduōs flāgitābat, Caesar kept demanding corn of the Aedui ; pācem tē poscimus, we demand peace of you.* In the Passive, the Accusative of the Person becomes the *Subject* ; the Accusative of the Thing *remains* (as in English); as, *sententiam rogātus sum, I was asked my opinion.*

REMARK 1. *Cēlō, I conceal*, takes two Accusatives, like verbs of *asking* ; as, *mē haec cēlābās, you were concealing these things from me* (that is, you were concealing these *things*, and were keeping *me* "in the dark"); *amicum sermōnem cēlāvit.*

REMARK 2. *Petō, I seek ; postulō, I demand ; quaerō, I ask*, do not take two Accusatives (like *rogō*). They take the Accusative of the *thing*, but the *Ablative* of the *person* (as the *source* of information) with a Preposition. *Petō* and *postulō* take *ā* or *ab* ; *quaerō* takes *ā* (*ab*), *dē*, or *ē* (*ex*) ; as, *pācem ā Rōmānīs petunt ; auxilium ā mē postulāvit ; dē iis causam quaesivit* (*he asked them the reason*).

- c. Some Transitive verbs, compounded with *trans*, take two Accusatives, one being the object of the simple verb, and the other depending on the Preposition ; as, *equitēs Rhodanum transduxit* (= *equitēs trans Rhodanum duxit*) ; so also, *cōpiās flūmen transmīsīt* (= *cōpiās trans flūmen mīsīt*).

REMARK. In the Passive, the Accusative depending on the Preposition may remain ; as, *māior multitudō Germānōrum Rhēnum transducitur.*

Accusative used Adverbially.

142. The Accusative is very often used *adverbially*, especially to denote *degree* or *extent*. In very many instances it is like the English Objective similarly used (see 54, page 15). Some of these uses are :—

- a. The Accusative denotes *length of time*, answering the question, *How long?* as, *quinque diēs morābitur, he will delay five days ; tri-duum ibi manēbat, he remained there for the space of three days ; septem annōs in Galliā vixit.*

- b. The Accusative denotes *extent of space*, answering the questions *How far? How high? How long?* etc.; as, *octo millia passuum prōcessit* (*prōgressus est*), *he advanced eight miles*; *mūrus centum pedēs longus est*, *the wall is 100 feet long*; *domus quadrāgintā pedēs alta fuit*, *the house was 40 feet high*.
- c. The Accusative has an adverbial force (of *degree, extent, cause*, etc.) in many expressions. Some of these, as *multum*, *plūrimum*, etc., have been mentioned under 94, d, 1. Examples are:—

Suēvi nōn multum frūmentō, sed maximam partem lacte atque pecore vivunt, *the Suevi do not live much on corn, but for the most part on milk and (the flesh of) cattle*; *plūrimum potest*, *he is very powerful (he is able to a very great extent)*; *quid venītis*, *why do you come?* (English, *what for?*); *fāma tantum valuit*, *the report had so great influence (availed to such a degree)*.

REMARK. The Accusative of *Place to which* is described in 159, b.

Accusative as Subject.

143. The Accusative is used as the Subject of the Infinitive Mode. In English the Objective is often used in the same way (see 56, page 16). This use of the Accusative is more fully described in 166.

Accusative with Prepositions.

144. The Accusative and Ablative are used with Prepositions. The list of those (most common) that take the Ablative is given under 95; those not contained in this list require the Accusative. But see 95, c.

VOCATIVE.

145. The Vocative is the case of Direct Address; as, *studiōsi este, puerī*, *boys, be studious*. It is like the English Independent Case, as, in the example, *puerī* has no dependence on any other word in the sentence.

ABLATIVE.

146. The Ablative usually expresses *Adverbial* ideas; that is, it answers the questions *From what? By what? Why? How? Where? When? With what?* etc. In English, the same ideas are expressed by phrases containing the Prepositions *from, by, in, with*, and sometimes others; as, *virum culpā liberat*, *he frees the man from blame*; *pallidus irā fuit*, *he was pale with anger (tells why)*; *clārā vōce dixit*, *he spoke in a loud tone (tells how)*; *posterō diē hostēs superāvit*, *he overcame the enemy the following day (tells when)*.

Ablative of Separation.

147. The Ablative (= *from*) is very frequently used to denote *Separation*; as, *mē timōre liberās, you free me from fear; finitimī agrīs expulsi sunt, the neighbors were driven from their lands; cōnātū dēstiterunt, they desisted from their attempt.*

- a. *Opus* (indeclinable, used in Nominative and Accusative) and *ūsus*, meaning *need*, take the Ablative, like verbs expressing *separation* or *privation*; as, *opus est magistrātibus et pecūniā, there is need of magistrates and money.*

Ablative of Origin, or Source.

148. The Ablative (= *from*) denotes *Origin* or *Source*, especially with such a Participle as *nātus, born (from); ortus, sprung (from)*; as, *Lūcius Catilīna nōbili genere nātus fuit, Lucius Catiline came from noble stock.*

Ablative of Cause.

149. The Ablative denotes *Cause*, answering the question *Why? In accordance with what?* as, *pallidus irā fuit, he was pale with anger; senectūte mortuus est, he died of old age; victoriā suā glōriantur, they boast of their victory; stipendium jūre belli capit, he takes the tribute by (in accordance with) the law of war.*

- a. The Ablative *causā* is often used after a Genitive to express *cause*; as, *rei publicae causā, for the republic's sake; rei frumentariae (or commeātūs) causā, for the sake of supplies of corn (or supplies).*

Ablative of Manner.

150. The Ablative denotes *Manner*, answering the question *How?* as, *clārā vōce dixit, he spoke in a loud tone; magnō flētū auxilium ā Caesare petunt, with a flood of tears (great weeping) they seek aid of Caesar; magnā vi contendērunt, they strove with might and main.*

- a. **CAUTION.** If *with* means *in company with, in conflict with*, *cum* must be used. The Ablative is then called the *Ablative of Accompaniment*; as, *cum decimā legiōne vēnit, he came with the tenth legion; cum hostibus pugnant; cum Germānis bellum gerunt.*

REMARK. In military reports, or in describing military movements, *cum* is often omitted.

Ablative of Means or Instrument.

151. The Ablative denotes *Means* or *Instrument*, answering the questions *By what? With what?* as, *hostium finēs ferrō et igne vastant*, they lay waste the enemy's territory with sword and flames; *Deus mundum omnibus rēbus bonis explēvit*, God has filled the world with all blessings (good things); *legiōne fossam perducit*, he digs (conducts) a ditch with (the help of) the legion.

CAUTION. If the Noun or Pronoun denotes the *person* by whom something is done, it requires the preposition *ā* (ab). It is then called, not the *Means*, but the *Agent*; as, *pater ā filiis amātur*, the father is loved by his sons; *nāvēs militibus ā Caesare complētae sunt*, the ships were filled with soldiers (Means) by Caesar (Agent).

The *indirect agent* is expressed by *per* with the Accusative; as, *Caesar per explorātōrēs certior factus est*, Caesar was informed through scouts (ab explorātōribus = by the scouts in person). See also 136.

- a. The Ablative of Means is used with the Deponent Verbs *utor*, *fruor*, *fungor*, *potior*, *vescor*, and also *vivō* (with the meaning, *live upon*); as, *aurō et argentō utuntur*, they use (employ) gold and silver; *eādē conditionē dēditionis ūsus est*, he enjoyed the same condition (or terms) of surrender; *lacte vescuntur*, they live on (feed on) milk; *pecore vivunt*, they live on (the flesh of) cattle; *castris potiti sunt*, they got possession of the camp.

REMARK. *Potior* sometimes takes the Genitive, in the sense of *become master of*; as, *tōtius Galliae potior*, I become master of all Gaul.

- b. The Adjectives *frētus*, *contentus*, *praeditus* (= *prae + datus*), take the Ablative of Means; as, *frēti virtūte suā*, relying on their bravery; *paucis rēbus contentus fuit*, he was content with a few things; *virtūte praeditus et cōpiis frētus*, Marcellus hostēs vicit, endowed (gifted) with bravery, and relying on his troops, Marcellus conquered the enemy.
- c. The Ablative denotes the *Price* paid for anything. It is the *means* by which it is obtained or exchanged; as, *vīginti talentis ūnam orātiōnem vendidit*, he sold one oration for 20 talents; *haec victōria Caesarī multō sanguine stetit*, this victory cost Caesar much blood (literally, stood to his account); *librum duodecim sestertiis ēmit*, he bought the book for 12 sesterces (about 60 cents).

Ablative of Quality.

152. The Ablative of *Quality* is used to describe a person or thing, answering the questions *Of what kind? What sort of? Of what appear-*

ance? etc. See Genitive of Quality (121). EXAMPLES: *Germānī viri corporum ingentī magnitūdine fuērunt*, the Germans were men of huge size of body; *moenia urbis magnā altitūdine sunt*, the walls of the city are of great height; *horridō aspectū sunt*, they are of dreadful appearance (have a dreadful look, are "dreadful-looking").

- a. Although the Genitive may be used to denote Quality, yet the Ablative is more common. The Genitive must be used to denote actual measurement (in days, feet, etc.); as in the Examples under 121.

Ablative of Respect.

153. The Ablative often answers the question *In what respect?* and is then called the *Ablative of Respect* (or *Specification*). It is used with Nouns, Adjectives, and Verbs; as, *rex nōmine fuit*, he was a king in name; *Gallōs reliquōs virtūte praecēdunt*, they surpass the rest of the Gauls in bravery; *puer patrī omnibus rēbus similis est*, the boy is like his father in all respects; *mājorēs nātū sumus*, we are older (greater in respect to birth).

REMARK. The Ablative of the Supine is an Ablative of Respect (191, b).

Ablative with Comparatives.

154. The Ablative may be used after Comparatives, instead of *quam* (with the Nominative or Accusative); as, *Tullus Hostilius Rōmulō (= quam Rōmulus) ferōcior fuit*, Tullus Hostilius was more warlike than Romulus; *scīmus sōlem mājorem esse terrā (= quam terram)*, we know that the sun is greater than the earth; *castra amplius millibus passuum octo in lātitudinem patēbant*, the camp extended more than eight miles in width.

- a. A few Ablatives (like *opīniōne*, *spē*) are used with a Comparative, and have the force of entire clauses; as, *celerius opīniōne omnium vēnit*, he came quicker than any one supposed he would (literally, quicker than the opinion, or expectation, of all).
- b. *Quam* is often omitted after *plūs*, *minus*, *amplius*, *longius*, without affecting the case of the following noun; as, *amplius* (Accusative) *tria millia* (Accusative) *passuum castra patēbant*, the camp extended more than three miles; that is, three miles (Accusative) and more (Accusative).

Ablative expressing Measure of Difference.

155. The Ablative denotes the *Measure* (or *Degree*) of *Difference* between two objects compared, telling by how much one thing is greater or less than

another. Notice a similar use of the Objective in English (54, 7, page 15).
EXAMPLES: *ille vir tōtō capite altior est, that man is a whole head taller ; Hibernia dimidiō minor est quam Britannia, Ireland is a half smaller than England ; tempus multō brevius est, the time is much shorter.*

- a. The Ablative expressing Measure of Difference is found with all words and phrases which contain a Comparative *idea* ; as, *hīc locus aequō spatiō ab castris Ariovisti et Caesaris aberat, this spot was the same distance (off) from the camp of Ariovistus and (that of) Caesar ; paulō post (ante) vēnit, he came a little after (or before) ; flūmen trīgintā millibus passuum infrā (suprā) eum locum fuit, the river was 30 miles below (or above) that place.*
- b. The Ablative of Measure of Difference is very often expressed in the form of *correlatives* (195, 8), as, *quō — eō (or hōc) ; quantō — tantō*, which are to be translated *the — the ; as, quō māior vis aquae sē incitāverit, hōc (eō) artius continēbuntur, the (by how much) greater the force of the current shall have been, the (by so much) more tightly will they be held together.*
- c. The Ablative with Comparatives (154) and the Ablative of Measure of Difference are very often found in the same sentence ; as, *servus multō fortior dominō suō est, the slave is much braver than his master ; turris quinque pedibus mūrō altior est, the tower is five feet higher than the wall.*

Ablative with Dignus and Indignus.

156. The Adjectives *dignus, worthy*, and *indignus, unworthy*, take the Ablative ; as, *ignāvus vitā indignus est, a coward does not deserve to live (is unworthy of life) ; militēs laude digni erant, the soldiers were worthy of praise.*

Ablative Absolute.

157. The Ablative is often used *independently* of the rest of the sentence, and is then called the *Ablative Absolute* (*absolute* means *freed from dependence*). In English, the Independent Case is employed in the same way with Participles, and has three uses :—

- (1.) Substantive + Participle ; as, *the camp having been fortified, he came to Rome.*
- (2.) Substantive + *being* + Adjective ; as, *the soldiers being brave, the enemy were overcome.*
- (3.) Substantive + *being* + Substantive ; as, *Caesar being the judge, you will be condemned.*

The verb *to be* is a Copula ; hence *brave* is a Predicate Adjective, and *judge*, a Predicate Noun. The verb *sum* has no Present Participle, however, and therefore, in expressing these examples in Latin, *being* must be omitted in the *second* and *third*. Of course, *brave* must agree with *soldiers*, and *judge* must be in Apposition with *Caesar*. Therefore, the Latin for these examples will be : —

- (1.) Substantive + Participle, **castris munitis, Rōmam vēnit.**
- (2.) Substantive + (*being*) + Adjective, **militibus fortibus, hostēs victi sunt.**
- (3.) Substantive + (*being*) + Substantive, **Caesare jūdice, condemnāberis.**

Judging from *potens* (Present Participle of *possum*), we may say that the Present Participle of *sum* *would be* *ens* ; so that *militibus* (*entibus*) *fortibus*, and *Caesare* (*ente*) *jūdice*, will show how much alike the English and Latin are in the use of the *absolute* case and the Predicate Noun or Adjective.

REMARK 1. Verbs in Latin (except the Deponents) have no Perfect Active Participle. The Ablative Absolute is *required*, to supply this lack as nearly as possible ; as, *having seen the city* ; *having heard the speech*, must be translated thus : **urbe visā** (*the city having been seen*) ; **orātiōne auditā** (*the speech having been heard*). In these sentences, however, there will be no Ablative Absolute, as the Participles are *Active* in meaning : *having followed the enemy*, *our men killed a large number of them* ; *having delayed five days*, *he set out*. They must be written thus : **hostēs secūtī** (Nominative), **nostrī magnum numerum eōrum occidērunt** ; **quinque diēs morātus** (Nominative), **profectus est**.

REMARK 2. The Ablative Absolute phrase, like the English Independent phrase, is usually equivalent to a *shortened clause*, and should generally be translated as a Subordinate Clause ; as, **militibus fortibus**, *because the soldiers were brave* ; **orātiōne habitā**, *when the speech had been delivered* ; **sē invītō**, *although he was* (or *if he should be*) *unwilling* (or *without his permission*).

REMARK 3. It is much more common than the English Independent Case, and often cannot be translated *literally* so as to make good sense. The student must use that translation which is best and *smoothest* ; for example : —

Caesare jūdice, *if Caesar is judge, because Caesar is judge* ; **Cicerōne et Antōniō consulibus**, *when Cicero and Antony were consuls, in the consulship of Cicero and Antony* ; **hostibus victis** ; (1) *when* (although, since, because) *the enemy have been conquered* ; (2) *having conquered the enemy* ; (3) *the enemy having been conquered* ; (4) *after having conquered the enemy*.

PLACE.

158. The Ablative *with a Preposition* denotes place *where* (or *in which*) and *whence* (or *from which*); as, *in Galliā, in Gaul*; *ab oppidō, from the town*; *ex silvā, out of the forest*.

Place *to which* is expressed by the Accusative *with a Preposition*; as, *ad urbem, to the city*; *ad castra, to the camp*. Remember, this is the rule; the next NOTE gives the exceptions.

159. To express Place *where* (in or at which), *whence* (from which), *whither* (to which), Prepositions are omitted with the following:—

(1) Names of Cities and Towns; (2) *domus* (home), *rūs* (country); (3) small Islands. These nouns obey the following Rules:—

- a. Place *from which* is expressed by the Ablative; as, *Catilīna Rōmā fūgit, Catiline has fled from Rome*; *rūre revocātus est, he was recalled from the country*.
- b. Place *to which* is expressed by the Accusative; as, *domum ivit, he went home*; *Corinthō Rōmam profectus est, he set out from Corinth for Rome*.
- c. Place *in* (or *at*) *which* is expressed by a case called the *Locative* (*locus, place*), which is mentioned in **20, REMARK**, page 24, as the *seventh Latin case*. It is found in the First, Second, and Third Declensions, has a Singular and a Plural form, and has endings like the Genitive Singular or Ablative (Singular and Plural). This table shows the endings of the Locative Case:—

DECLENSION.	I.	II.	III.
<i>Singular.</i>	<i>ae.</i>	<i>i.</i>	<i>e</i> (rarely <i>i</i>).
<i>Plural.</i>	<i>īs.</i>	<i>īs.</i>	<i>ibus.</i>

Some names of Cities and Towns have no Singular form; as, *Athēnae* (*ārum*), *Athens*; *Vēii* (*ōrum*), *Veii*; *Sardēs* (*ium*), *Sardis*. The above table and its correct use can be remembered by this

RULE: To express Place *where*, names of Cities and Towns, also *domus*,* *rūs*, and small Islands, must have the form of the

Genitive, if of the First or Second Declension AND Singular Number.

Ablative, if of the Third Declension OR Plural Number.

EXAMPLES: *Capuae*; *Karthāgine*; *Vēiis*; *Athēnis*; *Sardibus*; *Rōmae*; *Lugdūni* (Nominative Singular, *Lugdūnum*); *domi*: *at* (or *in*) *Capua, Carthage, Veii, Athens, Sardis, Rome, Lyons*; *at home*.

* **Domus**, meaning *home*, is of the Second Declension (**21, b**).

REMARK 1. To express *towards, in-the-vicinity-of, near, from-the-vicinity* (or *neighborhood*) -of, Prepositions must be used ; because without them we could not tell whether *Rōmam ivit* meant *he went to Rome*, or *towards Rome*. These examples will show what Prepositions should be used for such meanings : *ad Rōmam profectus est*, *he started towards (in-the-direction-of) Rome* ; *ad Genēvam pervēnit*, *he arrived in-the-vicinity-of Geneva* ; *ad (circum, apud) Capuam hiemāvit*, *he passed the winter near Capua* ; *ā Capuā vēnit*, *he came from-the-neighborhood-of Capua*.

REMARK 2. There are some common, *every-day* words (*locō, parte*, etc.), which often express Place *where* without a Preposition. These can be best learned by experience.

REMARK 3. The Ablative expressing the *way by which* (or *through which*) is an Ablative of *Means* ; as, *viā breviorē ivit*, *he went by a shorter way* ; *hostēs locis impeditis sequitur*, *he follows the enemy through places difficult of passage*.

TIME.

160. The Ablative answers the questions *When ? Within what time ?* (like the English Objective with a Preposition, expressed or understood). The Accusative (**142, a**) answers the question *How long ?* (like the English Objective) ; as, *sōlis occāsū*, *at sunset* ; *bellō servīli*, *in the war with the slaves (servile war)* ; *tōtam noctem iērunt*, *they marched all night* ; *quinque hōrās pugnābant*, *they fought five hours* ; *Kalendis Martiis*, *on the first of March (on the March Kalends)*.

DATES.

161. The Romans did not number the days of the month as we do. There were three fixed points in each month, and any particular day was reckoned as so many days *before* the nearest of these points. These three points were called : —

1. *Kalendae (ārum)*, *the Kalends* : the first day of the month.
 2. *Nōnae (ārum)*, *the Nones* (so called from *nōnus*, *ninth* ; being nine days before the *Ides*) : the 7th of March, May, July, and October, and the 5th of the other months.
 3. *Idūs (uum)*, *Feminine*, the *Ides* : the 15th of March, May, July, and October, and the 13th of the other months. It was the pay-day for interest, tuitions, etc.
- a. The names of the Months are Adjectives ; as, *Kalendae Aprīlēs* (often written *Kal. Apr.*), *the 1st of April* ; *Idibus Novembribus* (*Id. Nov.*), *on the 13th of November*.

- b. To express *March 28th*, the Romans said *the 5th day before the April Kalends*, because they included the day *from which* and the day *to which* they counted. We should suppose that this would be expressed thus: *quintō diē ante Kalendās Aprīlēs*; but they said *ante diem quintum Kalendās Aprīlēs*, as though *ante diem* were a *Preposition* followed by the *Accusative*.

RULE 1. To find how many days before the Kalends an English day of the month falls, add *two* to the number of days in that month, and subtract the number of the given date; as, March 28th = $31 + 2$ (33) — 28 = 5; that is, March 28th = the 5th day before the April Kalenda. By adding *two*, they counted in the first day of the next month, because it was an extra day, *beyond the month*; this, with the day *from which* they reckoned, made the two extra days.

RULE 2. To find how many days before the Nones or Ides an English day of the month falls, add *one*, and subtract the number of the given date; as, *ante diem quartum Nōnās Jūniās* = $(5 + 1) - 4$ = June 2; *ante diem quartum Idūs Septembrēs* = $(13 + 1) - 4$ = Sept. 10.

MODES OF THE VERB.

Indicative.

162. The Indicative Mode is used

- a. To state something as a *fact*; as, *puerum laudat*, *he praises the boy*; *vēni, vidī, vici*, *I came, I saw, I conquered*.
 b. To ask a *direct* question; as, *quis putat Cassium ignāvum esse?* *who supposes that Cassius is a coward?* *pugnātne servus?* *does the slave fight?*

The forms of questions are given in 101.

Imperative.

163. The Imperative Mode expresses a *direct* command (that is, one to the Second Person); as, *convocā, magister, puerōs*, *teacher, call the boys together*; *studiōsi este*, *be industrious*; *cavē*, *beware*.

CAUTION. To express a *prohibition* (negative command) a peculiar idiom is required. This is given in 178, CAUTION 2.

Subjunctive.*

164. The Subjunctive Mode has a variety of uses; the simplest are:—

* Only a few of the simplest uses are given in this section; the Mode is more fully described hereafter. This Note gives such uses of the Subjunctive as can be readily appreciated by contrast with the Indicative and the Imperative.

- a. To state something as *doubtful* or *possible*; as, **sī Caesar pugnet, Germānōs superet**, *if Caesar should fight, he would overcome the Germans.*

(The Indicative states a *fact*.)

- b. To ask an *indirect* question; as, **rogat quid dīcam**, *he asks what I am saying*. It is also used to ask a question implying *doubt* or *uncertainty*; as, **quis putet Cassium ignāvum esse?** *who would suppose that Cassius is a coward?*

(The Indicative asks a *direct* question, and one which does *not* imply a doubt.)

- c. To express an *indirect* command; that is, commanding an act in which the First or Third Person is to be the *actor*, but the command is not addressed to the First or Third Person (see REMARK, below). It may express all such ideas as *exhortation*, *warning*, etc.; as, **magister puerōs convocet**, *let the teacher call the boys together*; **omnēs studiōsī sīmus**, *let us all be studious*; **caveat**, *let him beware*.

(The Imperative expresses a *direct* command.)

REMARK. If, in an Imperative sentence, the First or Third Person is required, the Subjunctive must be used. This table will show the forms of *command*, *exhortation*, etc., for **amō** and **sum**, in all Persons, Present Tense:—

Singular.

- | | |
|---|--|
| 1. amem , <i>let me love.</i> | 1. sīm , <i>let me be.</i> |
| 2. amā , <i>love (thou).</i> | 2. es , <i>be (thou).</i> |
| 3. amet , <i>let him (her, it) love.</i> | 3. sit , <i>let him (her, it) be.</i> |

Plural.

- | | |
|---|--------------------------------------|
| 1. amēmus , <i>let us love.</i> | 1. sīmus , <i>let us be.</i> |
| 2. amāte , <i>love (ye).</i> | 2. este , <i>be (ye).</i> |
| 3. ament , <i>let them love.</i> | 3. sint , <i>let them be.</i> |

- d. To express *purpose*, answering the questions, *Why? For what?* as, **Caesar milītēs misit ut urbem expugnārent**, *Caesar sent soldiers to take (that they might take) the city*. Notice that **expugnārent** does not state a *fact*, but something *intended*, or *possible*.

INFINITIVE.

165. The Infinitive is usually employed as an indeclinable Verbal Noun (as in English).

- a. The Infinitive is often used as Subject of a Verb (*impersonal*). Of course, a Predicate Adjective will be *Neuter* (109, b). EXAMPLES: *esse melius quam vidēri est*, *to be is better than to seem*; *dulce prō patriā mori est*, *to die for (one's) native land is sweet*.
- b. The Infinitive is used after many verbs, sometimes as Object, and sometimes to fill out their meaning. In the latter use it is called the *Complementary Infinitive* (that is, it *completes* the thought); as, *Caesar bellum cum Germānis gerere constituit*, *Caesar determined to carry on war with the Germans*; *urbem expugnāre nōn possunt*, *they cannot take the city by storm*; *iter facere coepit*, *he began to march*.

Infinitive with Subject Accusative.

166. Verbs and expressions of *telling, thinking, perceiving, knowing* (and others of similar meaning), are followed by the *Infinitive, with the Accusative as Subject*. This use of the Infinitive may be more easily understood, if stated thus:—

I. Verbs of *saying* are followed by the Accusative with the Infinitive, when they introduce, not a *Direct Statement* (that is, the *exact* words of the speaker), but an *Indirect Statement* (that is, the *general idea* of what he said, but not his exact words). Such an Indirect Statement, in English, is introduced by the Conjunction *that*; but the word *that* is omitted in Latin. EXAMPLES: (Direct Quotation) "*The sailors fight*," "*Nautae pugnant*;" (Indirect Statement) *He says that the sailors fight*, *Dicit nautās pugnāre*.

II. A beginner, however, often finds it hard to understand why a verb of *thinking* should follow the same rule as a verb of *telling*. The reason is that, when a person *thinks*, he "says to himself," as in this sentence: *I said to myself* (= *thought, determined, hoped*) *that I should be elected*.

A similar construction is seen in English (56, page 16) after verbs of *seeing* and *hearing*; as, *I heard him (to) call*; *he saw the boy (to) jump*.

In Latin, the *Accusative with the Infinitive* is a very common construction, after verbs of *saying*, etc.; as, *dicit* (negat, respondet, putat, spērat, audit, crēdit) *Rōmānōs superātūrōs esse Gallōs*, *he says (denies, replies, thinks, hopes, hears, believes) that the Romans will overcome the Gauls*.

CAUTION. Verbs of *asking* do not *state* anything, and therefore cannot take the Accusative and Infinitive. They should be followed by a Subjunctive of *Purpose* or *Indirect Question* (see 179, d; 177, b).

Historical Infinitive.

167. Latin writers often use the Present Infinitive, instead of the Imperfect and Perfect Indicative (without *have*). It is then called the **Historical Infinitive**. In this use its Subject is in the *Nominative Case*. Perhaps some verb (like *coepti*), upon which the Infinitive depends, has been omitted. It is used in lively descriptions; as, *flāgitāre, dūcere, and dīcere*, in these sentences: *Caesar Aeduōs frūmentum flāgitāre. Diem ex diē Aeduī dūcere; frūmentum conferri, comportāri, adesse dīcere, Caesar kept demanding corn of the Aedui. The Aedui kept putting (him) off, day after day; they said (at one time) that the corn was being collected, (at another) that it was on the way, (and again) that it was at hand.*

TENSES.

168. Indicative. The Indicative has all the Tenses, which are described in **61**.

- a. Both the Future and Future Perfect are sometimes required, when the English verb contains the *idea* of a Future, but does not have a Future form (**17**, NOTE, page 5); as, *si Rōmam vēnerit (or veniet), fēlix erō, if he comes (that is, shall have come, shall come) to Rome, I shall be happy.*
- b. The Present Tense is often used for a *past* tense, to represent a past event vividly, as though *now* taking place. It is then called the **Present Historical** (like the *Historical Infinitive*, **167**), because it really describes past events; as, *dum haec geruntur, dux nuntiōs mittit, while these things are going on, the leader sends messengers.* Webster, when pleading a case before a jury, thus used the Present Historical: "The deed is done. He (the criminal) retreats, retraces his steps to the window, passes out through it as he came in, and escapes. The secret is his, and it is safe."

REMARK. The Present Historical is almost always used with *dum*, while, though the other verbs in the sentence may be in tenses denoting *past* time; as, *dum haec parantur, Saguntum jam oppugnābatur, while these preparations are being made, Saguntum was already under siege (being besieged).*

169. Imperative Tenses. The Imperative Mode has only one tense (the Present) in common use. The Future is used in laws and commandments (like the English, "Thou shalt not steal"). The Present Imperative tells the time of *giving* the command, the time of *obeying* may

be *future* (as in English). The Present has only one Person, the Second ; how the lack of the First and Third Persons is supplied is explained in 164, c, REMARK.

170. Subjunctive Tenses. The Subjunctive Mode has no Future or Future Perfect. This lack is sometimes supplied (for the Future) by the use of the Active Periphrastic Conjugation (as shown in 82, REMARK), and sometimes by using the Present Subjunctive as a Future and the Perfect as a Future Perfect (as described in 175). The Imperfect Subjunctive also has a peculiar use (described in 175, REMARK 1). In a word, the *time* denoted by the Subjunctive tenses must often be decided by the *sense*, and not by the *name* of the tense (see 19, page 6).

Primary and Secondary Tenses.

171. Tenses expressing Present or Future time are called *Primary* (or *Principal*); those expressing Past time are called *Secondary* (or *Historical*).

Historical means *describing past events* (as in the terms, *Historical Present* and *Historical Infinitive*). The tenses are thus divided :—

Primary : Present, Future, Perfect (Definite), Future Perfect.

Secondary : Imperfect, Perfect (Indefinite, or *Aorist*), Pluperfect.

Sequence of Tenses.

172. The tense of a verb in the Subjunctive, in a Dependent Clause, is determined by the tense of the verb on which it depends. That is, Present or Future time must be followed by Present or Future time, and Past time must be followed by Past time. This law is called the *Sequence of Tenses* (from *sequor*, *I follow*), and can be thus stated : *Primary tenses follow Primary tenses, and Secondary tenses follow Secondary.* This is illustrated by the following :—

PRIMARY.	veniō	ut tē videam, I	come that I may see you.
	veniam	“ “ “ I shall	“ “ “ “
	vēnī	“ “ “ I have	“ “ “ “
	vēnī ū	“ “ “ I shall have	“ “ “ “
SECONDARY.	veniēbam	ut tē vidērem, I was coming that I might see you.	
	vēnī	“ “ “ I came	“ “ “
	vēneram	“ “ “ I had come	“ “ “

Also, rogō quid agās, *I ask what you are doing* (Present Subjunctive).

rogābō quid actūrus sis, *I will ask what you are going to do, or will do* (Future Subjunctive).

REMARK 1. The Imperfect Subjunctive (not the Perfect) is regularly used after Secondary tenses ; as, vidērem in the examples above.

REMARK 2. The Historical Present (168, b), being really a *past* tense, is regularly followed by a past tense ; as, *Helvētīi lēgātōs ad Caesarem mittunt, quī pācem peterent*, the Helvetii send envoys to Caesar to ask for peace.

173. Infinitive Tenses. The tenses of the Infinitive are named *Present, Perfect, and Future* ; but the Present may have the meaning of a Present or Imperfect, and the Perfect may have that of the Perfect or Pluperfect. *The time of an Infinitive tense is determined by the time of the verb on which it depends.* If the Infinitive denotes, —

- (1.) The same time as the principal verb, use the *Present*.
- (2.) Time *before* that of the principal verb, use the *Perfect*.
- (3.) Time *after* that of the principal verb, use the *Future*.

Compare these rules carefully with the following examples : *dīcit militem pugnāre*, he says that the soldier fights ; *dixit magistrum puerōs laudāre*, he said that the teacher was praising the boys ; *putat Rōmānōs fortissimōs fuisse*, he thinks that the Romans have been very brave ; *nuntiāvit Gallōs nostrōs superāvisse* (*superātūrōs esse*), he announced that the Gauls had overcome (would overcome) our men.

CAUTION. With verbs denoting *necessity, permission, ability* (as, *oportet, licet, possum*) the Present Infinitive must be translated by the *Perfect*, when those verbs are in the Perfect ; as, *oportuit mē ire* (not *ivisse*), I ought to have gone (it was necessary for me to go) ; *mihi venīre licuit*, I might have come (it was permitted me to come) ; *urbem vidēre potuisti*, you could have seen the city (you were able to see).

CONDITIONAL SENTENCES.

174. A Conditional Sentence consists of a Principal Clause, making a *statement*, and a Subordinate Clause, connected by *sī* (*if*), or a compound of *sī* (as, *nisi, unless ; etsī, although ; sīn, but if*). The clause containing *sī* is called the *Condition* ; the clause containing the statement (that is, the Principal Clause) is called the *Conclusion*. The Condition is also called the *Protasis* ; the Conclusion, the *Apodosis*.

Conditional Sentences are divided, —

- (1.) According to the *time* denoted by them.
- (2.) According to the *kind of statement* made, or the *thought* expressed.
 - a. *Time.* Conditional Sentences may express Past, Present, or Future time.
 - b. *Kind of Statement.* As the Mode of a verb expresses the “mood” of the speaker, he will use the Indicative to make a *simple statement* (that is, a statement without any hint of doubt) ; but he will use the Subjunctive to state something which he regards as *uncertain* (that is, *possible*) or *contrary to the truth* (that is, *impossible*).

Table of Conditional Sentences.

175. This Table shows what *time* and what *thought* a Conditional Sentence may express. Remember that the Subjunctive has no Future or Future Perfect. The Present is also used as a Future (as in *c*), and the Perfect as a Future Perfect (as in REMARK 3).

TIME.	THOUGHT EXPRESSED.	MODE AND TENSE.	EXAMPLE.
a. Present.	{ 1. Fact,	Indic. Pres. (both clauses),	<i>si valet, laetor, if he is well, I rejoice.</i>
	{ 2. Contrary to Fact,	Subj. Imperf.* (both clauses),	<i>si valeret, laetārer, if he were well, I would rejoice (now).</i>
b. Past.	{ 1. Fact,	{ Indic. Imperf. (both clauses),	<i>si valēbat, laetābar, if he was well, I was rejoicing.</i>
	{ 2. Contrary to Fact,	{ Indic. Perf.† (both clauses),	<i>si valuit, laetātus sum, if he was well, I rejoiced.</i>
c. Future.	{ 1. Fact,	Subj. Pluperf. (both clauses),	<i>si valuisset, laetātus essem, if he had been well, I would have rejoiced.</i>
	{ 2. Doubt,	{ Indic. Fut.‡ (both clauses),	<i>si valēbit, laetābor, if he shall be well, I will rejoice.</i>
		Subj. Pres.§ (both clauses),	<i>si valeat, laeter, if he should be well, I would rejoice.</i>

* REMARK 1. This form of Conditional Sentence is apt to puzzle a beginner more than any other, because the Imperfect Subjunctive denotes *present* time. Review carefully 19, *b*, page 6, and notice how exactly alike the English and Latin are in this respect. We say, "If it were so now" (as it is *not*).

† REMARK 2. Of course, the Perfect Indicative may have a double idea of time (81, 3); and the example may also be translated, *if he has been well, I have rejoiced*.

‡ REMARK 3. If the action of the Condition is completed *before* the time of the Conclusion, we must use the Future Perfect Indicative, instead of the Future, and (to express a *doubt*) we must use the Perfect Subjunctive (= the Future Perfect), instead of the Present; as, *si militēs hortātus erit, fortiter pugnābunt, if he shall have encouraged the soldiers, they will fight bravely; si militēs hortātus sit, fortiter pugnent, if he should have encouraged the soldiers, they would fight bravely*.

§ REMARK 4. Besides the forms of Conditional Sentences given in the above Table, others will be found whose form will depend entirely upon the *sense*; for example, those which will either combine *past* and *present* time, or in which the Conclusion may have the form of a *command*; as, *si fortis fuisset, victor esset, if he had been brave, he would (now) be victor; si vult, veniat, if he wishes, let him come*.

Subjunctive of Wish.

176. The Subjunctive is used to express a *wish*. Of course, the Indicative cannot denote such an idea, as the thing wished for must be *possible* or *impossible*. "There is an *if* about every wish;" and, in Latin, a sentence expressing a *wish* is really a clause of a Conditional Sentence, following the laws stated in **175**, *a* (2), *b* (2), *c* (2).

With the Subjunctive of Wish the particles *utinam*, *Ō sī* (*would that*) are often used.

- a.* A wish for something *impossible at the present time* requires the Imperfect Subjunctive; as, (*utinam*) *cōpiās mājōrēs habērēmus!* *would that we (now) had greater forces!*
- b.* A wish for something *impossible in past time* requires the Pluperfect Subjunctive; as, (*utinam*, *Ō sī*) *militēs fortiōrēs fuissent!* *would that the soldiers had been braver!*
- c.* A wish for something *possible in the future* requires the Present Subjunctive; as, (*utinam*) *pater veniat!* *would that my father would come!*

CAUTION. A *negative wish* requires *nē*, and not *nōn*; as, *nē vivam, sī sciō*, *I wish I may not live, if I know.*

Subjunctive in Questions.

- 177.** *a.* The Subjunctive is used to ask a question implying a *doubt* (see examples under **164**, *b*).
- b.* The Subjunctive is used to ask an *Indirect Question*; as, *rogāvit quis sē vocāret*, *he asked who was calling him* (*Direct Question*, "*Quis mē vocat?*")
- c.* The question is often *hinted*, but not really *asked*; as, *cognōvit quid fēcerit*, *he has found out (by inquiry) what he has done*; *dīc mihi quid faciās*, *tell me (for I wish to know) what you are doing*; *quae agat, quibuscum loquātur, scit*, *he knows (by inquiry) what he does (and) with whom he converses.*
- d.* Indirect Questions are either *single* or *double*; like Direct Questions, they require interrogative words. (Review **101**.) Notice, however, these two points in which they differ from Direct Questions: (1.) In a *Single* Indirect Question, *num* (*whether*) is regularly used, but it does not necessarily expect the answer *No*; (2.) In *Double* Indirect Questions, *utrum* — *an* (or *-ne* — *an*) are used, as in Direct Questions; but *or not* is expressed by *necne* (*annōn* being used in Direct Questions); as, *rogāvit utrum amicus an inimicus essem*, *he asked whether I were a friend or foe*; *dubium est utrum ventūrus sit, necne*, *it is doubtful whether he will come, or not.*

REMARKS. 1. Sometimes *sī* is used in the sense of *whether* (as in English). This use is common with *expectō*, in a *single* question; as, *sī venīrent expectāvi*, *I waited (to see) whether they would come.* 2. *Ut (how)* is sometimes used in questions; as, *docēbat ut omni tempore tōtius Galliae principātum Aedui tenuissent.*

Subjunctive of Command, Exhortation, etc.

178. Any form of Command not *direct* (that is, implying that the First or Third Person is the actor, and expressing *exhortation*, *warning*, etc.) requires the Subjunctive.

CAUTIONS. 1. To express a *negative* form of *exhortation*, etc., *nē*, and not *nōn*, must be used; as, *nē pugnēmus*, *let us not fight.*

2. To express a *prohibition* (that is, a negative command to the Second Person), the Imperative must *not* be used. There are several forms that may be used; these two, however, are most common:—

- a. For the Singular, *nē* with the *Perfect* Subjunctive; as, *nē hōc flūmen transieris*, *don't cross this river* (literally, *do not have crossed*, etc.). The use of the *Perfect* arises from the fact that the Romans often wished to describe an act as *finished*.
- b. For the Singular or Plural, use *nōlī* (Imperative of *nōlō*) with the Complementary Infinitive; as, *nōlīte ignāvi esse*, *do not be cowardly* (literally, *be unwilling to be*).

Subjunctive of Purpose.

179. The Subjunctive is used to express a *purpose*, answering the questions *Why? For what?* A Purpose may be *positive* or *negative*; the conjunction *ut* (also written *utī*), *that*, *in order that*, is commonly used with the *positive*, and *nē*, *that not*, *lest*, with the *negative*; as, *venit ut urbem vidēret*, *he came that he might see (to see) the city*; *pugnāmus nē servī simus*, *we fight that we may not be slaves.*

CAUTIONS. 1. *The Infinitive must not be used to denote a Purpose* (see first example). 2. *Ut nōn must not be used for a negative Purpose, but for a negative Result* (181).

- a. The Relative *quī* is very often used to introduce a clause of Purpose, being equal to *ut* is (*ego*, *tū*, etc.); as, *cōpiās misit quae (= ut eae) urbem expugnarent.*
- b. The Ablative *quō* (= *ut eō*) is regularly used, instead of *ut*, when there is a *Comparative* in the clause. It is thus both a Conjunction (*ut*) and an Ablative of Measure of Difference (155); as, *lēgem brevem esse oportet, quō facilius intelligātur*, *a law should be short, that it may THE more easily be understood.*

- c. **Quōminus** (also written **quō minus**, by which the less) takes the Subjunctive, with the meanings *that not, from, etc.*, after verbs signifying to *hinder, prevent, object*, being equivalent to **nē, lest**; as, **quid Caesarem impedit quōminus urbem oppugnet?** (*hinders from assaulting*); **recūsāvit quōminus sub imperiō populi Rōmāni esset** (*refused to be*).
- d. Verbs of *asking, commanding* (except **jubeō**), *urging, permitting* (except **patior**), and others of like meaning, take a Subjunctive of Purpose, and not the Accusative with the Infinitive, as they do not make a statement; as, **legiōnēs hortātus est ut pugnarent**, *he urged the legions to fight*.
- e. Verbs of *fearing* take the Subjunctive: with **nē**, when the event is not desired; with **ut**, when it is desired. Translate **nē** by *that or lest*, **ut** by *that not*, and the Present Subjunctive like the Future Indicative. Study these examples carefully, and notice that "*not*" comes from the *thought*, rather than from **ut**: **vereor nē leō veniat**, *I fear that (lest) the lion will come* (literally, *I have my fears about his not coming*); **vereor ut vincat**, *I fear that he will not conquer* (literally, *I have my fears about his conquering*).
- f. **Ut** is often omitted, especially after verbs of *asking, commanding*, and others of similar meaning; as, **huic mandat, Rēmōs adeat**, *he instructs him to visit the Remi*.

180. There are, in common use, *five ways* of expressing a Purpose; but the Infinitive is not one of them. *He came to see the city* may be written:—

1. **vēnit ut urbem vidēret.** 3. **vēnit ad urbem videndam** (190, a).
2. **vēnit quī urbem vidēret.** 4. **vēnit urbis videndae causā** (190, a).
5. **vēnit urbem visum** (191, a).

Subjunctive of Result.

181. The Subjunctive is used to denote a *result*. A *positive* Result regularly has, for its conjunction, **ut, so that**; a *negative* Result has **ut nōn, so that not**.

REMARK. The Subjunctive of Result is common after **sic (ita, tam)**, *so*; **tālis, such**; **tantus, so great**; **is, such**; **ējusmodi, of such a kind**.

- a. A Subjunctive of Result is used with Impersonal Verbs like **accidit** (*fit*), *it happens*; **sequitur**, *it follows*; and other verbs and expressions of like meaning. Of course, *the thing that happens, etc.*, is the real Subject of such a verb; as, **accidit, ut lūna plēna esset**, *it happened to be full moon (that the moon was full)*; **sequitur, ut haec falsa sint**, *it follows that these things are false*.

REMARK. The Future Infinitive Passive (as *amātum iri*) is seldom found. In its place is used *futūrum esse* (or *fore*) followed by a Subjunctive of Result; as, *dixit fore (futūrum esse) ut omnēs interficerentur (not omnēs interfectum iri), he said that (it would happen that) all would be killed.*

- b. A Result clause may also be the Object of a verb; as, *fēcērunt ut profectiō consimilis fugae vidērētur, they made their departure seem very like a flight; nē committat ut locus hōc nōmen capiat, let him not cause the place to take this name.*
- c. The Relative *quī* is often equivalent to *ut* is, *ego*, etc., introducing a Result. This use of the Subjunctive expresses a Result of some quality of the Antecedent, and hence is called the *Characteristic Result*. Sometimes the thought of Result is not at once evident, and we must supply some such word as *tālis*, *tantus*, *ējusmodi*, to modify the Antecedent and give to it the idea of *quality*, which the Romans associated with it; as, *nōn is (= tālis) sum quī (= ut ego) periculō terrear, I am not such (a coward) as to be (that I am) terrified by danger; tempestās (tanta) coōrta est, quae (= ut ea) nāvēs rējiceret, a storm arose (so great) which (that it) drove the vessels back.*
- d. *Quīn*, a peculiar compound of the Relative Pronoun and *nōn* (or *nē*), is used with the Subjunctive after words implying *doubt*, and is translated by *that*, *but that*. The *quī* is an old Ablative, equivalent to *quō*; so that *quīn* = *ut eō nōn*. *Quīn* is sometimes used instead of *quōminus* (179, c) after verbs of *hindering*, etc. Examples are: *nōn est dubium (or nōn dubitō) quīn fortis sit, there is no doubt (or I do not doubt) that he is brave; nunquam mē poteris dēterrēre, quīn haec loquar, you can never deter me from saying these things.*

CAUTIONS. 1. If the thought is, *I doubt whether*, or *it is doubtful whether*, the Subjunctive of *Indirect Question* must be used; as, *fortisne an ignāvus sit, dubium est*. 2. *Dubitō*, meaning *I hesitate*, takes the Infinitive; as, *nostrī flūmen transīre nōn dubitāverunt*.

- e. A clause of Result is often used as an *appositive*; as, *id, quod constituerant, facere cōnantur, ut ē finibus suis exeant (ut — exeant is in apposition with id).*

How to express Cause or Reason.

182. a. *Quod* (*because*), *quoniam* (*since*), *quia* (*because*), regularly require the Indicative.

- b. *Quum* (or *cum*), meaning *since*, and introducing a reason, requires the Subjunctive; as, *quum fortis sit, vincet, since he is brave, he will conquer.*
- c. The Relative *quī* is often equal to *quum* is (*ego*, etc.) meaning *since he* (*I*, etc.), and takes the Subjunctive of Cause; as, *condemnātus est, quī amicum interfēcerit, he has been condemned, since he has killed his friend.*
- d. *Quod* is often used to introduce a Substantive Clause (188, b) which may be Subject or Object; as, *quod Rēgulus rediit mirābile vidētur, the fact that Regulus returned seems strange.* It is generally best translated by *the fact that*, or *as to the fact that.*
- e. For *quod* (*because*) with the Subjunctive, see 187, f.

How to express Concession.

183. *Concession* means *granting*; for instance, *although he is innocent* means *granting that*, etc.

- a. *Quum* (or *cum*), meaning *although*, requires the Subjunctive of Concession; as, *quum paucī sint, fortissimī sunt, although they are few, they are very brave.*

CAUTION. *Etsī, tametsī*, meaning *although*, being compounds of *sī*, take the Indicative or the Subjunctive according to the laws of Conditional Sentences (175). *Quamquam* (*although*) takes the Indicative.

- b. The Relative *quī* is often equal to *quum* is (*ego*, etc.) meaning *although he* (*I*, etc.), and takes the Subjunctive of Concession; as, *culpātur, quī innocens sit, he is blamed, although he is innocent.*
- c. *Quamvis* (= *quam* + *vis*, Second Person Singular of *volō*) means, literally, *as much as you please*, but is translated *although*. It requires the Subjunctive; as, *quamvis fortēs sint, although they are brave (let them be as brave as you please).*
- d. *Dum, modo, dummodo*, meaning *provided*, require the Subjunctive of Concession; as, *dum eat, provided he go.*

Clauses of Time.

184. a. *Quum* (or *cum*), *when*, regularly takes the Subjunctive in the *Imperfect* and *Pluperfect* tenses, but the Indicative in the others; as, *quum in citeriōre Galliā esset; quum ab his quaesivisset.* There is usually some idea of *cause* (182, b) also present.

CAUTION. *Ubi, when, postquam* (or *posteaquam*), *after*, and others of like meaning, take the Indicative.

- b. **Dum**, meaning *until*, and implying *purpose*, takes the Subjunctive ; when it means *while*, or *until* (not denoting *purpose*), it takes the Indicative ; as, *dum reliquae nāvēs convenirent, exspectāvit, he waited until the rest of the ships should assemble ; but dum paucōs diēs morātur, while he tarries a few days.*

REMARK. **Dum**, meaning *while*, regularly takes the Present Historical (168, b, REMARK), as *morātur*, in the above example.

- c. **Antequam** and **priusquam**, meaning *before*, take the Subjunctive, when there is an idea of *doubt* or *purpose* ; but when they simply connect two *facts*, one occurring before the other, they take the Indicative ; as, *priusquam quidquam cōnārētur, Divitiacum ad sē vocārī jubet, before he should attempt anything, etc. ; ad eum locum contendit, antequam hostēs oppidum expugnārent, he hastened to that place, before the enemy should capture the town (= lest, nē) ; but neque prius fugere dēstitērunt quam ad flūmen pervēnērunt.*

REMARK. **Antequam** and **priusquam**, as in the last example, are often written as separate words.

Subjunctive "by Attraction."

185. The Subjunctive is often used in a dependent clause, not for any reason of its own, but *because the verb on which it depends is in the Subjunctive*. Such a clause must be so closely connected with the other Subjunctive clause as to become a *necessary*, or *explanatory*, part of it, and its verb is said to be in the Subjunctive *by Attraction* ; as, *velit* in this sentence : *nēmō tam potens est ut omnia quae velit efficere possit, no one is so powerful as to be able to accomplish all that he wishes*. That is, *velit* is a part of the Result.

INDIRECT DISCOURSE (Ōrātiō Obliqua).

186. A Direct Quotation gives the exact words of the speaker ; an Indirect Quotation gives the general *idea* of what he said, but not his exact words. We call the former *Direct Discourse* (Ōrātiō Recta) ; the latter, *Indirect Discourse* (Ōrātiō Obliqua). In changing from the Direct to the Indirect, the First Person regularly becomes the Third.

- a. Review the whole of 166 ; also 177, b, c, d. The constructions of Indirect Discourse are found, not only after *Verbs* of *saying, asking, thinking, perceiving, knowing*, but also in connection with any Verb, Noun, or Adjective, containing the same *idea* ; as, *cognōvit virum fortem esse* (Object), *he ascertained that the*

man was brave ; cognitum est virum fortem esse (Subject), it was ascertained, etc. ; certior factus est exercitum vēnisse, he was informed that the army had come ; spēs (fāma) erat Caesarem ventūrum esse, there was a hope (report) that Caesar would come ; dīc mihi quid faciās, tell me what you are doing.

Laws of Modes and Tenses in Indirect Discourse.

187. In changing from the Direct to the Indirect Discourse, the *Verbs of all Subordinate Clauses become (or remain) Subjunctive*. The Mode of the Principal Verb depends on the *kind of sentence*. The modes ordinarily found in both Principal and Subordinate Clauses, and in Declaratory, Interrogative, and Imperative Sentences, are shown in this Table : —

SENTENCE.	CLAUSE.	DIRECT DISCOURSE.	INDIRECT DISCOURSE.
<i>a. Declaratory.</i>	Principal.	Indicative.	Accusative with Infinitive.
	Subordinate.	Indicative.*	Subjunctive.
<i>b. Interrogative.</i>	Principal.	Indicative.	Subjunctive.
	Subordinate.	Indicative.*	Subjunctive.
<i>c. Imperative.</i>	Principal.	Imperative.	Subjunctive.
	Subordinate.	Indicative.*	Subjunctive.

* REMARKS. 1. Of course, if the Subjunctive (expressing *Purpose, Result, Cause, etc.*) were used in the Direct Discourse, instead of the Indicative, it would be *retained* in the Indirect Discourse.

2. If a Subordinate Clause is *not a part of the quotation*, but is merely explanatory, its verb may be in the Indicative ; as, *dixit oppidum, quod vidēs, Ariovisti fuisse, he said that the town, which you see, had been (the property) of Ariovistus.*

d. Tenses in Indirect Discourse. The Tense of the Subjunctive in Indirect Discourse is decided by the laws for the *Sequence of Tenses* (172). Remember that the tense of the *introductory verb* (*dicō, respondeō, putō, etc.*) must be carefully noticed in applying these laws.

e. This passage (Caesar's *Gallic War*, I. 13) will furnish applications of these principles : —

DIRECT DISCOURSE.

Divico said to Caesar : —

"Si pacem populus Romanus cum Helvetiis faciet, in eam partem ibunt atque ibi erunt Helvetii, ubi eos constitueris atque esse volueris : sin bello persequi perseverabis, remiscere* et veteris incommodi populi Romani, et pristinae virtutis Helvetiorum. Quod improvise unum pagum adortus es, cum ii qui flumen transierant suis auxilium ferre non possent, ne ob eam rem aut tuae magnopere virtuti tribueris [178, 2 (a)], aut nos despereris : nos ita a patribus majoribusque nostris didicimus, ut magis virtute quam dolo contendamus, aut insidiis nitamur. Quare noli committere [178, 2 (b)], ut is locus ubi constiterimus ex calamitate populi Romani et internecione exercitus nomen capiat, aut memoriam prodant."

INDIRECT DISCOURSE.

Divico said to Caesar (that) : —

Si pacem populus Romanus cum Helvetiis faceret, in eam partem ituros atque ibi futuros Helvetios, ubi eos Caesar constitueret atque esse voluisset : sin bello persequi perseveraret, reminisceretur et veteris incommodi populi Romani, et pristinae virtutis Helvetiorum. Quod improvise unum pagum adortus esset, cum ii qui flumen transissent suis auxilium ferre non possent, ne ob eam rem aut suae magnopere virtuti tribueret, aut ipsos desperaret : se ita a patribus majoribusque suis didicisse, ut magis virtute quam dolo contenderent, aut insidiis niterentur. Quare ne committeret, ut is locus ubi constitissent ex calamitate populi Romani et internecione exercitus nomen caperet, aut memoriam prodederet.

- f. The sentence, *The leader praised the soldier because he had fought bravely*, may have two meanings : (1) that the speaker gives the reason ; (2) that the speaker quotes the leader's reason. The Latin for the first is *quod pugnāverat* ; for the second, *quod pugnāvisset*, because it is quoting the leader's reason (Subordinate Clause) *indirectly*. The sentence, *The boy did not come, because he was sick*, may be written : *puer, quod aeger erat, nōn vēnit* ; or *puer, quod aeger esset, nōn vēnit*. The first is the reason given by *any one* ; the second is the *boy's* reason (= *as he said*).

SUBSTANTIVE CLAUSES.

188. "A Substantive Clause is one which, like a Noun, is the Subject or Object of a verb, or in Apposition with the Subject or Object." (Review 42, a, page 12.)

- a. Of course, the verb of which a Substantive Clause is Subject must be Impersonal, or used Impersonally ; as, *accidit ut lūna plēna esset* ; *utrum vincat an vincātur*, incertum est.

* Imperative.

b. Substantive Clauses are, —

1. Infinitive with Subject Accusative: *mē ire oportet*.

2. Subjunctive Clauses of $\left\{ \begin{array}{l} (a.) \text{ Purpose (after ask, fear, command,} \\ \text{etc.; 179, d, e).} \\ (b.) \text{ Result (after happen, effect, doubt,} \\ \text{etc.; 181, a, b, d).} \end{array} \right.$

3. Indicative with *Quod* (*the fact that*); 182, d.

4. Indirect Questions; as in the second example under *a* (above).

PARTICIPLES.

189. A Participle is a *Verbal Adjective*; that is, it agrees with some Noun or Pronoun in *gender, number, and case*. Participles are declined, the Present Active being in the Third Declension (*one termination*), like *recens*, and the others in the First and Second, like *bonus*.

a. The *names* of the Tenses of Participles (except of the Future) give no accurate idea of the *time* expressed. The time of the Present and Perfect Participles (like that of the Present and Perfect Infinitive, 173) depends on the time of some other verb. The Present Participle denotes an action as *going on*, and the Perfect Participle as *completed, at the time of that verb*; as, *pugnans* (*vulnerātus*) *cadit* (*cecidit*), *he falls* (*fell*) *fighting* (*wounded*).

b. A Participle may be used as a Predicate Adjective; as, *Gallia in trēs partēs est divisa*, *Gaul is divided* (*in a divided condition*) *into three parts*.

c. The Active Voice (except in Deponent Verbs) has no Perfect Participle. Its place is supplied by the Ablative Absolute (in which the Perfect Passive Participle is used), or by the Pluperfect Subjunctive with *quum* (*when, after, etc.*); as, *having seen the city*, *urbe visā*, or *quum urbem vīdisset*.

d. A Participle is often best translated by a *clause*; as, *eum prōcurrentem vulnerāvit*, *he wounded him as he ran forward*; *eōs transductōs necāvit*, *he carried them over and put them to death*.

e. The Future Active Participle is most frequently used with *sum* to form the Active Periphrastic Conjugation (82, *a*). The form *esse* is frequently omitted (199, 2).

f. The Gerundive (or Future Passive Participle) has two regular uses:

(1.) With *sum*, to form the Passive Periphrastic Conjugation (82, *b*), when it always denotes *necessity*; as, *urbs dēlenda est*, *the city must be destroyed*; *mātūrandum est*, *haste must be made*.

(2.) Instead of the Gerund, as explained in 190, *a*.

- g. The Gerundive is also used as a Predicate Participle ; as, *nōn vidētur ferendus*, *he does not seem bearable*.
- h. The Gerundive is used with *cūrō* (*I care for, provide for*) and some other verbs to denote a Passive Purpose ; as, *nāvēs aedificandās cūrāvit*, *he arranged for the building of ships*.

GERUND.

190. The Gerund is a Verbal Noun of the Second Declension, lacking the Nominative and Vocative, and used only in the Singular. The Infinitive supplies the place of its Nominative ; as, *scīre est regere*, *knowledge is power (knowing is ruling)*; *bellandī cupidī sunt*, *they are desirous of waging war*; *facultās regrediendī nōn datur*, *an opportunity for (of) retreating is not afforded*.

- a. A Transitive Gerund (that is, one from a Transitive Verb) sometimes takes an Object in the Accusative, but regularly it does not. This Rule should be followed: *When the Gerund would take a Direct Object, the Gerundive should be used instead. The Noun or Pronoun that would be the Object takes the case that the Gerund would have, and the Gerundive agrees with it, as an Adjective.* For instance, *the hope of seeing the cities* should not be written *spēs urbēs videndī*, but *spēs urbium videndārum*: also, *ad pacem petendam* (not *petendum*); *facultās ejus locī relinquendī* (Gerundive), *an opportunity for (of) leaving that place*.

SUPINE.

191. The Supine is a Verbal Noun of the Fourth Declension, having only the Accusative and Ablative Singular.

- a. The Accusative (often called the *Former Supine*) is used after verbs of motion, and denotes purpose (**180**). If it is from a Transitive Verb, it may take a Direct Object ; as, *vērērunt pacem petitum*, *they came to seek peace*.

REMARK. The Future Infinitive Passive (as, *laudātum irī*) is a peculiar instance of the use of the Supine in *um*. The form *irī* is the Passive Infinitive of *eō* (*I go*); so that *dīcit nocitum irī* means *he says that harm is going to be done*.

- b. The Ablative of the Supine is an *Ablative of Respect*, or *Specification* (**153**), and is most frequently used with Adjectives ; as, *probat perficere cōnāta perfacile factū esse*, *he shows that to accomplish their undertakings is (a thing) very easy to do (literally, with respect to the doing)*.

ORDER OF WORDS IN A LATIN SENTENCE.

192. No absolute laws can be given for the order of words in a Latin sentence, as it is constantly changed to make one or more words *emphatic*. There is, however, a *regular* arrangement, which is usually observed in ordinary prose. This **Regular Order** is: 1. The Subject; 2. Modifiers of the Subject; 3. Modifiers of the Verb; 4. The Verb.

193. A few rules for the position of certain words are here given:—

1. An **Adjective**, expressing *Quality*, (if not emphatic) follows the word which it describes; but a **Numeral** precedes.

2. A **Genitive** (if not emphatic) follows the word on which it depends; as, *liber pueri*, *the boy's book*. *Pueri liber* means *the boy's book* (and *not* the girl's).

3. **Direct and Indirect Object.** The Direct Object stands nearer the Verb than the Indirect; as, *puerō librum dat*.

4. **Pronouns.** A Demonstrative Pronoun precedes its Noun. A Relative Pronoun stands first in its clause, because it is a *connective*. An Interrogative Pronoun stands first, because, as an interrogative word, it serves to introduce the sentence or clause (like *nonne*, *num*).

5. An **Adverbial** element (Adverb, Ablative, Phrase) regularly stands immediately before the word which it modifies.

CAUTION. **Nē**—*quidem*, *not even*, must have the emphatic word between them; as, *nē Caesar quidem*, *not Caesar even*.

6. **Est, sunt**, etc. (*there is, there are*), often stand first.

CAUTION. **Inquit**, *quoth he*, must follow one or more words of the quotation.

7. A Preposition very frequently stands between its noun and the adjective modifying the noun; as, *magnō in periculō*; *omnibus cum cōpiis*.

8. In the order of Personal Pronouns, the Latin is the reverse of the English; as, *ego et tū*, *you and I*; *ego et Caesar*, *Caesar and I*.

ANALYSIS OF SENTENCES.

194. Sections **34** to **44**, pages 9–13, should be carefully studied. The same general principles apply to the analysis of both English and Latin sentences. They are here stated in brief form: (1.) Tell whether it is Simple, Compound, or Complex.

a. Simple Sentence. (2.) Tell whether it is Declaratory, Interrogative, Imperative, or Exclamatory. (3.) Tell its Subject and Predicate. (4.) Name the modifiers of the Subject (if there are any). (5.) Name the modifiers of the Verb (if there are any), and tell what each expresses, — *manner, cause*, etc.

- b. **Compound Sentence.** Analyze each Clause as a Simple Sentence, and name the Connective, if one is expressed.
- c. **Complex Sentence.** Analyze the Principal Clause as a Simple Sentence. Name the Subordinate Clauses; tell what each modifies, and *why*; analyze each as a Simple Sentence, naming its Connective.

GENERAL FACTS AND USEFUL HINTS.

195. 1. Two negatives equal an affirmative; as, *nulli, none; nonnulli, some; nunquam, never; nonnunquam, sometimes.*

2. *Nē quidem, not even*, always have the emphatic word between them; as, *nē equitēs quidem, not the horsemen even.*

3. An *Enclitic* is a word which is *always* attached to another. The word means *leaning on*, as though Enclitics were too weak to stand alone. The most common Enclitics are *-que (and)*, *-ne (asking a question)*, and *cum (with)* when used with Personal, Reflexive, Relative, and Interrogative Pronouns. As an illustration of the *weakness* of *-que*, compare the English *bread 'n' milk, horse 'n' carriage* (as those expressions are sometimes hastily pronounced).

4. When an Enclitic is added to a word, the *accent* is placed on the syllable before the Enclitic; as, *itine'ribus*, but *itineribus'que*; *Ci'cerō*, but *Cicerō'ne* (as, *Cicerōne valet? is Cicero well?*).

5. *Itaque* may be a Conjunction meaning *therefore (i'taque)*, or *ita + que*, meaning *and so (ita'que)*. In the former sense it stands at the beginning of a sentence; in the latter, the *que* connects the clauses of a sentence.

6. Two Adjectives (not Numerals) modifying a noun are regularly connected by *et* or *que*; as, *urbēs multae et magnae, many great cities.*

7. *Quis = who?* (of several). *Uter = which one?* (of two). *Alius = another* (of several). *Alter = the other* (of two). *Aliēnus = another's*; as, *servus aliēnus, another's slave.*

8. Words used *in pairs* are called *Correlatives* (because they relate to each other).

Usually, the first has a *Demonstrative* idea, the second, a *Relative* force. The most common Correlatives are:—

alius — alius, one — another.

alii — alii, some — others.

alter — alter, the one — the other.

alteri — alteri, the one party — the other party.

aut — aut, either — or.

eō — quō, thither — whither.

et — et, both — and.

ibi — ubi, there — where.

inde — unde, thence — whence.

is — quī, he — who.

neque (nec)—neque (nec), *neither*
— *nor*.

nōn solum — sed etiam, *not only*
— *but also*.

quum — tum, *not only* — *but also*.

quum — tamen, *although* — *yet*.

tālis — quālis, *such* — *as*.

tametsi — tamen, *although* — *yet*.

tantus — quantus, *as great* — *as*.

tot — quot, *as many* — *as*.

tum — quum, *at that time* — *when*.

vel — vel, *either* — *or*.

9. Alius has a peculiar use. To express these sentences: *some did one thing, and some another*; *one was running from one ship, another from another*, it would seem right (in view of 8, above) to say, *alii aliud fecerunt, alii aliud*; *alius aliā ex nāvi currēbat, alius ex aliā*. This, however, would be merely repeating the same words, and therefore the Latins simply said, *alii aliud fecerunt*; *alius aliā ex nāvi currēbat*. Also, *alius alii auxilium tulērunt*, *they bore aid to one another (one to another)*.

196. "When shall I use Quin, and when Quōminus?" A good authority says: "The use of quōminus springs from the courtesy of the Latin language. It is more *polite* to say, 'I will hinder you so that you shall *the less* do what you wish,' than to say, 'so that you shall *not* (quin) do it.' So after recūsō the refusal is less point blank with quōminus than with quin."

197. 1. Imperō takes the Dative; jubeō, the Accusative.

2. Licet takes the Dative of Advantage; oportet, the Accusative.

3. *May* (meaning *permission*), *can*, *must*, *might* (meaning *permission*), *could*, *should* (meaning *duty*), are not signs of the Subjunctive, but require separate verbs. *May* and *might* require the proper tense of licet; *can* and *could* require possum; *must*, *ought*, *should*, require oportet or the Gerundive.

4. Nē may be an Adverb; as, *nē cāmus*, *let us not go*. Nē may be a Conjunction; as, *vereor nē veniat*, *I fear that he will come (lest he may come)*. Nē is an Interrogative word, always *Enclitic*; as, *audīvitne?* *did he hear?*

5. Ut (meaning *as*) takes the Indicative, forming with it a parenthetical clause; as, *ut āiunt*, *as they say*.

6. The Relative Quī may be equivalent to

Ut is, ego, etc., expressing *Purpose* (179, a).

Ut is, ego, etc., expressing *Result* (181, c).

Quum is, ego, etc., expressing *Cause* (182, c).

Quum is, ego, etc., expressing *Concession* (183, b).

7. Quum (cum) meaning

When, takes the Subjunctive in the *Imperfect* and *Pluperfect* tenses; but the Indicative in the other tenses.

Since, takes the Subjunctive in all tenses.

Although, takes the Subjunctive in all tenses.

8. *Jubeō*, *I order*; *vetō*, *I forbid*; *cōgō*, *I compel*; *patior*, *I allow*, are regularly followed by the Accusative and Infinitive, and not by *ut* and the Subjunctive.

198. These forms, as well as others from the same Verbs, are often used Impersonally :—

pugnātur, *fighting is carried on*; *nocētur*, *harm is done*; *nōn expectandum est*, *no delay must be made*; *quaeritur*, *the question is asked*; *cogitandum est*, *thought must be taken*; *imperātum est*, *the order was given*; *mātūrandum est*, *haste must be made*; *ad arma concurritur*, *a general (con) rush to arms is made*; *pārendum est*, *obedience must be rendered*; *prōspiciendum est*, *provision must be made (rei frumentāriae, for the corn supply)*; *praecavendum est*, *care (precaution) must be taken*; *hīs rēbus occurrendum (esse) existimāvit*, *he thought that a remedy must be found for these things*; *parcitur hostibus*, *quarter is given to the enemy*; *lēgibus ūtendum est*, *use must be made of the laws*.

199. 1. *Dubitō* takes

The Infinitive, when it means *hesitate*.

Dubitō and *dubius* take

The Subjunctive with *quīn*, when meaning *doubt* (or *doubtful*) *that*.

The Subjunctive of Indirect Question; as, *dubitāt utrum hōc facile an difficile sit*.

2. *Esse* is very often omitted, especially with the *Future Participles*. This should never cause any difficulty, as the Infinitive will always be required by a word of saying, thinking, etc.; as, *Caesar sē castra mōtūrum (esse) dixit*; *expectandum (esse) nōn existimāvit*, *he did not think that any delay should be made*.

3. Remember that not only verbs, but words and phrases, of saying, thinking, etc., require the Accusative and Infinitive; as, *fāma erat, eum interfectum esse*; *habēō spem maximam hostēs pācem factūrōs (esse)*; *Caesarem certiōrem faciō mē vēnisse*.

4. Case of the Person after Verbs of asking :—

Rogō takes the Accusative; *petō*, *postulō*, the Ablative with *ā* (ab); *quaerō*, the Ablative with *ā* (ab), *dē*, or *ē* (ex).

5. To express *I say* — *not*, use *negō* rather than *dicō nōn*; as, *negat sē venīre posse*, *he says that he can't come*.

HINTS ON TRANSLATION.

200. *To the Beginner*. There is a right way to do everything, as well as a wrong one. If you make it a practice, from the very beginning

of your study of Latin, to follow a few simple rules for translation, which are given in the next NOTE, you will save time and patience ; and the difficulties which *seem* great will be easily mastered. You can make a Latin sentence as difficult, or as easy, as you please, by not following these rules, or by obeying them. Do not look up the meaning of all the words in a sentence before you begin to make *sense* of them, but build up your sentence, *from the foundation*, until you have the complete thought. Translation of Latin is not guesswork ; the pupil that looks up the meaning of words in their order on the page, without regard to the importance of each in its sentence, may blame himself, and not the language, for the difficulties he encounters. He should follow these

Rules for Translating.

201. a. In every Simple Sentence, find and translate

(1.) The Subject. This may be expressed in the ending of the Verb only ; but the sentence certainly *has* a Subject.

(2.) The Verb.

(3.) The words (if any) that modify the Subject.

(4.) The words (if any) that modify the Verb.

b. In a Compound Sentence, translate each Principal Clause as though it were a Simple Sentence. If there are Subordinate Clauses, translate them *in the order of their importance*. A Subordinate, or Dependent, Clause is one which, just as in English, limits some part of the Principal Clause (as described in **42**, page 12). A clause introduced by a Latin word meaning *if, who, which, because, since, although, when, after, while*, etc., is Dependent, and should be left until the meaning of the Principal Clause has been obtained.

c. In a Complex Sentence, first translate the Principal Clause as a Simple Sentence ; then translate the Dependent Clauses according to directions given above (**b**).
